### **The Indian Woman**

Bloomsbury Publishing  
In view of Prabhat Patnaik's role in advocating progressive reforms and ideas in the global economy, this volume, in his honour, questions conventional thinking in mainstream economics and policy. This book brings together diverse scholarship on various aspects of economic development that underscore the importance of tackling dominant and contemporary issues concerning the national and global economy. Divided into five distinct themes—economic growth, engaging with globalisation, poverty and inequality, macroeconomic issues, political economy and developmental aspects—the essays outline significantly contrasting methodologies that are used to deal with issues of vital importance. Topical and up-to-date, the volume challenges the laissez faire philosophy and highlights the weaknesses of a free market as well as its inability to deal with the current issues.

Interest in Financial Services Marketing has grown hugely over the last few decades, particularly since the financial crisis, which scarred the industry and its relationship with customers. It reflects the importance of the financial services industry to the economies of every nation and the realisation that the consumption and marketing of financial services differs from that of tangible goods and indeed many other

intangible services. This book is therefore a timely and much needed comprehensive compendium that reflects the development and maturation of the research domain, and pulls together, in a single volume, the current state of thinking and debate. The events associated with the financial crisis have highlighted that there is a need for banks and other financial institutions to understand how to rebuild trust and confidence, improve relationships and derive value from the marketing process. Edited by an international team of experts, this book will provide the latest thinking on how to manage such challenges and will be vital reading for students and lecturers in financial

services marketing, policy makers and practitioners. *Wage Labour in Developing Agriculture* Atlantic Publishers & Dist A result of more than four decades of teaching experience, this book deals with the problems of economic growth, development and eradication of poverty and unemployment. The book also includes an analytical study of important issues of environment and sustainable development. The book not only explains the models and theories of economic growth but also critically evaluates their relevance to developing countries. A major highlight of discussion in the context is the exploration of the widely accepted Amartya Sen's Capability Approach to development.
