With over 500

and extensive
commentary, this book
is an exploration of
Bali's most most
stunning homes and
gardens. Bali has long
been a creative
inspiration for the
world—providing
exciting new design
ideas that are

emulated today in homes and hotels around the globe. The open to the elements bathroom with interior courtyard garden, the giant bamboo sofa with handwoven cushion covers, and the garden pavilion or bale with raised platform seating are all examples of concepts that originated on the island. All these—and much more—may be viewed in *Bali By Design*. *Bali By Design* provides coverage of the latest and best design work in Bali today. Featuring 25 stunning contemporary homes, it showcases the ideas of a new generation of talented international and Indonesian designers. Each of these extraordinary houses presents new solutions for age-old

challenges—illustrating how stylish modern lifestyles may be achieved through clever architecture and interior design. See the selection of artful furniture and furnishings in open, airy rooms, the inclusion of natural stone in shady courtyards and swimming pools, and the plethora of handcrafted surfaces, objects and artifacts. Many of these Balinese houses explore ways of reducing power consumption for a more sustainable, low-carbon future. Others present a modern urban version of the tropical Bali interior design style that has its roots in a traditional rural environment. All, however, combine modern technology with exotic local

materials—Balinese sandstone, volcanic rock, recycled ulin wood—for breezy indoor-outdoor living. With over 300 stunning photographs by Danish photographer Jacob Termansen and an insightful text by British author Kim Inglis, this book is a fitting testament to the originality and talent of Bali's design world.

Masalah konstruksi beton patut diperhatikan karena menyangkut keamanan bagi pemilik rumah. Banyak rumah atau gedung yang ambruk akibat konstruksi betonnya tidak benar. Akibatnya, penghuni rumah tersebut menjadi korban. Untuk itulah, pengetahuan tentang menghitung konstruksi beton ini harus diketahui semua kalangan, baik yang berkecimpung pada pekerjaan bangunan maupun tidak. Untuk kalangan yang tidak

berkecimpung dalam dunia bangunan, pengetahuan tentang konstruksi beton setidaknya akan membuat keyakinan pemilik rumah akan kekuatan bangunan yang dibangun oleh tukang. Setiap pemilik rumah disarankan tidak menyerahkan sepenuhnya perhitungan konstruksi beton pada tukang, tetapi ikut melakukan perhitungan. Ini disebabkan, rumah pada saat selesai dibangun akan ditempati pemiliknya, bukan oleh tukang.
