This volume focuses on the decision-

making potential provided by second language performance assessments. The authors first situate performance assessment within a broader discussion of alternatives in language assessment and in educational assessment in general. They then discuss issues in

performance assessment design, implementation, reliability, and validity. Finally, they present a prototype framework for second language performance assessment based on the integration of theoretical underpinnings and research findings from the task-based language teaching literature, the language testing literature, and the educational measurement literature. The authors outline test and item specifications, and they present numerous examples of prototypical language tasks. They also propose a research agenda focusing on the operationalization of second language performance assessments.

Thomas Mann predicted that no manner

or mode in literature would be so typical or so pervasive in the twentieth century as the grotesque. Assuredly he was correct. The subjects and methods of our comic literature (and much of our other literature) are regularly disturbing and often repulsive—no laughing matter. In this ambitious study, John R. Clark seeks to elucidate the major tactics and topics deployed in modern literary dark humor. In Part I he explores the satiric strategies of authors of the grotesque, strategies that undercut conventional usage and form: the de-basement of heroes, the denigration of language and style, the disruption of normative narrative technique, and even the debunking of authors themselves. Part II surveys major recurrent themes of grotesquerie: tedium, scatology, cannibalism,

dystopia, and Armageddon or the end of the world. Clearly the literature of the grotesque is obtrusive and ugly, its effect morbid and disquieting—and deliberately meant to be so. Grotesque literature may be unpleasant, but it is patently insightful. Indeed, as Clark shows, all of the strategies and topics employed by this literature stem from age-old and spirited traditions. Critics have complained about this grim satiric literature, asserting that it is dank, cheerless, unsavory, and negative. But such an interpretation is far too simplistic. On the contrary, as Clark demonstrates, such grotesque writing, in its power and its prevalence in the past and present, is in fact conventional, controlled, imaginative, and vigorous—no mean achievements for

any body of art.

The FIAF Moving Image Cataloguing Manual is the result of many years of labor and collaboration with numerous professionals in the moving image field. It addresses the changes in information technology that we've seen over the past two decades, and aligns with modern cataloguing and metadata standards and concepts such as FRBR (Functional Requirements for Bibliographic Records), EN 15907, and RDA (Resource Description and Access). The manual is designed to be compatible with a variety of data structures, and provides charts, decision trees, examples, and other tools to help experts and non-experts alike in

performing real-world cataloguing of moving image collections.

From the bestselling author of *The Bomber Mafia*: discover Malcolm Gladwell's breakthrough debut and explore the science behind viral trends in business, marketing, and human

behavior. The tipping point is that magic moment when an idea, trend, or social behavior crosses a threshold, tips, and spreads like wildfire. Just as a single sick person can start an epidemic of the flu, so too can a small but precisely targeted push cause a fashion trend, the popularity of a new product, or a drop in the crime rate. This widely acclaimed bestseller, in which Malcolm Gladwell explores and brilliantly illuminates the tipping point phenomenon, is already changing the way people throughout the world think about selling products and disseminating ideas. "A wonderful page-turner about a fascinating idea that should affect the way every thinking person looks at the world." —Michael Lewis

"This is the story of the strikes and union organizing drive the men and women of Teamsters Local 574 carried out in Minnesota in 1934, paving the way for the continent-wide rise of the Congress of Industrial Organizations (CIO) as a fighting social movement. Through hard-fought strike actions, which were in fact organized battles, they made

Minneapolis a union town, defeating not only the trucking bosses but strikebreaking efforts of the big-business Citizens Alliance and city, state, and federal governments. They showed in life what workers and their allies on the farms and in the cities can achieve when they're able to count on the leadership they deserve."--BOOK JACKET.

