Think inside the box!

It's amazing how many ways the experts at Wood magazine find to make the seemingly simple and always popular box durable, useful, and attractive. Just look at the appealing photos showcasing a bevy of bandsawn boxes, boxes with exquisite marquetry, lovely luminary boxes, and many more to inspire the woodworker. Here are the ABCs of box making, all replete with pictures and diagrams, and with breathtaking techniques aplenty. Transform functional side joints into highly decorative ones that also add strength; attach veneers to create three-

dimensional illusions; form imaginative boxes at the bandsaw from a single piece of wood; and use inlay, scrollsaw, beveling, and molding. Most enticing are the more than three dozen designs ranging from fanciful to utilitarian. A Selection of the F&W Book Club.

This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on

mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential

risks of tobacco products.

A visual story of the Lusitano horse adeptly told through the lens of Keron Psillas Oliveira. Keron tells her story of meeting, photographing, and ultimately living in the land of her beloved Lusitano horse.

Includes four essays - one at each chapter beginning, and an index of images providing the names of all the horses, riders if depicted, and the date and location the photographs were made. Lady Sylvia Loch, author of *The Royal Horse of Europe* and recipient of The Order of Merit from

Portugal, describes Keron's work in this way: Keron's photographs depict a horse that is unique in terms of how he touches us. In them we see a true artist at work, delivered in the form of photographs that not only captures the soul of the Lusitano horse, but also that of the photographer. An excerpt from the Introduction by Keron Psillas Oliveira: Photographically I felt that I began to show the Lusitano in their environment and in a way that transcends time, discipline, or breeding. In other words, despite my tremendous respect for the breeding programs of Senhors Braga, Freire, Veiga, Torres, and so many others, I want my photographs to represent the

eternal qualities that emanate from the horses. For these horses are noble and courageous. They are dignified, kind, trusting and engaging. And yet, there is something more, an ineffable quality found in the Lusitano that I have not found in other breeds. I believe that this horse is a direct channel to what we might call the spark of the Divine. Horses have been our partners for millennia. For centuries they have worked for us, carried us, and more recently, for those who seek a personal connection to them, they have uplifted us. They are our mirror. They show us our best and worst qualities in equal measure, without judgement. And they are always waiting for

us to join them in a higher consciousness, the consciousness of now that is also eternal.
