A history of the Korean War with

soldier's-eye views from both sides, by the Pulitzer Prize-winning author of The Rising Sun and Infamy. Pulitzer Prize-winning author John Toland reports on the Korean War in a revolutionary way in this thoroughly researched and riveting book. Toland pored over military

archives and was the first person to gain access to previously undisclosed Chinese records, which allowed him to investigate Chairman Mao's direct involvement in the conflict. Toland supplements his captivating history with in-depth interviews with more than two hundred American soldiers, as well as North Korean, South Korean, and Chinese combatants, plus dozens of poignant photographs, bringing those who fought to vivid life and honoring the memory of those lost. In *Mortal Combat* is comprehensive in its discussion of events deemed controversial, such as American brutality against Korean civilians and allegations of American use of biological warfare. Toland tells the dramatic account of the Korean War from start to finish, from the appalling

experience of its POWs to Mao's prediction of MacArthur's Inchon invasion. Toland's account of the "forgotten war" is a must-read for any history aficionado.

'Never mind the kids, I've had an education from reading this book! ... Recommended for any budding scientists, eco-warriors or fans of weird facts' Rachel Riley, TV presenter and mathematician 'The best way to get out of being bored is discovering something new. The great thing about this book is it whizzes you off to a world of facts you had never heard of. Result: not being bored. Result!' Michael Rosen, Children's poet and author 'Every page bursting with fantastic facts you never thought you needed to know. Indispensable, planet-saving, fact-tastic fun for all the family!' Dallas Campbell, BBC Science presenter In this new book, TV science expert Dr Emily Grossman answers incredible and important questions about

our natural world. You'll find out silly things like why some animals do square-shaped poos and which direction a dog is likely to face while weeing, but you'll also learn what climate change and wildlife loss are actually doing to our planet and what YOU can do to help. Covering a diverse range of key science topics, from human biology and animals and plants to the weather and space, Dr Emily shows readers why Earth is so weird and wonderfully great. Did you know there's a planet in our solar system where it actually rains diamonds? Imagine that! If you lived there, you'd always be picking them out of your hair, your pockets and probably your pants! Dr Emily also tackles Earth's BIGGEST problem: climate change. Through clear, sensitive explanations, you'll find out

what is actually happening to our Earth and what this means for both humans and wildlife - and what we can all do to help! Written by TV science expert, STEM ambassador and advocate for women in science Dr Emily Grossman, this book will make your eyebrows rise, your jaw drop and your world WHIZZ! It will also give you hope about our future and how we can ALL make a difference. 'I love this book! It's funny, accessible and quirky and has exactly the right balance of questions and information to light the flame of scientific inquiry in young minds. A must-read for all budding young scientists' Lucy Hawking, Children's science author 'Since we got this book, all my kids want to talk about is diamond rain, tuna fish eyeballs and how to save the planet ... thank

goodness Emily has written down the answers to their insatiably curious questions in a single handy and hilarious volume' Helen Arney, Science presenter, comedian and author Emily Grossman's first book Brain-fizzing Facts: Awesome Science Questions Answered was shortlisted for the Teach Primary Book Awards 2020.

50+ Treats for a Festive Season

Chronicle Books

Eggs or Anarchy is one of the great, British stories of the Second World War yet to be told in full. It reveals the heroic tale of how Lord Woolton, Minister for Food, really fed Britain. As a nation at war, with supply routes under attack from the Axis powers and resources scarce, it was Woolton's job to fulfil his promise to the British people, and Prime Minister Winston Churchill in particular, that there would be food on the shelves each week. Persuading the public to not resort to the black market and to manage on the very limited ration was

one thing, but Woolton had to fulfil his side of the bargain and maintain supplies in time of crisis. A grammar school-educated genius, he was a fish out of water in Churchill's cabinet and the PM himself doubted Woolton would survive due to the unstinting criticism he faced from colleagues, the press and public. This is the story of how he battled to save his own career while using every trick in his entrepreneurial book to secure supplies. He battled to outwit unscrupulous dealers on the black market streets of cities within the British Empire - such as Alexandria in Egypt - persuading customs authorities to turn a blind eye to his import schemes. If Britain had gone hungry the outcome of the war could have been very different. This book, for the first time, finds out the

real story of how Lord Woolton provided food for Britain and her colonies and discovers that for him there were days when it was literally a choice of 'eggs or anarchy'.

Nearly four hundred photos documenting the last years of the *Luftwaffe*: "If you're

interested in unit history then this book is a must have” (Britmodeller.com). A companion to the first volume of Luftwaffe in Colour, which covered the victory years from 1939 to Spring 1942, this book contains even more fascinating material on the machines of the Luftwaffe and the men who flew them as their fate took an increasingly grim path. Initially, the Luftwaffe ruled the skies, but eventually, they fought an increasingly futile war of attrition that, when combined with vital strategic mistakes in aircraft production, was its death knell. Despite this, the Luftwaffe produced the most successful air aces of all time. Among many remarkable images, we see one of the last Junkers 87 B-2 operational on the Eastern Front during the winter of 1942-1943; the

huge BV 222 V-5 of Lufttransportstaffel in the port of Heraklion in late 1942; pilots in Tunisia in 1943; the aces Hans Philipp, Wolfgang Späte, and Heinz Schnaufer; and a vivid demonstration of the reversal in fortunes in 1944 as Allied bombers destroy 106 sites, engulfing them in fire at Schwäbisch Hall on German soil. In this painstakingly curated collection, the full detail behind the propaganda is once more revealed in rare color photographs.

The Self-Centred Art is a study of the plays of Ben Jonson and the actors who first performed in them. Jakub Boguszak shows how the idiosyncrasies of Jonson's comic characters were thrown into relief in actors' part-scripts—scrolls containing a single actor's lines and cues—some five hundred of which are reconstructed here from Jonson's seventeen extant plays. Reading Jonson's spectating parts, humorous parts, apprentice parts, and plotting parts, Boguszak argues that the kind of self-absorption which defines so many of Jonson's famous comic creations would have come easily to actors relying on these documents.

Jonson's actors would have moreover worked on their cues, studied their speeches, and thought about the information excluded from their parts differently, depending on the type they had to play. Boguszak thus shows that Jonson brilliantly adapted his comedies to the way the actors worked, making the actors' self-centredness serve his art. This book addresses Jonson's dealings with the actors as well as the printers of his plays and supplements the discussion of different types of parts with a colourful range of case studies. In doing so, it presents a new way of understanding not just Ben Jonson, but early modern theatre at large.
