Making Sense of Consumer Data in a Digital World Routledge

This collection of classic and contemporary articles provides context for the study of advertising by exploring the historical,

economic, and ideological factors that spawned the development of a consumer culture. It begins with articles that take an institutional and historical perspective to provide background for approaching the social and ethical concerns that evolve around advertising. Subsequent sections then address the legal and economic consequences of life in a material culture; the regulation of advertising in a culture that weighs free speech against the needs

of society; and the ethics of promoting materialism to consumers. The concluding section includes links to a variety of resources such as trade association codes of ethics, standards and guidelines for particular types of advertising, and information about self-regulatory organizations.

This book is a practical, pragmatic “how to” book designed for hi-tech marketing operations, regional, and corporate marketing leaders at every level. This unique book takes you step-by-step through the disciplined, yet practical, process of architecting truly integrated marketing communications plans that work. In it, you will find a prescription for building a successful, repeatable campaign development process, including the necessary templates and helpful, practical techniques. This book is your guide that will show you how you can optimize your marketing efforts and achieve an even greater return on your marketing investment. While many of us will recognize a good, well-thought-out marketing campaign when we see one, the single, basic truth about world-class marketing campaign development is that it is easy to say, but hard to do. It is hard to do because we all like to take short-

cuts. I hear the lament all too often: “I’m over-worked don’t have the time to think strategically” or “Planning is overrated. I just need to get these projects done.” As a result, we take short-cuts like “ready, fire, aim.” Lack of planning is the slippery slope that leads to wasteful marketing. Then one day we get the call from the corner office to come and explain why our marketing efforts did not produce the desired results. Luckily, architecting world-class campaigns is achievable for any marketing team. Successful marketing requires following a disciplined, systematic approach to working cross-functionally and cross-regionally in order to prioritize marketing objectives, design a customer-engaging go-to-market strategy, and execute the plan.
