LAB ACTIVITY: THE COMPOUND MICROSCOPE Compound Microscope Lab Answers Answer Explained. 2. b. You place the specimen/slide on the stage. 3. a. The two eyepieces are on the microscope head. 4. d. The nosepiece holds the objective lenses. 5. c. The condenser lens is just below the stage. 6. a. The lamp is also called the base lens and sits on the base. 7. c. The light dimmer controls the microscope's illumination levels. 8. d. Compound Microscope Lab 1 - Answer Key INTRODUCTION TO THE COMPOUND MICROSCOPE. PAGE 4 CORRECTION. The total magnification of the microscope is equal to the magnification of the ocular multiplied by the magnification of the objective. If you are using the 4x objective and the 10x ocular the total magnification would be $4 \times 10 = 40x$. 805 MICROSCOPE LAB ANSWERS - John Abbott College Start studying Lab: Using a Compound Light Microscope. Learn vocabulary, terms, and more with flashcards, games, and other study tools. Lab: Using a Compound Light Microscope | Science ... What were the two objectives in this lab? To become familiar with the parts and operation of a

compound microscope, and to learn to prepare and observe wet mounts. What is the magnifying power of the low-power objective? 10X. What is the magnifying power of the high-power objective? 40X. Microscope Lab Quiz Flashcards | Quizlet LAB : THE COMPOUND MICROSCOPE First complete this Microscope pre-lab (video & virtual microscope) before continuing on.. Pre lab questions (answer these in your notes). List all the parts of a compound microscope and give the function of each part. Summarize the differences between our microscope and the virtual microscope (use the picture on this page). LAB ACTIVITY: THE COMPOUND MICROSCOPE Part 1: THE COMPOUND LIGHT MICROSCOPE The Parts of the Compound Light Microscope Exercise 1A - Getting familiar with the microscope You will first get acquainted with the major parts of the compound light microscope before learning the proper way to use it. Get a microscope from the cabinet below your lab bench, being sure to handle it by LAB 3 Use of the Microscope - lamission.edu One person from each group will now go over to the microscope storage area and properly transport one microscope to your working area. 3. The other person in the group will pick up a pair of scissors, newsprint, a slide, and a cover slip. 4.

Remove the dust cover and store it properly. Microscope lab - SlideShare This is a basic freshman level lab where students learn to focus a light microscope. They examine a slide with the letter e, common things, like dust, and a prepared slide with threads to illustrate depth perception. This page shows the answers to the observations students make during the lab and sample pictures of common items as viewed under a microscope. (KEY)

Introduction to the Microscope The type of microscope that we will be using in this lab is a compound light microscope. Light microscopes magnify the image of the specimen using light and lenses. The term compound means that this microscope passes light through the specimen and then through two different lenses.
