GROSS HICKS

How to Fly Like an Eagle Taylor & Francis

Political and environmental disasters come crashing down in this earthquake sci-fi thriller co-written by the authors of 2001: A Space Odyssey and Memories. When he was seven years old, Lewis Crane survived the Los Angeles earthquake of 1994—but his parents did not. Haunted by the tragedy, Crane has dedicated his life to protecting humanity from similar disasters. Now he is a Nobel Prize-winning earthquake scientist who perfected equipment sensitive enough to predict an earthquake strike down to the minute. And he wants to go further. Crane has formed an organization to explore the idea of stopping earthquakes entirely by fusing the Earth's tectonic plates together. But what effect will this have on the earth? And as political unrest causes tremors of another kind, can Crane's audacious plan stop another major earthquake due to hit the United States? Co-written by Hugo and Nebula Award-winning author Arthur C. Clarke and Philip K. Dick Award-winning author Mike McQuay, the "two formidable SF talents converge splendidly in this disaster thriller, which offers sleek action-adventure writing, world-class tumult and a coherent near-future based on sound yet innovative social and scientific speculation" (Publishers Weekly).

A Novel Harper Collins

Without practice, your child's Shona and English vocabulary will not grow. The 2020 revised edition of My First Shona Dictionary is a picture book for introducing your multilingual child to Shona and English. Add over 50 every day objects to point at and share to your baby's vocabulary. Grow their knowledge in both Shona and English. Read aloud and get them used to your pronunciation. Each every day object is also illustrated to help make the connection with the real world. A perfect gift to get children off to a great start in life by learning two languages at the same time: Shona and English. Suitable for multilingual children 0 to 7 years old. INSTRUCTIONS FOR USE Keep WITHIN REACH of children.

Arthur C. Clarke Bayview Books, LLC

The conclusion of the series that began with 2001: A Space Odyssey explains what really happened to Dave Bowman, who reentered the Discovery to incapacitate the psychotic computer HAL, and speculates about the future relationship between man and machine. Reprint.

Building a Foundation for Better Understanding CreateSpace

A prequel to the events of the smash video game hit Dead Space 3, we follow Earthgov Sergeant, John Carver who's wife and son are attacked by fanatics trying to liberate the Marker site where she works. Racing to solve the clues his wife left behind, Carver teams up with Ellie Langford, survivor of an earlier necromorph outbreak on the Sprawl, and EarthGov Captain Robert Norton. Together they unlock deep secrets about the Markers in an epic adventure that will help determine the fate of mankind.

Coomaraswamy Berkley

"To the spaceship Discovery, floating in the silent depths of space since Dave Bowman passed through the alien 'Star Gate', comes Heywood Floyd on a mission of recovery. What he finds near Jupiter is beyond the imaginings of any mere human." [Source : 4e de couv.].

Artificial Intelligence and the End of the Human Era National Academies Press

Centenarian Heywood Floyd, survivor of two encounters with mysterious monoliths, once again confronts Dave Bowman, an independent HAL, and an unseen alien race

Rule 34 Wildside Press LLC

The countdown to doomsday began with the discovery in 1956 of the neutrino, a particle with no mass and no charge. By the year 2001, the significance of this phantom particle was understood: it was a harbinger. A cosmic event was imminent, and would be close enough to touch. Soon the Sun would go nova; the demolition of Earth was assured. And so it happened in the year 3620. Over the centuries of knowing the end was at hand, humanity pulled together to launch probes into space. Primitive ships, at first, carrying embryos to distant systems, relying on machines to incubate and rear the first people of a virgin land beneath an alien sun. On Earth the Lords of the Last Days lived with no need to care for the future of the world; it was the wildest of times, and the saddest. Last to leave was the Magellan carrying a million homeless; when cataclysm struck, its voyagers witnessed through telescopes the death of Earth and all its wonders, saw the Atlantic boil dry, the pyramids disintegrate, the land of Antarctica briefly bare of ice before fire consumed everything. Then the million slept. Five hundred years later, the Magellan must make planetfall to repair its quantum drive. Its sleepe

The Last Theorem Of Time and Stars The Worlds of Arthur C. Clarke

During the twenty-second century, a space probe's investigation of a mysterious, cylindrical asteroid

brings man into contact with an extra-galactic civilization

3001 McSweeney's

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Rendezvous With Rama Penguin

