Written by a massage therapist for massage therapists, Mosby's Pathology for Massage Therapists, 3rd Edition provides direct information along with focused recommendations. Coverage of over 340 pathologies helps you appropriately tailor massage treatment, and more than 750 full-color photographs and illustrations make it easier to recognize common pathologies. This edition includes a new chapter on geriatric massage and has been extensively reviewed by over a dozen experts in the massage and medical fields. Written by massage therapy educator and practitioner Susan Salvo, this resource provides the pathology knowledge you need to succeed on licensure and certification exams and in practice. A traffic light icon appears before

each pathology in the book, designating whether massage is contraindicated (red), local contraindication (yellow), or indicated (green) for that particular pathology. Consistent format for each chapter makes it easy to find key information with learning objectives, list of pathologies, system overview, and pathologies, including description, etiology, signs and symptoms, treatment, and massage considerations. Student-friendly features in each chapter include learning objectives and self-tests that measure your comprehension. Medical Technology boxes highlight special populations, such as clients in wheelchairs or with pacemakers, and explain what the medical device is, and what special precautions or contraindications you should be aware of before working on these clients. Spotlight on Research boxes summarize recent studies of massage therapy and its effects. Student resources on an Evolve companion website include interactive activities, video clips of techniques, animations, the Body Spectrum coloring book, flashcards, review questions, additional case studies, an image collection, an audio glossary, study tips,

stress-busting tips, research updates, and more. Mosby's Pathology for Massage Therapists Online reinforces content covered in the book and provides a dynamic way to learn key concepts, with features including recall activities, rollover glossary terms and definitions, animations, quizzes, and Clinical Tips boxes. Never before has mankind changed so much so fast-but we still rely on outdated demographic stereotypes to understand groups of people and target audiences. Now there's a better way to discover what matters to the people you are trying to motivate: a brand-new big-data tool that will change audience profiling for everything-forever. In *We Are All the Same Age Now*, David Allison, creator of Valuegraphics, explains how you can increase efficiency, create strategies that are eight times more effective, decrease internal politics around decisions, and be better equipped for disruption. He explains what Valuegraphics can do and offers the data samples and tools you need to get started using Valuegraphics immediately. He also shares how to make powerful

values-based decisions throughout your organization and how to take your insights further. It's time to change the way you see the world-and motivate more people more often-by embracing the power of Valuegraphics.

In the European Union nations, and other countries including Japan, Australia and Malaysia, it is a legal requirement that food products containing genetically modified organism (GMO) materials are labelled as such in order that customers may make informed purchasing decisions. For manufacturers and consumers to be confident about these assertions, systems must be in place along the entire food chain which support the co-existence of GM and non GM materials whilst maintaining a strict segregation between the two. This book is an output of a European Union-funded project entitled "Co-Extra: GM and non-GM food and feed supply chains: their Co-Existence and Traceability". The objective of this four year project is to provide practical tools and methods for implementing co-

existence that will: enable the co-existence of genetically modified (GM) and non-GM crops enable the segregation and tracing of genetically modified organism (GMO) materials and derived products along the food and feed chains anticipate the future expansion of the use of GMOs The project is designed to foster a robustly science-based debate amongst all of the stakeholders involved in the food and feed chains, and the tools will be assessed not only from a technical point of view but with regard to the economic and legal aspects. It also surveys the GMO-related legal regimes and practices that exist in and beyond the EU. This book examines the practical tools and methods available to implement the co-existence and traceability of GM and non-GM food materials along the entire food and feed chains, as demanded by consumers and by legislation in force in the EU and elsewhere. GM and Non-GM Supply Foods is a source of valuable information for food manufacturers, food research institutions and regulatory bodies internationally.

CAD82: 5th International Conference and Exhibition on Computers in Design Engineering is a collection of conference and review papers related to design engineering. The book, which is divided into 18 parts, covers papers on talking points in Computer-Aided Design (CAD), including micros in the design office, drafting systems, and introducing CAD into the industry. The text presents papers on building design, CAD/CAM, databases, education, electronics, geometric modeling, graphics, mechanical engineering, and structures. The book concludes by providing poster sessions that tackle topics, such as a formalized methodology in CAD, which provides a framework for exploring such design and performance relationships for multi-variable, multi-objective problems; a system for computer-aided architectural design; a technique for automatic interpretation; and a system of modeling three-dimensional roof forms. Design engineers and students taking CAD courses will find this book helpful.

Companies Like McDonald's Can Re-Energize Their Brands (ISBN: 9780136043317) by Larry Light and Joan Kiddon. Available in print and digital formats. Build a systematic Plan to Win for revitalizing your brand: stop playing "not to lose," and get your entire organization aligned for the win! How many times have you heard: "We all need to be on the same page"? That's the Holy Grail for marketers, managers, and executives. Yet rarely do organizations create that "one page" of purpose, actions, and metrics to which all can adhere. A Plan to Win (PTW) does just that.

Great leaders embrace a higher purpose to win. The Net Promoter System shines as their guiding star. Few management ideas have spread so far and wide as the Net Promoter System (NPS). Since its conception almost two decades ago by customer loyalty guru Fred Reichheld, thousands of companies around the world have adopted it—from industrial titans such as Mercedes-Benz and Cummins to tech giants like Apple and Amazon to digital innovators such as Warby Parker and Peloton. Now, Reichheld has raised the bar yet again. In *Winning on Purpose*, he demonstrates that the primary purpose of a business should be to enrich the lives of its customers. Why? Because when customers feel this love, they come back for more and bring their friends—generating good profits. This is NPS 3.0 and it puts a new take on the age-old Golden Rule—treat customers the way

you would want a loved one treated—at the heart of enduring business success. As the compelling examples in this book illustrate, companies with superior NPS consistently deliver higher returns to shareholders across a wide array of industries. But winning on purpose isn't easy. Reichheld also explains why many NPS practitioners achieve just a small fraction of the system's full potential, and he presents the newest thinking and best practices for doing NPS right. He unveils the Earned Growth Rate (EGR): the first reliable, complementary accounting measure that can truly leverage the power of NPS. With keen insight and moving personal stories, Reichheld advances the thinking and practice of NPS. *Winning on Purpose* is your indispensable guide for inspiring customer love within your own teams and using Net Promoter to achieve both personal and business success.
