Heating with wood is often considered a natural and economical alternative to electricity or fossil fuels. However, even with a fairly new and efficient woodstove, many cords of wood are required for burning over the course of a single winter, and incomplete combustion can contribute to poor air quality. A rocket mass heater is an earthen masonry heating system which provides clean, safe, and efficient warmth for your home, all while using 70 to 90 percent less fuel than a traditional woodstove. These unique and beautiful installations provide luxurious comfort year round. In cold weather a few hours of clean, hot burning can provide twenty or more hours of steady warmth, while the unit's large thermal mass acts as a heat sink, cooling your home on sizzling summer days. Packed with hard-to-find information, *The Rocket Mass Heater Builder's Guide* includes: Comprehensive design, construction, and installation instructions combined with detailed maintenance and troubleshooting advice Brick-by-brick layouts, diagrams, and architectural plans augmented with detailed parts drawings and photographs for clarity Relevant and up-to-date code information and standards to help you navigate the approval process with local building departments Earthen masonry heating systems are well-suited for natural and conventional builders alike. A super-efficient, wood-burning, rocket mass heater can help you dramatically reduce your energy costs while enhancing the beauty, value, and comfort of your home. Erica Wisner and Ernie Wisner have built over seven hundred super-efficient, clean-burning masonry stoves. They are dedicated to the search for sustainable solutions and the hands-on teaching of creative, ecological, and practical skills.

Author Anna M. Madsen's book is a fresh and challenging look at the legacy of Martin Luther and the new reformation that is calling people of faith to action today. This book is born out of the conviction that at least two gods are currently competing for our collective trust: nationalism (and its many sub-manifestations) and quietism. Both make a case for and a claim on our allegiance, each by way of different motivations of self and institutional protection. Madsen looks at today's modern context and asks: Where will the church stand in a day that is marked by globalization, polarization, racism, bigotry, and debates about justice for humanity and for the earth itself. While the Reformation church was built on the foundation of justification by grace, Madsen calls people of faith to a new reformation that will focus on standing for justice in the world. Madsen delves into who Jesus was, and how our claim that he died and was raised establishes our faith and impacts the way we live it out. She pays attention to Luther's theology and juxtaposes it with our present context. She explores recent examples of Nazi resistance, liberation theology, black and womanist theology, and feminist theology, each of which come at social justice in their unique ways, with a common conviction that justice work is central to the Christian life. She speaks of how our faith grounding and our faith history weave together and entwine themselves into our present moment, offering both warnings and encouragement. And last, a case is made that justice, anchored in justification, is our new Reformation moment, one not inconsistent with Luther's theology,

but weighted differently to address the different weighty concerns of our day. A study guide is included to encourage group conversation and action.

The Rocket Mass Heater Builder's Guide

"Brewer covers impressive new ground, exploring the shift from fireplaces to stoves for cooking and heating in American homes, and sheds new light on the supposedly "separate spheres" of home and the world in nineteenth-century America. She also considers the changing responses to technological development, the emergence of a consumer ethic, and the attempt to define and preserve a distinct Anglo-American middle-class culture." "Extensively documented - based on letters, diaries, probate inventories, census records, sales figures, advertisements, fiction, and advice literature - the book will be valuable to scholars of American history and women's studies."--Jacket.
