This book explores how Chinese students abroad may suffer stress, and how they conceptualize and adapt to stress in the American higher education environment. To do so, it adopts a mixed methods design: the sequential explanatory design, which is characterized by the collection and analysis

of quantitative data followed by the collection and analysis of qualitative data. To date, no empirical research has focused solely upon understanding the stress and coping processes of Chinese students in the United States. This book addresses that gap, enriching the body of literature on international students' adaptation process in foreign countries.

LL.M. Roadmap

University of Chicago Press

Path to the Dream Life is about the struggle of Imma, a young man living in Nigeria, West Africa, to rise above his circumstances and make good in the world. The changed lives and faith convictions of the friends he encounters along the way confront him with choices - choices that place him on a collision course with everyone and everything that matter to him. As Imma struggles with those choices, his concept of a dream life and the path thereto are tested. The broken road meanders to The Life, Christ, and to Gift, the love of his life that

nearly wasn't. A romance ensues that hits its own cross-roads and forces them to linger over the choice of the one - until the moments both see beyond themselves and progress in a relationship that will mirror and beckon the true Dream Life in more ways than one. Imma captures it in a poem he recites to Gift: '... But in the darkness of my doubts You lifted the lamp of love And I saw in your face The road that I should take'.

Tracking international students in higher education Camynta Baezie

This book is about international students from Asia studying at

American universities in the age of globalization. It explores significant questions, such as: Why do they want to study in America? How do they make their college choices? To what extent do they integrate with domestic students, and what are the barriers for intergroup friendship? How do faculty and administrators at American institutions respond to changing campus and classroom dynamics with a growing student body from Asia? Have we provided them with the skills they need to succeed professionally? As they are preparing to become the educational, managerial and entrepreneurial elites

of the world, do Asian international students plan to stay in the U.S. or return to their home country? Asian students constitute over 70 percent of all international students. Almost every major American university now faces unprecedented enrollment growth from Asian students. However, American universities rarely consider if they truly understand the experiences and needs of these students. This book argues that American universities need to learn about their Asian international students to be able to learn from them. It challenges the traditional framework that emphasizes adjustment and adaptation on the part of international

students. It argues for the urgency to shift from this framework to the one calling for proactive institutional efforts to bring about successful experiences of international students.
