This text teaches Arabic handwriting in the form used by adult native speakers (riq'a) and compares it with naskh, the usual printed form. There are three sections covering basic letter shapes, combinations of letters, and an

additional extended writing section. *How to Read and Write It* McGraw-Hill Professor Abdur Rahim's eight-volume texts enable the student to acquire a knowledge of Arabic in the classical structural form. All of the books teach essential language skills through applied grammar. Each lesson is based on a conversation which illustrates distinctive language patterns. A variety of exercises helps the student to understand and master each of the patterns occurring in the lesson. The vocabulary ranges from classical and Quranic Arabic to words and expressions current in modern Arabic. This distinctive cross-linguistic examination of spelling examines the cognitive processes that underlie spelling and the process of learning how to spell. The chapters report and summarize recent research in English, German, Hebrew, and French. Framing the specific research on spelling are chapters that place spelling in broad theoretical perspectives provided by cognitive neuroscience, psycholinguistic,

and writing system-linguistic frameworks. Of special interest is the focus on two major interrelated issues: how spelling is acquired and the relationship between reading and spelling. An important dimension of the book is the interweaving of these basic questions about the nature of spelling with practical questions about how children learn to spell in classrooms. A motivating factor in this work was to demonstrate that spelling research has become a central challenging topic in the study of cognitive processes, rather than an isolated skill learned in school. It thus brings together schooling and learning issues with modern cognitive research in a unique way. testing, children writing strings of letters as a teacher pronounces words ever so

clearly. In parts of the United States it can also bring an image of specialized wizardry and school room competition, the "spelling bee." And for countless adults who confess with self-deprecation to being "terrible spellers," it is a reminder of a mysterious but minor affliction that the fates have visited on them. Beneath these popular images, spelling is a human literacy ability that reflects language and nonlanguage cognitive processes. This collection of papers presents a sample of contemporary research across different languages that addresses this ability. To understand spelling as an interesting scientific problem, there are several important perspectives. First, spelling is the use of conventionalized writing systems that encode languages. A

second asks how children learn to spell. Finally, from a literacy point of view, another asks the extent to which spelling and reading are related. In collecting some of the interesting research on spelling, the editors have adopted each of these perspectives. Many of the papers themselves reflect more than one perspective, and the reader will find important observations about orthographies, the relationship between spelling and reading, and issues of learning and teaching throughout the collection.

A riveting, comprehensive history of the Arab peoples and tribes that explores the role of language as a cultural touchstone This kaleidoscopic book covers almost 3,000 years of Arab history and shines a light on the footloose Arab peoples and tribes who conquered lands and disseminated their language and culture over vast distances. Tracing this process to the origins of the Arabic language, rather than the advent of Islam, Tim Mackintosh-Smith begins his narrative more than a thousand years before

Muhammad and focuses on how Arabic, both spoken and written, has functioned as a vital source of shared cultural identity over the millennia. Mackintosh-Smith reveals how linguistic developments--from pre-Islamic poetry to the growth of script, Muhammad's use of writing, and the later problems of printing Arabic--have helped and hindered the progress of Arab history, and investigates how, even in today's politically fractured post-Arab Spring environment, Arabic itself is still a source of unity and disunity.

Seven Pillars of Wisdom is a memoir of the soldier known as 'Lawrence of Arabia.' Lawrence is a fascinating and controversial figure and his talent as a vivid and imaginative writer shines through on every page of his masterpiece. 'Seven Pillars of Wisdom' written between 1919 and 1926, is an extraordinary tale of action, politics and adventure. The story describes heroism through instances of war by a man who not only shaped events but was molded by them. The genre of the book can be related to many broad subjects like

political history, military strategy, pathology or travel story. Lawrence, known as the defender of the empire, had found war in the Arab world and a long-lasting sideline to the War to End All Wars. This war produced more war during the time, in which, along with many other eminent writers, Lawrence was also involved. Seven Pillars of Wisdom provides a unique portrait of this extraordinary man and an insight into the birth of the Arab nation.
