The (Viking) Portable Machiavelli Schocken

Philosopher, sociologist and urban theorist, Henri Lefebvre is one of the great social theorists of the twentieth century. This accessible and innovative introduction to the work of Lefebvre combines biography and theory in a critical assessment of the dynamics of Lefebvre's character, thought, and times. Exploring key Lefebvrian concepts, Andy Merrifield demonstrates the evolution of Lefebvre's philosophy, while stressing the way his long and adventurous life of ideas and political engagement live on as an enduring and inspiring interrelated whole.

Antifragile is a standalone book in Nassim Nicholas Taleb's landmark Incerto series, an investigation of opacity, luck, uncertainty, probability, human error, risk, and decision-making in a world we don't understand. The other books in the series are Fooled by Randomness, The Black Swan, Skin in the Game, and The Bed of Procrustes. Nassim Nicholas Taleb, the bestselling author of The Black Swan and one of the foremost thinkers of our

time, reveals how to thrive in an uncertain world. Just as human bones get stronger when subjected to stress and tension, and rumors or riots intensify when someone tries to repress them, many things in life benefit from stress, disorder, volatility, and turmoil. What Taleb has identified and calls “antifragile” is that category of things that not only gain from chaos but need it in order to survive and flourish. In *The Black Swan*, Taleb showed us that highly improbable and unpredictable events underlie almost everything about our world. In *Antifragile*, Taleb stands uncertainty on its head, making it desirable, even necessary, and proposes that things be built in an antifragile manner. The antifragile is beyond the resilient or robust. The resilient resists shocks and stays the same; the antifragile gets better and better. Furthermore, the antifragile is immune to prediction errors and protected from adverse events. Why is the city-state better than the nation-state, why is debt bad for you, and why is what we call “efficient” not efficient at all? Why do government responses and social policies protect the strong and hurt the weak? Why should you write your resignation letter before even starting on the job? How did the sinking of the Titanic save lives? The book spans innovation by trial and error, life decisions, politics, urban planning, war, personal finance, economic systems, and medicine. And throughout, in addition to the street wisdom of Fat Tony of Brooklyn, the voices and recipes of ancient wisdom, from Roman, Greek, Semitic, and medieval sources, are loud and clear. *Antifragile* is a blueprint for living in a Black Swan world. Erudite, witty, and iconoclastic, Taleb’s message is revolutionary: The antifragile, and only the antifragile, will make it. Praise for *Antifragile* “Ambitious and thought-provoking . . . highly

entertaining.”—*The Economist* “A bold book explaining how and why we should embrace uncertainty, randomness, and error . . . It may just change our lives.”—*Newsweek*

Rogues, published in France under the title *Voyous*, comprises two major lectures that Derrida delivered in 2002 investigating the foundations of the sovereignty of the nation-state. The term “État voyou” is the French equivalent of “rogue state,” and it is this outlaw designation of certain countries by the leading global powers that Derrida rigorously and exhaustively examines. Derrida examines the history of the concept of sovereignty, engaging with the work of Bodin, Hobbes, Rousseau, Schmitt, and others. Against this background, he delineates his understanding of “democracy to come,” which he distinguishes clearly from any kind of regulating ideal or teleological horizon. The idea that democracy will always remain in the future is not a temporal notion. Rather, the phrase would name the coming of the unforeseeable other, the structure of an event beyond calculation and program. Derrida thus aligns this understanding of democracy with the logic he has worked out elsewhere. But it is not just political philosophy that is brought under deconstructive scrutiny here: Derrida provides unflinching and hard-hitting assessments of current political realities, and these essays are

highly engaged with events of the post-9/11 world.

Since the 1990s, critics and curators have broadly accepted the notion that participatory art is the ultimate political art: that by encouraging an audience to take part an artist can promote new emancipatory social relations. Around the world, the champions of this form of expression are numerous, ranging from art historians such as Grant Kester, curators such as Nicolas Bourriaud and Nato Thompson, to performance theorists such as Shannon Jackson. *Artificial Hells* is the first historical and theoretical overview of socially engaged participatory art, known in the US as "social practice." Claire Bishop follows the trajectory of twentieth-century art and examines key moments in the development of a participatory aesthetic. This itinerary takes in Futurism and Dada; the Situationist International; Happenings in Eastern Europe, Argentina and Paris; the 1970s Community Arts Movement; and the Artists Placement Group. It concludes with a discussion of long-term educational projects by contemporary artists such as Thomas Hirschhorn, Tania Bruguera, Paweł Althamer and Paul Chan. Since her controversial essay in *Artforum* in 2006, Claire Bishop has been one of the few to challenge the political and aesthetic ambitions of participatory art. In *Artificial Hells*, she not only scrutinizes the emancipatory claims made for these projects, but also provides an alternative to the ethical (rather than artistic) criteria invited by such artworks. *Artificial Hells* calls for a less prescriptive approach to art and politics, and for more compelling, troubling and bolder forms of participatory art and criticism.

A short, sharp guide to tackling life's biggest challenges: understanding ourselves and making the right choices. Every day offers moments of decision, from what to eat for lunch to how to settle a dispute with a colleague. Still larger questions loom: How can I motivate my team? How can I work more efficiently? What is the long tail anyway? Whether you're a newly minted MBA, a chronic second-guesser, or just someone eager for a new vantage point, *The Decision Book* presents fifty models for better structuring, and subsequently understanding, life's steady challenges. Interactive and thought-provoking, this illustrated workbook offers succinct summaries of popular strategies, including the Rubber Band Model for dilemmas with many directions, the Personal Performance Model to test whether to change jobs, and the Black Swan Model to illustrate why experience doesn't guarantee wisdom. Packed with familiar tools like the Pareto Principle, the Prisoner's Dilemma, and an unusual exercise inspired by Warren Buffet, *The Decision Book* is the ideal reference for flexible thinkers.

