An Analysis of Trends in Musical Notation Greenwood

Excerpt from *The Story of Notation* The roots of our modern musical system lie so deeply embedded in antiquity that it is impossible to trace the early history of its notation without reference to the Greek system from which it has sprung; and this involves the use of certain words, found in ancient treatises, which are as unfamiliar to modern musicians and Greek scholars as the technicalities of modern musical structure are to the general public. Those who may be alarmed at the lengthy and strange-looking words used by Greek musicians are recommended to omit Chapter II.; but at the same time it must not be forgotten that the inconvenience of these long words was the very thing that necessitated the invention of a musical notation by which sounds could be represented on paper, or parchment, or stone, in a small compass.
