Discovering the Wishes of the Soul Simon and Schuster
Develop the Scaramucci mindset that drives entrepreneurial success Hopping over the Rabbit Hole chronicles the rise, fall, and resurgence of SkyBridge Capital founder Anthony Scaramucci, giving you a primer on how to thrive in an unpredictable business environment. The sheer number of American success stories has created a false impression that becoming an entrepreneur is a can't-miss endeavor—but nothing could be further from the truth. In the real world, an entrepreneur batting .150 goes directly to the Hall of Fame. Things happen. You make a bad hire, a bad strategic decision, or suffer the consequences of an unforeseen market crash. You can't control what happens to your business, but you can absolutely control how you react, and how you turn bumps in the road into ramps to the sky. Anthony Scaramucci has been there and done that, again and again, and has ultimately come out on top; in this book, he shares what he wishes he knew then. Your chances of becoming an overnight billionaire are approximately the same as your chances of being signed to the NBA. Success is hard work, and anxiety, and tiny hiccups that can turn into disaster with a single misstep. This book shows you how to use adversity to your ultimate advantage, and build the skills you need to respond effectively to the unexpected. Learn how to deal with unforeseen events Map a strategic backup plan, and then a backup-backup plan Train yourself to react in the most productive way Internalize the lessons learned by a leader in entrepreneurship For every 23-year-old billionaire who just created a new way to send a picture on a phone, there are countless others who have failed, and failed miserably. Hopping over the Rabbit Hole gives you the skills, insight, and mindset you need to be one of the winners.

"Ray Dalio's excellent study provides an innovative way of thinking about debt crises and the policy response." - Ben Bernanke "Ray Dalio's book is must reading for anyone who aspires to prevent or manage through the next financial crisis." - Larry Summers "A terrific piece of work from one of the world's top investors who has devoted his life to understanding markets and demonstrated that understanding by navigating the 2008 financial crisis well." - Hank Paulson "An outstanding history of financial crises, including the devastating crisis of 2008, with a very valuable framework for understanding why the engine of the financial system occasionally breaks down, and what types of policy actions by central banks and governments are necessary to resolve systemic financial crises. This should serve as a play book for future policy makers, with practical guidance about what to do and what not to do." - Tim Geithner "Dalio's approach, as in his investment management, is to synthesize information, and to

convert a sprawling and multi-faceted issue into a clear-cut process of cause and effect. Critically, he simplifies without oversimplifying." - Financial Times For the 10th anniversary of the 2008 financial crisis, one of the world's most successful investors, Ray Dalio, shares his unique template for how debt crises work and principles for dealing with them well. This template allowed his firm, Bridgewater Associates, to anticipate events and navigate them well while others struggled badly. As he explained in his #1 New York Times Bestseller, *Principles: Life & Work*, Dalio believes that most everything happens over and over again through time so that by studying their patterns one can understand the cause-effect relationships behind them and develop principles for dealing with them well. In this 3-part research series, he does that for big debt crises and shares his template in the hopes reducing the chances of big debt crises happening and helping them be better managed in the future. The template comes in three parts: 1) The Archetypal Big Debt Cycle (which explains the template), 2) 3 Detailed Cases (which examines in depth the 2008 financial crisis, the 1930's Great Depression, and the 1920's inflationary depression of Germany's Weimar Republic), and 3) Compendium of 48 Cases (which is a compendium of charts and brief descriptions of the worst debt crises of the last 100 years). Whether you're an investor, a policy maker, or are simply interested, the unconventional perspective of one of the few people who navigated the crises successfully, *Principles for Navigating Big Debt Crises* will help you understand the economy and markets in revealing new ways.

author of Getting Things Done Nearly all of us want to be more productive, but finding the method that works for you among the hundreds and hundreds of different tips, tricks and hacks can be a daunting prospect. After graduating college, Chris Bailey decided to dedicate a whole year to doing just that - experimenting with as many of the techniques as he could, and finding the things that work. Among the experiments that he undertook are: going several weeks on little to no sleep; cutting out caffeine and sugar; taking a daily siesta; living in total isolation for 10 days; stretching his workweek to 90 hours; and getting up at 5:30 every morning, all the while monitoring the impact of his experiments on the quality and quantity of his work. The results were often surprising! This book is the result of Chris's year-long journey, distilling the lessons he learned into a few core truths about how we get things done (or, indeed, don't). Among the many counterintuitive insights Chris discovered that had the biggest impact on his productivity were striving for imperfection; scheduling less time for important tasks; the 20 second rule to distract yourself from distractions; and the concept of productive procrastination. In this accessible and fun guide, Chris Bailey offers over 30 tried-and-tested best practices that will help everyone to accomplish more - and become more awesome.

An exploration of dreaming history, science, traditions, and practices from prehistory to today • Examines ancient dream traditions from around the world, shamanic dreaming, and the profound role of dreaming in Native American and African-American cultures • Investigates dream psychology and the neuroscience of the dreaming brain • Explores the practice of dream incubation, lucid dreaming, and telepathic dreaming with tips on remembering your dreams and working with them We have been dreaming for all of our 3 million or more years of

existence. Dreams provide an extraordinary way to process the day's events and uncover new perspectives. Many cultural creatives credit their world-changing creations to their dreams, and science now believes that dreams helped evolve the very process of thought itself. In this book, Stephen Larsen and Tom Verner examine dream traditions from around the world, beginning with the oldest records from ancient Egypt, India, Greece, and Australia and expanding to shamanic and indigenous societies. The authors investigate the psychology of dreaming, the neuroscience behind the dreaming brain, the Jungian perspective, and the intersections of yoga and modern dream research. They show how dreams and myth are related in the timeless world of the Archetypal Imagination and how dreams often reveal the wishes of the soul. They explore the practice of dream incubation, an age-old tradition for seeding the unconscious mind to help solve problems and gain deep insights. They examine the profound role that dreams have played in the survival of exploited and persecuted cultures, such as the Native Americans, African slaves, and the Jews during the Holocaust, and share inspirational dream stories from exceptional woman dreamers such as Hildegard von Bingen, Joan of Arc, and Harriet Tubman. Drawing on their more than 50 years' experience keeping dream journals, the authors offer techniques to help you remember your dreams and begin to work with them. They also explore the clairvoyant and telepathic dimensions of dreaming and the practices of lucid dreaming and shamanic dreaming. Revealing how the alchemical cauldron of dreaming can bring inspiration, healing, and discovery, the authors show how dreams unite us with each other and the past and future dreamers of our world.
