A Novel/ McGraw-Hill Education

In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial

services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalindex.

Fiscal multipliers are important tools for macroeconomic projections and policy design. In many countries, little is known about the size of multipliers, as data availability limits the scope for empirical research. For these countries, we propose a simple method—dubbed the “bucket approach”—to come up with reasonable multiplier estimates. The approach bunches countries into groups (or “buckets”) with similar multiplier values, based on their characteristics. It also takes into account the effect of some temporary factors, such as the state of the business cycle.

An “artfully presented [and] engaging” look at the insidious effects of financialization on our lives and politics by the author of *Treasure Islands* (The Boston Globe). How did the banking sector grow from a supporter of business to the biggest business in the world? Financial journalist Nicholas Shaxson takes us on a terrifying journey through the world economy, exposing tax havens, monopolists, megabanks, private equity firms, Eurobond traders, lobbyists, and a menagerie of scoundrels quietly financializing our entire society, hurting both business and individuals. Shaxson shows how we got here, telling the story of how finance re-engineered the global economic order in the last half-century, with the aim not of creating wealth but extracting it from the underlying economy. Under the twin gospels of “national competitiveness” and “shareholder value,” megabanks and financialized corporations have provoked a race to the bottom between states to provide the most subsidized environment for big business, encouraged a brain drain into finance, fostered instability and inequality, and turned a blind eye

to the spoils of organized crime. From Ireland to Iowa, he shows the insidious effects of financialization on our politics and on communities who were promised paradise but got poverty wages instead. We need a strong financial system—but when it grows too big it becomes a monster. The Finance Curse is the explosive story of how finance got a stranglehold on society, and reveals how we might release ourselves from its grasp. Revised with new chapters “[Discusses] corrupt financiers in London and New York City, geographically obscure tax havens, the bizarre realm of wealth managers in South Dakota, a ravaged newspaper in New Jersey, and a shattered farm economy in Iowa . . . A vivid demonstration of how corruption and greed have become the main organizing principles in the finance industry.” —Kirkus Reviews

"Lewis shows again why he is the leading journalist of his generation."—Kyle Smith, *Forbes* The tsunami of cheap credit that rolled across the planet between 2002 and 2008 was more than a simple financial phenomenon: it was temptation, offering entire societies the chance to reveal aspects of their characters they could not normally afford to indulge. Icelanders wanted to stop fishing and become investment bankers. The Greeks wanted to turn their country into a pinata stuffed with cash and allow as many citizens as possible to take a whack at it. The Germans wanted to be even more German; the Irish wanted to stop being Irish. Michael Lewis's investigation of bubbles beyond our shores is so brilliantly, sadly hilarious that it leads the American reader to a comfortable complacency: oh, those foolish foreigners. But when he turns a merciless eye on California and Washington, DC, we see that the narrative is a trap baited with humor, and we understand the reckoning that awaits the greatest and greediest of debtor nations.

LONGLISTED FOR THE FINANCIAL TIMES & MCKINSEY BUSINESS BOOK OF THE YEAR In this compelling story of lies, greed and tarnished idealism, two Wall Street Journal reporters investigate a man who Bill Gates, Western governments, and other investors entrusted with billions of dollars to make profits and end poverty, but who now stands accused of masterminding one of the biggest, most brazen financial frauds ever. Arif Naqvi was charismatic, inspiring, and self-made—all the qualities of a successful business leader. The founder of Abraaj, a Dubai-based private-equity firm, Naqvi was the Key Man to the global elite searching for impact investments to make money and do good. He persuaded politicians he could help stabilize the Middle East after 9/11 by providing jobs and guided executives to opportunities in cities they struggled to find on the map. Bill Gates helped him start a \$1 billion fund to improve healthcare in poor countries and the UN and Interpol appointed him to boards. As Pope Francis blessed a move to harness capitalism for the good of the poor, Naqvi won the support of Obama's administration and investors, who compared him to Tom Cruise in *Mission: Impossible*. In 2018, Simon Clark and Will Louch were contacted by an anonymous whistleblower who said Naqvi had swindled investors out of hundreds of millions of dollars and offered bribes to sustain his billionaire lifestyle. Digging into the claims, Clark and Louch uncovered hundreds of documents and

exposed the wrongdoing. In April 2019—months after their exposé broke—Naqvi was arrested on charges of fraud and racketeering, and faces up to 291 years in jail. Populated by a cast of larger-than-life characters and moving across Asia, Africa, Europe and America, *The Key Man* is the story of how the global elite was duped by a capitalist fairytale. Clark and Louch shine a light on efforts to clean up global capital flows even as opaque private equity firms amass trillions of dollars and offshore tax havens cast a veil of secrecy which prevents regulators, investors and citizens from understanding what's really going on in the finance industry.