Networking: A Beginner's Guide, Sixth Edition Ludwig von Mises Institute

Many readers drawn into the heroic tales of J. R. R. Tolkien's imaginary world of Middle-earth have given little conscious thought to the importance of the land itself in his stories or to the vital roles played by the flora and fauna of that land. As a result, *The Hobbit*, *The Lord of the Rings*, and *The Silmarillion* are rarely considered to be works of environmental

literature or mentioned together with such authors as John Muir, Rachel Carson, or Aldo Leopold. Tolkien's works do not express an activist agenda; instead, his environmentalism is expressed in the form of literary fiction. Nonetheless, Tolkien's vision of nature is as passionate and has had as profound an influence on his readers as that of many contemporary environmental writers. The burgeoning field of agrarianism provides new insights into Tolkien's view of the natural world and environmental responsibility. In *Ents, Elves, and Eriador*, Matthew Dickerson and Jonathan Evans show how Tolkien anticipated some of the tenets of modern environmentalism in the imagined world of Middle-earth and the races with which it is peopled. The

philosophical foundations that define Tolkien's environmentalism, as well as the practical outworking of these philosophies, are found throughout his work. Agrarianism is evident in the pastoral lifestyle and sustainable agriculture of the Hobbits, as they harmoniously cultivate the land for food and goods. The Elves practice aesthetic, sustainable horticulture as they shape their forest environs into an elaborate garden. To complete Tolkien's vision, the Ents of Fangorn Forest represent what Dickerson and Evans label feraculture, which seeks to preserve wilderness in its natural form. Unlike the Entwives, who are described as cultivating food in tame gardens, the Ents risk eventual extinction for their beliefs. These ecological philosophies reflect an aspect

of Christian stewardship rooted in Tolkien's Catholic faith. Dickerson and Evans define it as "stewardship of the kind modeled by Gandalf," a stewardship that nurtures the land rather than exploiting its life-sustaining capacities to the point of exhaustion. Gandalfian stewardship is at odds with the forces of greed exemplified by Sauron and Saruman, who, with their lust for power, ruin the land they inhabit, serving as a dire warning of what comes to pass when stewardly care is corrupted or ignored. Dickerson and Evans examine Tolkien's major works as well as his lesser-known stories and essays, comparing his writing to that of the most important naturalists of the past century. A vital contribution to environmental literature and an essential addition to

Tolkien scholarship, Ents, Elves, and Eriador offers both Tolkien fans and environmentalists an understanding of Middle-earth that has profound implications for environmental stewardship in the present and the future of our own world.

This open access volume examines experiences of contemporary Latvian migrants, thereby focusing on reasons for emigration, processes of integration in their host countries, and – in the case of return migration - re-integration in their home country. In the context of European migration, the book describes

the case of Latvia, which is interesting due to the multiple waves of excessive emigration, continuously high migration potential among European Union member states, and diverse migrant characteristics. It provides a fascinating insight into the social and psychological aspects linked to migration in a comparative context. The data in this volume is rich in providing individual level perspectives of contemporary Latvian migrants by addressing issues such as emigrants' economic, social and cultural inclusion in the host country, ties with the home country and culture, interaction with public authorities both in the host and home country, political views, and perspectives on the permanent settlement in migration or return. Through topics such as

assimilation of children, relationships between emigrants representing different emigration waves, the complex identities and attachments of minority emigrants, and the role of culture and media in identity formation and presentation, this book addresses topics that any contemporary emigrant community is faced with.

“An extraordinary real picture of human beings numbed by catastrophe but still driven by the unconquerable determination of living creatures to keep on being alive.” —The New Yorker “Alas, Babylon.” Those fateful words heralded the end. When the unthinkable nightmare of nuclear holocaust ravaged the United States, it was instant death

for tens of millions of people; for survivors, it was a nightmare of hunger, sickness, and brutality. Overnight, a thousand years of civilization were stripped away. But for one small Florida town, miraculously spared against all the odds, the struggle was only just beginning, as the isolated survivors—men and women of all ages and races—found the courage to come together and confront the harrowing darkness. This classic apocalyptic novel by Pat Frank, first published in 1959 at the height of the Cold War, includes an introduction by award-winning science fiction writer and scientist David Brin. Booklist Also known by its US title *The Problem of the Green Capsule*, this classic novel is widely regarded as one of John Dickson Carr's masterpieces and remains among the greatest impossible crime mysteries of all time. A sinister case of deadly poisoned chocolates from Sodbury Cross's high street shop haunts the group of friends and relatives assembled at Bellegarde, among the orchards of 'peach-fancier' Marcus Chesney. To prove a point about how the sweets could have been poisoned under the nose of the shopkeeper, Chesney stages an elaborate memory game to test whether any of his guests can see beyond their 'black spectacles'; that is, to see the truth without assumptions as witnesses. During the test – which is also being filmed – Chesney is murdered by

his accomplice, dressed head to toe in an 'invisible man' disguise. The keen wits of Dr, Gideon Fell are called for to crack this brazen and bizarre murder committed in full view of an audience.

