"In the US, in Europe, and throughout the world, globalization, in tandem with technological progress, has left a massive number of people behind, feeling dispossessed, disenfranchised, and angry. Leading the charge of "hyperglobalization" during the second half of the last century, and enforcing the Western framework of austerity in the developing world has been the International Monetary Fund. Along with the World Bank and WTO, many consider the IMF one of the most consequential institutions to have pushed the world economy blindly towards excessive globalization, while not adequately considering its powerful negative consequences. In October 2017, however, the IMF convened with some of the world's most celebrated economists and experts on trade and globalization to have an honest discussion on the most pressing concerns the world faces today as a result of globalization, and how to address the extensive challenges it has created. Edited by chief economist Maurice Obstfeld and senior economist Luis Catao of the IMF, the book brings together a team of respected senior economists with the most promising younger scholars to address five major themes: how globalization affects economic growth and social welfare; potential political implications of an honest discussion of globalization, and that "free trade may not be politically viable"; free trade's role in global inequality; how workers adjust or not when they're dislocated by globalization; and how trade policy influences the way countries develop their economies and societies. The book could represent a historic milestone at which the world's top economists and policymakers have an unprecedented, honest debate about the real costs and consequences of globalization"--

[Study Guide to Accompany Krugman/Obstfeld International Economics, Theory and Policy, Fourth Edition](#) Addison-Wesley Presents a new research program that is transforming the study of international trade. Until a few years ago, models of international trade did not recognize the heterogeneity of firms and exporters, and could not provide good explanations of international production networks. Now such models exist and are explored in this volume.

Foundations of International Macroeconomics is an innovative text that offers the first integrative modern treatment of the core issues in open economy macroeconomics and finance. With its clear and accessible style, it is suitable for first-year graduate macroeconomics courses as well as graduate courses in international macroeconomics and finance. Each chapter incorporates an extensive and eclectic array of empirical evidence. For the beginning student, these examples provide motivation and aid in understanding the practical value of the economic models developed. For advanced researchers, they highlight key insights and conundrums in the field. Topic coverage includes intertemporal consumption and investment theory, government spending and budget deficits, finance theory and asset pricing, the implications of (and problems inherent in) international capital market integration, growth, inflation and seignorage, policy credibility, real and nominal exchange rate determination, and many interesting special topics such as speculative attacks, target exchange rate zones, and parallels

between immigration and capital mobility. Most main results are derived both for the small country and world economy cases. The first seven chapters cover models of the real economy, while the final three chapters incorporate the economy's monetary side, including an innovative approach to bridging the usual chasm between real and monetary models.

Cultural Diversity Versus US Cultural Imperialism: The Film Industry Pearson College Division

Essay from the year 2006 in the subject Economics - International Economic Relations, grade: 1,3, University of Leipzig, 5 entries in the bibliography, language: English, abstract: Films can be seen as cultural products. To understand international trade of these cultural products it is necessary to reveal how industries and markets operate and evolve, furthermore analyzing the influence of industry structure, government policies and global economic conditions. International trade allows expanding markets to become certainly larger than the domestic one, as a result the consumer has the possibility to choose within a greater variety of goods and to take advantage from lower prices. Films are part of each culture. But still, films are products, first of all produced and sold in intention to make profits. What are films? Why do we speak from US Cultural imperialism? What can be regarded as cultural diversity? Which debates and agreements should be focused on when analyzing international trade of films? And finally, why do the U.S. dominate that industry? Which economic factors play a major role in this case? How sustainable is the U.S.? That sounds interesting? These and more questions will be answered within that economic essay.
