It's 1986. Ronald Reagan is in the White House, Molly Ringwald is on the cover of Time and 29-year-old Michael Gregoretti is a struggling, underpaid copywriter at a big New York ad agency. He'd rather be writing plays; instead, he's writing awful commercials for a moisturizer formulated to conquer that dire, life-threatening condition: handruff. Michael reluctantly accepts an assignment on a brand-new (and very secret) product - an aerosol butter - hoping it will lead to the kind of work that will land him a better job at another agency. But there's a catch: working on this new account will also mean working for the rigid, compulsive and quite possibly insane Gwen Hammond, who thinks that Michael, with his off-the-wall ideas and unconventional campaigns, is just too much of a rebel to work with such a conservative client. To further complicate life, Michael meets and falls for Craig Connolly, an absolute dreamboat from the South with a voice like FM radio and a face to match. Craig claims he'd like to be in a relationship and Michael wants to believe it. The problem is, Craig is already married - to his job. Michael survives it all with the help of his two best friends: Irene Lucca, a witty book editor with a flair for vintage clothing and an eye for the art director Michael works with, and Anthony DeLorenzo, Michael's wise (and wisecracking) roommate and staunchest supporter. By the time *A FOOL AMONG FOOLS* ends, Michael has battled stuffy clients and stifling supervisors, written and produced what just might be the worst commercials in the history of advertising, found and lost love, and managed to keep himself - and the reader - laughing along the way.

This book examines the various interfacial reactions that take place when glass seals come into contact with components of SOFCs in reducing and oxidizing conditions. In developing an understanding of the structure and function of SOFCs, interfacial compatibility is an imperative criterion. This book addresses the technical challenges of developing sealants to avoid leakage losses at high operating temperatures, which are profoundly impactful to the efficiency of the fuel cell. This resource is important for anyone working with or studying fuel cell design and development, and is a pivotal source of cutting-edge information for research groups actively engaged in developing hermetic and stable seals which show minimum interfacial chemical reaction with interconnect and electrolyte.

The processes of democratization and regionalization in South America ran parallel to one another between 1985 and 1991. However, the nature of this relationship is by no means clear. This book explores the diplomatic history of the formation of Mercosur and analyzes the precise place of democracy in the process. At the methodological level, a combination of hitherto unexamined documents and extensive interview material makes for a novel oral history approach to diplomatic studies. At the theoretical level, a melding of cognitive approaches to foreign policy making and realist theory of international relations provides a nuanced but systematic explanation of events.

The aim of this book is to examine the transformation of the geography of China in the years since

the start of China's policy of reform and opening-up in 1978, as seen through the eyes of Chinese geographers. Throughout that period, Chinese geographers have studied these environmental, economic, political and cultural processes closely, drawing on sources that are far from easy to access, and have published their results in Chinese. Much of this research has underpinned the Chinese government's assessment of policies and the policy choices at different levels, yet it is not well known outside of China. This volume deals with aspects of the socio-economic geography of China's transformation including its changing relations with the rest of the world, although it also deals with the impact of China's development path on the country's ecological systems. Each chapter deals with aggregate trends and specific cases to show the ways in which the particular characteristics of China's economic and social order (economic organization, political system and cultural model and values) have shaped and are shaped by its geography.

More than twenty years have passed since Walter Auffenberg's monumental *The Behavioral Ecology of the Komodo Monitor*. In the intervening years the populations of Komodo dragons—native only to a handful of islands in southeast Indonesia—have dwindled, sparking intensive conservation efforts. During the last two decades new information about these formidable predators has emerged, and the most important findings are clearly presented here. A memoir from Walter Auffenberg and his son Kurt is followed by the latest information on Komodo dragon biology, ecology, population distribution, and behavior. The second part of the book is dedicated to step-by-step management and conservation techniques, both for wild and captive dragons. This successful model is a useful template for the conservation of other endangered species as well, for, as Kurt and Walter Auffenberg note, "The species may well indeed survive in the wild for generations to come while countless other organisms are lost."

This book discusses the role of public-private partnerships (PPPs) in global transportation infrastructure. Seen as a way to provide vital services in an era of shrinking government budgets, public-private partnerships have become an increasingly important part of travel infrastructure worldwide. This book describes and analyzes the structure of various models of PPPs in various countries, evaluating their effectiveness, and drawing policy implications for future use. Written by leading international researchers and practitioners in the transportation field, each chapter is a case study on the adoption, implementation, and outcome of transportation services in different municipalities. Taken together, these diverse case studies provide an integrated framework for evaluating and using PPPs. Providing rigorous empirical analysis of PPPs in transportation, this volume will be of interest to researchers in public administration, political science, and economics as well as practitioners and policymakers involved in establishing and monitoring PPPs in transportation.