In the sequel to "Rendezvous with Rama," a second Raman spacecraft is discovered approaching Earth in 2196, an event of potentially devastating consequences for humankind

Dead Space: Liberation Rosetta Books

This book examines the historical and socio-cultural connections across the SAARC region, with a special focus on the relationship between India and Sri Lanka. It investigates hitherto unexplored narratives of history, popular culture and intangible heritage in the region to identify the cultural parallels and intersections that link them together. In doing so, the volume moves away from an organised and authorised heritage discourse and encourages possibilities of new understandings and re-interpretations of cross-cultural communication and its sub-texts. Based on original ethnographic work, the book discusses themes such as cultural ties between India and Sri Lanka, exchanges between Arthur C. Clarke in Sri Lanka and Satyajit Ray in India, cultural connectivity reflected through mythology and folklore, the influence of Rabindranath Tagore on modern dance in Sri Lanka, the introduction of railways in Sri Lanka, narrative scrolls and masked dance forms across SAARC countries, Hindi cinema as the pioneer of cultural connectivity, and women's writing across South Asia. Lucid and compelling, this book will be useful for scholars and researchers of cultural studies, South Asian studies, cultural anthropology, sociology, popular culture, cross-cultural communication, gender studies, political sociology, cultural history, diplomacy, international relations and heritage studies. It will also appeal to general readers interested in the linkages between India and Sri Lanka.

The Final Odyssey Prabhat Prakashan

An instant New York Times bestseller, this prequel to the acclaimed Cork O'Connor series is "a pitch perfect, richly imagined story that is both an edge-of-your-seat thriller and an evocative, emotionally charged coming-of-age tale" (Kristin Hannah, #1 New York Times bestselling author) about fathers and sons, small-town conflicts, and the events that shape our lives forever. Aurora is a small town nestled in the ancient forest alongside the shores of Minnesota's Iron Lake. In the summer of 1963, it is the whole world to twelve-year-old Cork O'Connor, its rhythms as familiar as his own heartbeat. But when Cork stumbles upon the body of a man he revered hanging from a tree in an abandoned logging camp, it is the first in a series of events that will cause him to question everything he took for granted about his hometown, his family, and himself. Cork's father, Liam O'Connor, is Aurora's

sheriff and it is his job to confirm that the man's death was the result of suicide, as all the evidence suggests. In the shadow of his father's official investigation, Cork begins to look for answers on his own. Together, father and son face the ultimate test of choosing between what their heads tell them is true and what their hearts know is right. In this "brilliant achievement, and one every crime reader and writer needs to celebrate" (Louise Penny, #1 New York Times bestselling author), beloved novelist William Kent Krueger shows that some mysteries can be solved even as others surpass our understanding.

3001 The Final Odyssey Phoenix

In the 22nd century visionary scientist Vannevar Morgan conceives the most grandiose engineering project of all time, and one which will revolutionize the future of humankind of space: a Space Elevator, 36,000 kilometres high, anchored to an equatorial island in the Indian Ocean.

My First Shona Dictionary Random House Digital, Inc.

It began four million years ago with a gleaming black monolith - an inexplicable apparition that ignited the spark of human consciousness transforming ape into man.

Sri Lankan Drumming RosettaBooks

At a time when lesbian, gay, bisexual, and transgender individuals--often referred to under the umbrella acronym LGBT--are becoming more visible in society and more socially acknowledged, clinicians and researchers are faced with incomplete information about their health status. While LGBT populations often are combined as a single entity for research and advocacy purposes, each is a distinct population group with its own specific health needs. Furthermore, the experiences of LGBT individuals are not uniform and are shaped by factors of race, ethnicity, socioeconomic status, geographical location, and age, any of which can have an effect on health-related concerns and needs. The Health of Lesbian, Gay, Bisexual, and Transgender People assesses the state of science on the health status of LGBT populations, identifies research gaps and opportunities, and outlines a research agenda for the National Institute of Health. The report examines the health status of these populations in three life stages: childhood and adolescence, early/middle adulthood, and later adulthood. At each life stage, the committee studied mental health, physical health, risks and protective factors, health services, and contextual influences. To advance understanding of the health needs of all LGBT individuals, the report finds that researchers need more data about the demographics of these populations, improved methods for collecting and analyzing data, and an increased participation of sexual and gender minorities in research. The Health of Lesbian, Gay, Bisexual, and Transgender People is a valuable resource for policymakers, federal agencies including the National Institute of Health (NIH), LGBT advocacy groups, clinicians, and service providers.

