Survive long enough, and strangeness becomes cliché. Virgil Copeland, Randall Panwar, and Gabrielle Villanti are all brilliant young biotechnologists, working together on an artificial life-form affectionately known as ζ LOVs, ζ an acronym for Limit Of Vision, because in size LOVs are just at the boundary of what the human eye can easily see. LOVs contain bioengineered human neurons. They enhance brain function when implanted in test animals. Experimentation on humans is, of course, highly illegal. But it's the nature of brilliant and ambitious young minds to ignore the rules. Believing the LOVs to be perfectly safe, Virgil, Panwar, and Gabrielle experiment on themselves, using implanted LOVs to enhance their own cognitive abilities. But there is a limit of vision, too, when we try to foresee the consequences of technology; especially of a living, thinking technology that can evolve into new forms in a matter of hours. When the experiment goes terribly wrong, the consequences are bizarre and unforeseeable. Virgil finds himself on the run, riding the whirlwind of a runaway biotechnology that could lead to the next phase of human evolution.

From the Arthur C. Clarke Award-winning Adrian Tchaikovsky, *The Doors of Eden* is an extraordinary feat of the imagination and a page-turning adventure about parallel universes and the monsters that they hide. They thought we were safe. They were wrong. Four years ago, two girls went looking for monsters on Bodmin Moor. Only one came back. Lee thought she'd lost Mal, but now she's miraculously returned. But what happened that day on the moors? And where has she been all this time? Mal's reappearance hasn't gone unnoticed by MI5 officers either, and Lee isn't the only one with questions. Julian Sabreur is investigating an attack on top physicist Kay Amal Khan. This leads Julian to clash with agents of an unknown power - and they may or may not be human. Now these cracks are widening, revealing extraordinary creatures. And as the doors crash open, anything could come through.

Children of Ruin Dial

Humanity clings to life on a dying Earth in an epic, far-future science fiction novel from an award-winning author. The sun is bloated, diseased, dying perhaps. Beneath its baneful light, Shadrapar, last of all cities, harbours fewer than 100,000 human souls. Built on the ruins of countless civilisations, Shadrapar is a museum, a midden, an asylum, a prison on a world that is ever more alien to humanity. Bearing witness to the desperate struggle for existence between life old and new is Stefan Advani: rebel, outlaw, prisoner, survivor. This is his testament, an account of the journey that took him into the blazing desolation of the western deserts; that transported him east down the river and imprisoned him in the verdant hell of the jungle's darkest heart; that led him deep into the labyrinths and caverns of the underworld. He will meet with monsters, madman, mutants. The question is, which one of them will inherit this Earth?

On the alien, sunless planet they call Eden, the 532 members of the Family shelter beneath the light and warmth of the Forest's lantern trees. Beyond the Forest lie the mountains of the Snowy Dark and a cold so bitter and a night so

profound that no man has ever crossed it. The Oldest among the Family recount legends of a world where light came from the sky, where men and women made boats that could cross the stars. These ships brought us here, the Oldest say—and the Family must only wait for the travelers to return. But young John Redlantern will break the laws of Eden, shatter the Family and change history. He will abandon the old ways, venture into the Dark...and discover the truth about their world. Already remarkably acclaimed in the UK, Dark Eden is science fiction as literature; part parable, part powerful coming-of-age story, set in a truly original alien world of dark, sinister beauty--rendered in prose that is at once strikingly simple and stunningly inventive.