A festive atmosphere envelops the line of people waiting for one of the last showings of a popular London musical comedy. Excitement is so big, and crowd is so large that people are being carried rather than walking. As the line eventually reaches the box office one man drops on his knees and slowly spreads on the floor. People jump to

help, thinking he had fainted, but get horrified when they see a knife stuck in his back. There are so many witnesses, but nobody saw anything and nobody can tell when it happened as the man has been held upright for a while, carried by the moving crowd. Inspector Alan Grant of Scotland Yard is summoned to investigate the case. Known for his wit and guile Inspector Grant will have to deal with a lot of false leads and clues, which will take him all the way to Scotland, in order to solve this mysterious murder case.

365 Days/365 Plays Temple University Press

"The Drillmaster of Valley Forge-Baron Von Steuben-correctly noted in his "Blue Book" how physical conditioning and health (which he found woefully missing

when he joined Washington's camp) would always be directly linked to individual and unit discipline, courage in the fight, and victory on the battlefield. That remains true today. Even an amateur historian, choosing any study on the performance of units in combat, quickly discovers how the levels of conditioning and physical performance of Soldiers is directly proportional to success or failure in the field. In this monograph, Dr. Whitfield "Chip" East provides a pragmatic history of physical readiness training in our Army. He tells us we initially mirrored the professional Armies of Europe as they prepared their forces for war on the continent. Then he introduces us to some master trainers, and shows us how they initiated an American brand of physical conditioning

when our forces were found lacking in the early wars of the last century. Finally, he shows us how we have and must incorporate science (even when there exists considerable debate!) to contribute to what we do-and how we do it-in shaping today's Army. Dr. East provides the history, the analysis, and the pragmatism, and all of it is geared to understanding how our Army has and must train Soldiers for the physical demands of combat. Our culture is becoming increasingly "unfit," due to poor nutrition, a lack of adequate and formal exercise, and too much technology. Still, the Soldiers who come to our Army from our society will be asked to fight in increasingly complex and demanding conflicts, and they must be prepared through new, unique, and

scientifically based techniques. So while Dr. East's monograph is a fascinating history, it is also a required call for all leaders to better understand the science and the art of physical preparation for the battlefield. It was and is important for us to get this area of training right, because getting it right means a better chance for success in combat.

Unintended Consequences Pocket Books
A new collection of short fiction and nonfiction by a Russian master of bittersweet humor, dramatic irony, and poignant insights into contemporary life. The town of Tarusa lies 101 kilometers outside Moscow, far enough to have served, under Soviet rule, as a place where former political prisoners and other "undesirables" could legally settle. Lying between the center of power and

the provinces, between the modern urban capital and the countryside, Tarusa is the perfect place from which to observe a Russia that, in Maxim Osipov's words, "changes a lot [in the course of a decade], but in two centuries—not at all." The stories and essays in this volume—a follow-up to his debut in English, *Rock, Paper, Scissors*—tackle major questions of modern life in and beyond Russia with Osipov's trademark blend of daring and subtlety. Deceit, political pressure, ethnic discrimination, the urge to emigrate, and the fear of abandoning one's home, as well as myriad generational debts and conflicts, are as complexly woven through these pieces as they are through the lives of Osipov's fellow Russians and through our own. What binds the prose in this

volume is not only a set of concerns, however, but also Osipov's penetrating insights and fearless realism. "Dreams fall away, one after another," he writes in the opening essay, "some because they come true, but most because they prove pointless." Yet, as he reminds us in the final essay, when viewed from ground level, "life tends not towards depletion, towards zero, but, on the contrary, towards repletion, fullness." Have His Carcase Harper Collins

Edgar Wallace (1875-1932) was an English writer so prolific, that his publisher claimed that he was responsible for a quarter of all books sold in England. An

author, journalist and poet, Wallace wrote countless novels, short stories, screen plays, stage plays, along with historical non-fiction. His work has been adapted into more than 160 films. In 1932, Wallace died suddenly in Hollywood, during the initial drafting of his most famous work, 'King Kong'.