At a time when we are reexamining our values, reeling from the pace of change, witnessing the clash between good instincts and "pragmatism," dealing with the angst of a new millennium, Neil Postman, one of our most distinguished observers of contemporary society, provides for us a source of guidance and inspiration. In *Building a Bridge to the Eighteenth Century* he revisits the Enlightenment, that great flowering of ideas that provided a humane direction for the future -- ideas that formed our nation and that we would do well to embrace anew. He turns our attention to Goethe, Voltaire, Rousseau, Diderot, Kant,

Edward Gibbon, Adam Smith, Thomas Paine, Jefferson, and Franklin, and to their then-radical thinking about inductive science, religious and political freedom, popular education, rational commerce, the nation-state, progress, and happiness. Postman calls for a future connected to traditions that provide sane authority and meaningful purpose -- as opposed to an overreliance on technology and an increasing disregard for the lessons of history. And he argues passionately for specific new guidelines in the education of our children, with renewed emphasis on developing the intellect as successfully as we are developing a computer-driven world. Witty, provocative, and brilliantly reasoned, *Building a Bridge to the Eighteenth Century* is Neil Postman's most radical, and most commonsensical, book yet.

Published Essays, 1966-1985 Manchester University Press
New edition of a classic work on the history of propaganda. Topical new chapters on the 1991 Gulf War, September 11 and terrorism. An ideal textbook for all international courses covering media and communication studies. Considers the history of propaganda and how it has become increasingly pervasive due to access to ever-complex and versatile media. Written in an accessible style and format, this book has proven its appeal to the general reader as the public becomes more and more cynical of the manipulations of the political sphere.

This international bestseller, which foreshadowed a market crash, explains why it could happen again if we don't act now. Fractal geometry is the mathematics of roughness: how to reduce the outline of a jagged leaf or static in a computer connection to a

few simple mathematical properties. With his fractal tools, Mandelbrot has got to the bottom of how financial markets really work. He finds they have a shifting sense of time and wild behaviour that makes them volatile, dangerous - and beautiful. In his models, the complex gyrations of the FTSE 100 and exchange rates can be reduced to straightforward formulae that yield a much more accurate description of the risks involved.

Imperialism as we knew it may be no more, but Empire is alive and well. It is, as Michael Hardt and Antonio Negri demonstrate in this bold work, the new political order of globalization. Their book shows how this emerging Empire is fundamentally different from the imperialism of European dominance and capitalist expansion in previous eras. Rather, today's Empire draws on elements of U.S. constitutionalism, with its tradition of hybrid identities and expanding frontiers. More than analysis, *Empire* is also an unabashedly utopian work of political philosophy.

"Published Essays, 1966-1985 includes some of the most trenchant and compelling of Eric Voegelin's work and is an indispensable companion to his *Anamnesis* and to the fourth and fifth volumes of *Order and History*, which were prepared for

publication during the same period, the last two decades of the author's life. These essays are quintessential Voegelin. Voegelin was an essayist at heart, and the pieces gathered here bear on almost every aspect of his philosophy. They range in subject matter and tone from a scalding critique of the German intellectual establishment during the Hitler period and a satire upon contemporary vulgar culture to magisterial analyses of immortality, reason, and consciousness. The essays also embrace Voegelin's elaboration of the theory of equivalent experiences and symbolizations over human history and his meditation upon the lure of extremes in the rebellion of magic against reason in various modernist attacks on culture. The scope of Voegelin's work is magnified by the collection's final essay, a touching and profound deathbed reflection on God". --

Looking At Philosophy: The Unbearable Heaviness of Philosophy Made Lighter Wildside Press LLC

A "marvelous history"* of medieval Europe, from the bubonic plague and the Papal Schism to the Hundred Years' War, by the Pulitzer Prize-winning author of *The Guns of August* *Lawrence

Wright, author of *The End of October*, in *The Wall Street Journal* The fourteenth century reflects two contradictory images: on the one hand, a glittering age of crusades, cathedrals, and chivalry; on the other, a world plunged into chaos and spiritual agony. In this revelatory work, Barbara W. Tuchman examines not only the great rhythms of history but the grain and texture of domestic life: what childhood was like; what marriage meant; how money, taxes, and war dominated the lives of serf, noble, and clergy alike. Granting her subjects their loyalties, treacheries, and guilty passions, Tuchman re-creates the lives of proud cardinals, university scholars, grocers and clerks, saints and mystics, lawyers and mercenaries, and, dominating all, the knight—in all his valor and "furious follies," a "terrible worm in an iron cocoon." Praise for *A Distant Mirror* "Beautifully written, careful and thorough in its scholarship . . . What Ms. Tuchman does superbly is to tell how it was. . . . No one has ever done this better."—*The New York Review of Books* "A beautiful, extraordinary book . . . Tuchman at the top of her powers . . . She has done nothing finer."—*The Wall Street Journal* "Wise, witty, and wonderful . . . a great book, in a great historical tradition."—*Commentary*
