"Building Materials for the Environmentally Hypersensitive was prepared to help individuals and builders select building materials that have minimal negative effects on the health of environmentally hypersensitive occupants. The materials included are those typically used in residential construction in cold climates. Two kinds of information were used in evaluating the materials: 1) known or published information about the products; and 2) the experiences of hypersensitive individuals

with these materials. The responses of hypersensitive individuals to the building materials were used as an indicator of how these materials affect the environmentally hypersensitive"--