Lightning Strike Titan Books (US, CA)

Portrays the life and career of Arthur C. Clarke, including interviews with friends and colleagues and highlighting his contributions to science fiction

The Reefs of Taprobane; Underwater Adventures Around Ceylon Rosetta Books

Ginger-haired Tom and his twin sisters Jill and Mary are on holiday on the Scottish coast, in the fishing village where their best friend Andy, a fisher-boy, lives and works with his father. Their holiday plan is to take an exciting boat trip to a nearby island, and camp there, but once out at sea,

their plans are turned upside down and they find themselves shipwrecked and in the middle of a thrilling and mysterious adventure...

The Light of Other Days McGraw-Hill/Contemporary

Of Time and Stars The Worlds of Arthur C. Clarke Puffin The Deep Range Rosetta Books

The Fountains of Paradise Puffin

An intergalactic odyssey of love, ambition, and self-discovery. Orphaned as a boy, raised in the Czech countryside by his doting grandparents, Jakub Prochv^ozka has risen from small-time scientist to become the country's first astronaut. When a dangerous solo mission to Venus offers him both the chance at heroism he's dreamt of, and a way to atone for his father's sins as a Communist informer, he ventures boldly into the vast unknown. But in so doing, he leaves behind his devoted wife, Lenka, whose love, he realizes too late, he has sacrificed on the altar of his ambitions. Alone in Deep Space, Jakub discovers a possibly imaginary giant alien spider, who becomes his unlikely companion. Over philosophical conversations about the nature of love, life and death, and the deliciousness of bacon, the pair form an intense and emotional bond. Will it be enough to see Jakub through a clash with secret Russian rivals and return him safely to Earth for a second chance with Lenka? Rich with warmth and suspense and surprise, *Spaceman of Bohemia* is an exuberant delight from start to finish. Very seldom has a novel this profound taken readers on a journey of such boundless entertainment and sheer fun. "A frenetically imaginative first effort, booming with vitality and originality . . . Kalfar's voice is distinct enough to leave tread marks."-Jennifer Senior, *New York Times*

The Best of Arthur C. Clarke, 1956-1972 Voyager

Two of science fiction's most renowned writers join forces for a storytelling sensation. The historic

collaboration between Frederik Pohl and his fellow founding father of the genre, Arthur C. Clarke, is both a momentous literary event and a fittingly grand farewell from the late, great visionary author of 2001: A Space Odyssey. *The Last Theorem* is a story of one man's mathematical obsession, and a celebration of the human spirit and the scientific method. It is also a gripping intellectual thriller in which humanity, facing extermination from all-but-omnipotent aliens, the Grand Galactics, must overcome differences of politics and religion and come together . . . or perish. In 1637, the French mathematician Pierre de Fermat scrawled a note in the margin of a book about an enigmatic theorem: "I have discovered a truly marvelous proof of this proposition which this margin is too narrow to contain." He also neglected to record his proof elsewhere. Thus began a search for the Holy Grail of mathematics—a search that didn't end until 1994, when Andrew Wiles published a 150-page proof. But the proof was burdensome, overlong, and utilized mathematical techniques undreamed of in Fermat's time, and so it left many critics unsatisfied—including young Ranjit Subramanian, a Sri Lankan with a special gift for mathematics and a passion for the famous "Last Theorem." When Ranjit writes a three-page proof of the theorem that relies exclusively on knowledge available to Fermat, his achievement is hailed as a work of genius, bringing him fame and fortune. But it also brings him to the attention of the National Security Agency and a shadowy United Nations outfit called Pax per Fidem, or Peace Through Transparency, whose secretive workings belie its name. Suddenly Ranjit—together with his wife, Myra de Soyza, an expert in artificial intelligence, and their burgeoning family—finds himself swept up in world-shaking events, his genius for abstract mathematical thought put to uses that are both concrete and potentially deadly. Meanwhile, unbeknownst to anyone on Earth, an alien fleet is approaching the planet at a significant percentage of the speed of light. Their mission: to exterminate the dangerous species of primates known as homo sapiens.
