In *Creating a Confederate Kentucky*, Anne E. Marshall traces the development of a Confederate identity in Kentucky between 1865 and 1925, belying the fact that Kentucky never left the Union. After the Civil War, the people of Kentucky appeared to forget their Union loyalties and embraced the Democratic politics, racial violence, and Jim Crow laws associated with former Confederate states. Marshall looks beyond postwar political and economic factors to the longer-term commemorations of the Civil War by which Kentuckians fixed the state's remembrance of the conflict for the following sixty years.

Some years ago it was my privilege to enjoy the acquaintance of Miss Frances Rolleston, of Keswick, and to carry on a correspondence with her with respect to her work, Mazzaroth: or, the

Constellations. She was the first to create an interest in this important subject. Since then Dr. Seiss, of Philadelphia, has endeavoured to popularize her work on the other side of the Atlantic; and brief references have been made to the subject in such books as *Moses and Geology*, by Dr. Kinns, and *inPrimeval Man*; but it was felt, for many reasons, that it was desirable to make another effort to set forth, in a more complete form, the witness of the stars to prophetic truth, so necessary in these last days. To the late Miss Rolleston, however, belongs the honour of collecting a mass of information bearing on this subject; but, published as it was, chiefly in the form of notes, unarranged and unindexed, it was suited only for, but was most valuable to, the student. She it was who performed the drudgery of collecting the facts presented by Albumazer, the Arab astronomer to the Caliphs of Grenada, 850 a.d.; and the Tables drawn up by Ulugh Beigh, the Tartar prince and astronomer, about 1650 a.d., who gives the Arabian Astronomy as it had come down from the earliest times. Modern astronomers have preserved, and still have in common use, the ancient names of over a hundred of the principal stars which have been handed down; but now these names are used merely as a convenience, and without any reference to their significance. This work is an attempt to popularize this ancient information, and to use it in the interests of truth. For the ancient astronomical facts and the names, with their signification, I am, from the very nature of the case, indebted, of course, to all who have preserved, collected, and handed them down; but for their interpretation I am alone responsible. It is for the readers to judge how far my conclusions are borne out by the evidence; and how far the foundation of our hopes of coming glory are strengthened by the prophecies which have been written in the stars of heaven, as well as in the Scriptures of truth. Casual stargazers are familiar with many classical figures and asterisms composed of bright stars (e.g., Orion and the Plough), but this book reveals not just the constellations of today but those of yesteryear. The history of the human identification of constellations among the stars is explored through the stories of some influential celestial cartographers whose works determined whether new inventions survived. The history of how the modern set of 88 constellations was defined by the professional astronomy community is recounted, explaining how the constellations described in the

book became permanently "extinct." Dr. Barentine addresses why some figures were tried and discarded, and also directs observers to how those figures can still be picked out on a clear night if one knows where to look. These lost constellations are described in great detail using historical references, enabling observers to rediscover them on their own surveys of the sky. Treatment of the obsolete constellations as extant features of the night sky adds a new dimension to stargazing that merges history with the accessibility and immediacy of the night sky.

Dorey's research shows the African Dogon religion to be the oldest mythology in the world. It existed in Africa long before humans migrated to other areas. Dorey has found fragments of the Dogon religion all over the world. The Nummo, the title of the book, refers to alien beings who were considered immortal by the Dogon people. According to the Dogon, these fish and serpent like beings came to Earth from the stars. When they died and were reborn they could remember their previous existence. The Dogon elder Ogotemmêli described life and death for the amphibious Nummo as being like a snake shedding its skin. According to the Dogon, in the beginning of human existence immortality was the norm and time, as we know it, was irrelevant. This book is vital in the search for the truth about human origins.

Left at an orphanage as a child, Thea Reed vowed to find her mother someday. Now grown, her search takes her to Pleasant Valley, Wisconsin, in 1908. When clues lead her to a mental asylum, Thea uses her experience as a post-mortem photographer to gain access and assist groundskeeper Simeon Coyle in photographing the patients and uncovering the secrets within. However, she never expected her personal quest would reawaken the legend of Misty Wayfair, a murdered woman who allegedly haunts the area and whose appearance portends death. A century later, Heidi Lane receives a troubling letter from her mother--who is battling dementia--compelling her to travel to Pleasant Valley for answers to her own questions of identity. When she catches sight of a ghostly woman who haunts the asylum ruins in the woods, the long-standing story of Misty Wayfair returns--and with it, Heidi's fear for her own life. As two women across time seek answers about their identities and heritage, can they overcome the threat of the mysterious curse that has them inextricably intertwined?

