SAGE
Online education has become a major component of higher

education worldwide. In mathematics and statistics courses, there exists a number of challenges that are unique to the teaching and learning of mathematics and statistics in an online environment. These challenges are deeply connected to already existing difficulties related to math anxiety, conceptual understanding of mathematical ideas, communicating

mathematically, and the appropriate use of technology. Teaching and Learning Mathematics Online bridges these issues by presenting meaningful and practical solutions for teaching mathematics and statistics online. It focuses on the problems observed by mathematics instructors currently working in the field who strive to hone their craft and share best practices with our professional

<p>community. The book provides a set of standard practices, improving the quality of online teaching and the learning of mathematics. Instructors will benefit from learning new techniques and approaches to delivering content. make it an ideal revision book for all students wanting to reinforce their learning: numerous tests summarised key exam points hundreds of revision questions with answers VCE Specialist Mathematics microtextbook sdotcom This textbook provides an introduction to continuum mechanics, which models the behaviour of elastic solids and viscous fluids. It assumes only a working

knowledge of classical mechanics, linear algebra and multivariable calculus. Every chapter contains exercises, with detailed solutions. The book is aimed at undergraduate students from scientific disciplines. Mathematics students will find examples of applications involving techniques from different branches of mathematics, such as geometry and differential equations. Physics

students will find a gentle introduction to the notions of stress and material laws. Engineering students will find examples of classic exactly-solvable problems. The emphasis is on the thorough derivation of exact solutions, but estimates of the relevant orders of magnitude are provided. The Mathematical Association of America SAGE Course Companions are an exciting new

series offering students an insider's guide into how to make the most of their undergraduate courses and extend their understanding of key concepts covered in their course. Social Psychology provides student readers with essential help with all aspects of their first course in social psychology, including advice on revising for exams, preparing and writing course

assessment materials, and enhancing and progressing their knowledge and skills in line with course requirements on a social psychology course. Designed to augment, rather than replace, existing textbooks for the course, it provides: - Helpful summaries of the course curriculum to aid lecture notes, seminars and written assignments - Key summaries of

the approach taken by the main social psychology textbooks - Guidance on the essential study skills required - Help with developing critical thinking - Route-maps to aid the development of wider learning above and beyond textbooks - Pointers to success in course exams - A tutor's-eye view of what course examiners are looking for - An insider's view of what key course

concepts are really all about SAGE Course Companions are much more than revision guides for undergraduates; they are an essential tool to taking your course learning and understanding to new levels and in new directions that are the key to success in undergraduate courses.  Chandresh Agrawal Can two IRL enemies find their happily ever after online? Stella Greene and Wesley Clarke

are Gene Connolly Memorial High School's biggest rivals. While the two have been battling it out for top student, it's a race to the bottom when it comes to snide comments and pulling the dirtiest prank. For years, Stella and Wes have been the villain in each other's story, and now it's all-out war. And there is no bigger battle than the one for valedictorian, and more specifically,

the coveted valedictorian scholarship. But Stella and Wes have more in common than they think. Both are huge fans of Warship Seven, a popular sci-fi TV drama with a dedicated online following, and the two start chatting under aliases--without a clue that their rival is just beyond

the screen. They realize that they're both attending SciCon this year, so they plan to dress in their best cosplay and finally meet IRL. While tensions at school are rising and SciCon inches closer and closer, the enemy lines between Stella and Wes blur when a class project

shows them they might understand one another better than anyone else--and not just in cosplay. From the author of The Last Confession of Autumn Casterly comes a heartfelt story about rivalry, friendships, and defying preconceived notions--even the ones about yourself.
