Real Estate Principles: A Value Approach demonstrates how value is central to virtually all real estate decision-making. Students using Ling and Archer should finish the course with a value-oriented framework and a set of valuation and decision making tools that can be applied in a variety of real-world situations. The key to making sound investment decision is to understand how property values are created, maintained, increased or destroyed. Since the launch of Real Estate Principles: A Value Approach, significant and lasting changes have come upon the world of real estate. This is very true in real estate finance and capital sources where most of the traditional lenders have been transformed or displaced, giving way to a radically different set of players in mortgage finance. There has been change with profound and far-reaching implications in a world where it is understandable that property values can go down as well as up. This realization will color every aspect of real estate investment, finance and transactions for the foreseeable future.

In this in-depth analytical and critical discussion of the content and system of the directive, thirty-eight contributing authors – academics, lawyers, consultants, fund supervisors, and fund industry experts – examine the AIFMD from every angle. They cover structure, regulatory history, scope, appointment and authorization of the manager, the requirements for depositaries and prime brokers, rules on delegation, reporting requirements, transitional provisions, and the objectives stipulated in the recitals and other official documents. The challenging implications and contexts they examine include the following: – connection with systemic risk and the financial crisis; – nexus with insurance

for negligent conduct; – connection with corporate governance doctrine; – risk management; – transparency; – the cross-border dimension; – liability for lost assets; – impact on alternative investment strategies, and – the nexus with the European Regulation on Long-Term Investment Funds (ELTIFR). Nine country reports, representing most of Europe's financial centres and fund markets add a national perspective to the discussion of the European regulation. These chapters deal with the potential interactions among the AIFMD and the relevant laws and regulations of Austria, France, Germany, Italy, Luxembourg, Liechtenstein, The Netherlands, Malta and the United Kingdom. The second edition of the book continues to deliver not only the much-needed discussion of the inconsistencies and difficulties when applying the directive, but also provides guidance and potential solutions to the problems it raises. The second edition considers all new developments in the field of alternative investment funds, their managers, depositaries, and prime brokers, including, but not limited to, statements by the European Securities and Markets Authority (ESMA) and national competent authorities on the interpretation of the AIFMD, as well as new European regulation, in particular the PRIIPS Regulation, the ELTIF Regulation, the Regulation on European Venture Capital Funds (EuVeCaR), the Regulation on European Social Entrepreneurship Funds (EUSEFR), MiFID II, and UCITS V. The book will be warmly welcomed by investors and their counsel, fund managers, depositaries, asset managers, administrators, as well as regulators and academics in the field.

America's landscape is undergoing a profound transformation as demand grows for a different kind of American Dream--smaller homes on smaller lots, multifamily options, and walkable neighborhoods. This trend presents a tremendous opportunity to reinvent our urban and suburban areas. But in a time of fiscal austerity, how do we finance redevelopment needs? In *Foundations of Real Estate Development Finance: A Guide for Public-Private Partnerships*, urban scholar Arthur C. Nelson argues that efficient redevelopment depends on the ability to leverage resources through partnerships. Public-private partnerships are increasingly important in reducing the complexity and lowering the risk of redevelopment projects. Although planners are an integral part of creating these partnerships, their training does generally not include real-estate financing, which presents challenges and imbalances in public-private partnership. This is the first primer on financing urban redevelopment written for practicing planners and public administrators. In easy-to-understand language, it will inform readers of the natural cycle of urban development, explain how to overcome barriers to efficient redevelopment, what it takes for the private sector to justify its redevelopment investments, and the role of public and nonprofit sectors to leverage private sector redevelopment where the market does not generate sufficient rates of return. This is a must read for practicing planners and planning students, economic development officials, public administrators, and others who need to understand how to leverage public and non-profit resources to leverage private funds for redevelopment.
