This is the story of the author's apprenticeships with Japanese masters to build five unique and endangered traditional boats. It is part ethnography, part instruction, and part the personal story of a wooden boatbuilder fueled by a passion to preserve a craft tradition on the brink of extinction. Over the course of 17

trips to Japan, Douglas Brooks traveled over 30,000 miles to seek out and interview Japan's elderly master boatbuilders; he built boats with five of them, all in their seventies and eighties, between 1996 and 2010. For most of them, Brooks was their sole and last apprentice. Part I introduces significant aspects of traditional Japanese boatbuilding: design, workshop and tools, wood and materials, joinery and fastenings, propulsion, ceremonies, and the apprenticeship system. Part II details each of his five apprenticeships, concluding with a poignant chapter on Japan's sole remaining traditional

shipwright. This fascinating book fills a large and long-standing gap in the literature on Japanese crafts, and will be of interest to boatbuilders, woodworkers, and all those impressed with the marvels of Japanese design and workmanship. **Mercury Outboards, 3-4 Cylinders, 1965-1989** Woodhead Publishing Haynes offers the best coverage for cars, trucks, vans, SUVs and motorcycles on the market today. The aim of this book, with its superb step by step photographs and detailed diagrams is to enable every owner to understand the workings of an outboard motor (2 or 4 stroke) and be able to fix it with relative ease. It includes: an explanation of the different parts that make up the engine and how they interact; how fuel is transformed into

propulsion; regular maintenance and repair worksheets to help even the most mechanically ignorant to work on their outboard engine with confidence; the most common causes of breakdown; troubleshooting tables to allow you to diagnose and fix the most common engine problems and advice on how to winterize your outboard in one short afternoon. After reading this book, your outboard will no longer be a potential bother to you but an ally for better boating.
