A flock of birds was moving toward me along the river, hovering over something floating on the water. It drifted downstream, closer and closer, until finally it bumped up against the dock. Though it was covered with leaves and branches, now I could tell that it was a raft. I reached down and pushed some of the leaves aside. Beneath them was a drawing of a rabbit. It looked like those ancient cave paintings I'd seen in books--just outlines, but wild and fast and free. Nicky isn't one bit happy about spending the summer with his grandma in the Wisconsin woods, but then the raft appears and changes everything. As Nicky explores, the raft works a subtle magic, opening up the wonders all around him--the animals of river and woods, his grandmother's humor and wisdom, and his own special talent as an artist.

George Washington had Alexander Hamilton. Thomas Jefferson had Albert Gallatin. From internationally known tax expert and former Supreme Court law clerk Gregory May comes this long overdue biography of the remarkable immigrant who launched the fiscal policies that shaped the early Republic and the future of American politics. Not Alexander Hamilton---Albert Gallatin. To this day, the fight over fiscal policy lies at the center of American politics. Jefferson's champion in that fight was Albert Gallatin---a Swiss immigrant who served as Treasury Secretary for twelve years because he was the only man in Jefferson's party who understood finance well enough to reform Alexander Hamilton's system. A look at Gallatin's work---repealing internal taxes, restraining government spending, and repaying public debt---puts our current federal fiscal problems in perspective. The Jefferson Administration's enduring achievement was to contain the federal government by restraining its fiscal power. This was Gallatin's work. It set the pattern for federal finance until the Civil War, and it created a culture of fiscal responsibility that survived well into the twentieth century.
