McGraw-Hill Science, Engineering & Mathematics This reference manual provides a list of approximately 300 technical terms and phrases common to Environmental Engineering which non-English speakers often find difficult to understand in English. The manual provides the terms and phrases in alphabetical order, followed by a concise

English definition, then a translation of the term in Italian and, finally, an interpretation or translation of the term or phrase in Italian. Following the Italian translations section, the columns are reversed and reordered alphabetically in Italian with the English term and translation following the Italian term or phrase. The objective is to provide a technical term reference manual for

non-English speaking students and engineers who are familiar with Italian, but uncomfortable with English and to provide a similar reference for English speaking students and engineers working in an area of the world where the Italian language predominates. **Communicative English for Engineers and Professionals:** Momentum Press Take-Off: Technical

English for Engineering Teacher's Book Take-Off has been designed for non-native speakers of English who are studying Engineering (NVQ Level 2 and above). The aeronautical context is particularly aimed at technicians and engineers who are going on to work in the aeronautics industry. Take-Off is an ESP course for intermediate-level students. Unlike many ESP courses, it teaches

genuine transferable skills and is ideal for students who need to further their technical training in English. The focus is on skills development, using relevant contexts, with grammar taking a strong supporting role. Reading and listening development is dealt with in the context of understanding instructions and information in technical manuals. Students develop the

speaking skills of asking for and giving factual information, and the writing skills necessary to complete workplace documentation, such as accident reports and safety assessments. Take-Off uses a communicative methodology, with graded tasks that are careful scaffolded to involve and motivate the students, providing them with a clear sense of achievement.

The wide variety of texts and task types will appeal to a broad range of ages and nationalities. There are also comprehensive word lists and a glossary of terms for student reference. A bank of tests are provided online. Please contact us if you have purchased the book and would like access to these tests.