The Witching Hour Penguin

From the author of the extraordinary Vampire Chronicles comes a huge, hypnotic novel of witchcraft and the occult through four centuries. Demonstrating, once again, her gift for spellbinding storytelling and the creation of legend, Anne Rice makes real for us a great dynasty of witches--a

family given to poetry and to incest, to murder and to philosophy; a family that, over the ages, is itself haunted by a powerful, dangerous, and seductive being. On the veranda of a great New Orleans house, now faded, a mute and fragile woman sits rocking . . . and *The Witching Hour* begins. It begins in our time with a rescue at sea. Rowan Mayfair, a beautiful woman, a brilliant practitioner of neurosurgery--aware that she has special powers but unaware that she comes from an ancient line of witches--finds the drowned body of a man off the coast of California and brings him to life. He is Michael Curry, who was born in New Orleans and orphaned in childhood by fire on Christmas Eve, who pulled himself up from poverty, and who now, in his brief interval of death, has acquired a sensory power that mystifies and frightens him. As these two, fiercely drawn to each other, fall in love and--in passionate alliance--set out to solve the mystery of her past and his unwelcome gift, the novel moves backward and forward in time from today's New Orleans and San Francisco to long-ago Amsterdam and a chateau in the France of Louis XIV. An intricate tale of evil unfolds--an evil unleashed in seventeenth-century Scotland, where the first "witch," Suzanne of the Mayfair, conjures up the spirit she names Lasher . . . a creation that spells her own destruction and torments each of her descendants in turn. From the coffee plantations of Port au Prince, where the great Mayfair fortune is made and the legacy of their dark power is almost destroyed, to Civil War New Orleans, as Julien--the clan's only male to be endowed with occult powers--provides for the dynasty its foothold in America, the dark, luminous story encompasses dramas of seduction and death, episodes of tenderness and healing. And always--through peril and escape, tension and release--there swirl around us the echoes of eternal war: innocence versus the corruption of the spirit, sanity against madness, life against death. With a dreamlike power, the novel draws us, through circuitous, twilight paths, to the present and Rowan's increasingly inspired and risky moves in the merciless game that binds her to her heritage. And in New Orleans, on Christmas Eve, this strangest of family sagas is brought to its startling climax.

This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

The Dogon believed that the alien Nummo would one day return to Earth. It was the duty of the Hogan, their spiritual leader, to safe guard the Earth until that time. The day of the Nummos' return was known to the Dogon as the "Day of the Fish." Day of the Fish reveals that the amphibious Nummo, who came to Earth from the stars, were the goddesses known to the peoples of the Neolithic and Paleolithic ages. Many of the Dogon symbols identified with the Nummo were the same symbols that Marija Gimbutas associated with the goddesses of Old Europe. Dorey also compares the Dogon religion with what is known of the Jomon people of Japan, who were Mesolithic-Neolithic hunters and gatherers from around 14,000 to 300 BCE. Dorey's research reveals that this is the

oldest religion known to humanity and that understanding it is critical to our survival. She believes that knowing the truth about our past, will provide us with an understanding of the present and give us renewed hope for the future.

National Book Award Finalist A clear-sighted revelation, a deep penetration into the world of Scientology by the Pulitzer Prize-winning author of *The Looming Tower*, the now-classic study of al-Qaeda's 9/11 attack. Based on more than two hundred personal interviews with current and former Scientologists—both famous and less well known—and years of archival research, Lawrence Wright uses his extraordinary investigative ability to uncover for us the inner workings of the Church of Scientology. At the book's center, two men whom Wright brings vividly to life, showing how they have made Scientology what it is today: The darkly brilliant science-fiction writer L. Ron Hubbard, whose restless, expansive mind invented a new religion. And his successor, David Miscavige—tough and driven, with the unenviable task of preserving the church after the death of Hubbard. We learn about Scientology's complicated cosmology and special language. We see the ways in which the church pursues celebrities, such as Tom Cruise and John Travolta, and how such stars are used to advance the church's goals. And we meet the young idealists who have joined the Sea Org, the church's clergy, signing up with a billion-year contract. In *Going Clear*, Wright examines what fundamentally makes a religion a religion, and whether Scientology is, in fact, deserving of this constitutional protection. Employing all his exceptional journalistic skills of observation, understanding, and shaping a story into a compelling narrative, Lawrence Wright has given us an evenhanded yet keenly incisive book that reveals the very essence of what makes Scientology the institution it is.
