### **Transformers Dark of the Moon: The Lost**

**Autobot** Henry Holt and Company

The untold story of the historic voyage to the moon that closed out one of our darkest years with a nearly unimaginable triumph In August 1968, NASA made a bold decision: in just sixteen weeks, the United States would launch humankind's first flight to the moon. Only the year before, three astronauts had burned to death in their spacecraft, and since then the Apollo program had suffered one setback after another. Meanwhile, the Russians were winning the space race, the Cold War was getting hotter by the month, and President Kennedy's promise to put a man on the moon by the end of the decade seemed sure

to be broken. But when Frank Borman, Jim Lovell and Bill Anders were summoned to a secret meeting and told of the dangerous mission, they instantly signed on. Written with all the color and verve of the best narrative non-fiction, *Apollo 8* takes us from Mission Control to the astronaut's homes, from the test labs to the launch pad. The race to prepare an untested rocket for an unprecedented journey paves the way for the hair-raising trip to the moon. Then, on Christmas Eve, a nation that has suffered a horrendous year of assassinations and war is heartened by an inspiring message from the trio of astronauts in lunar orbit. And when the mission is over—after the first view of the far side of the moon, the first earth-rise, and the first re-entry through the earth's atmosphere following a flight to deep space—the

impossible dream of walking on the moon suddenly seems within reach. The full story of *Apollo 8* has never been told, and only Jeffrey Kluger—Jim Lovell's co-author on their bestselling book about *Apollo 13*—can do it justice. Here is the tale of a mission that was both a calculated risk and a wild crapshoot, a stirring account of how three American heroes forever changed our view of the home planet.

### **The Osage Murders and the Birth of the FBI**

Random House Books for Young Readers  
NATIONAL BESTSELLER.  
Astronaut Jim Lovell and coauthor Jeffrey Kluger's harrowing account of the *Apollo 13* disaster. Serving as the basis for Ron Howard's blockbuster *Apollo 13*, the book reveals true details not shown in the movie. Thrilling and evocative, you feel as though you're alongside Lovell in the

lunar module. Written with all the color and drama of the best fiction, *Apollo 13* tells the full story of the moon shot that almost ended in catastrophe. Minutes after a mid-flight explosion, the three astronauts are forced to abandon the main ship for the lunar module, a tiny craft designed to keep two men alive for just two days.? As the hours tick away, the narrative shifts from the crippled spacecraft to Mission Control, from engineers searching desperately for a way to fix the ship to Lovell's wife and children praying for his safe return. The entire nation watches as one crisis after another is met and overcome. By the time the ship splashes down in the Pacific, we understand why the heroic effort to rescue Lovell and his crew is considered by many to be NASA's finest hour.? Inspiring and astonishing, the story of *Apollo 13* is a timeless tribute to the enduring American spirit and sparkling individual heroism.

*Little Fox and the Missing Moon* Createspace Independent Publishing Platform  
 "This behind-the-scenes look at the first Apollo moon landing has the feel

of a public television documentary in its breadth and detail" (Publishers Weekly, starred review). Here is a rare perspective on a story we only thought we knew. For *Apollo 11*, the first moon landing, is a story that belongs to many, not just the few and famous. It belongs to the seamstress who put together twenty-two layers of fabric for each space suit. To the engineers who created a special heat shield to protect the capsule during its fiery reentry. It belongs to the flight directors, camera designers, software experts, suit testers, telescope crew, aerospace technicians, photo developers, engineers, and navigators. Gathering direct quotes from some of these folks who worked behind the scenes, Catherine Thimmesh reveals their very human worries and concerns. Culling NASA transcripts, national archives, and stunning NASA photos from *Apollo 11*, she captures not only the sheer magnitude of this feat but also the dedication, ingenuity, and perseverance of the greatest team ever—the team that worked to first put man on that great

gray rock in the sky. Winner of the Robert F. Sibert Informational Book Award "An edge-of-your-seat adventure . . . Lavishly illustrated . . . This exhilarating book . . . will captivate." —Chicago Sun-Times "Thimmesh gives names and voices to the army that got Neil Armstrong and company to the moon and back. The result is a spectacular and highly original addition to the literature of space exploration." —The Horn Book "This beautiful and well-documented tribute will introduce a new generation to that triumphant time." —Kirkus Reviews (starred review)

[Discovering Astrology's Lost Dimension](#)  
 Createspace Independent Publishing Platform  
 The untold story of the American moon shot that almost ended in a fatal catastrophe, told by the flight's commander, offers a chronicle of courage, heroism, and adventure. *Lost on the Moon* Little, Brown Books for Young Readers  
 In the next highly anticipated installment of J.R. Rain's bestselling supernatural mystery series, Samantha Moon finds herself stranded on a distant planet of

dragons . . . and confronted with a powerful demon hellbent on destroying worlds. Samantha Moon spent the past thirteen years fighting the evil trying to consume her, but at least she knew where it lurked. With the dark masters unleashed, her life has become one of constant vigilance and sleepless nights. One upside, though: she's on speaking terms with the sun again. Allison's vision of a ticking supernatural time bomb wiping out civilization sends them racing out to the Arizona desert. After hastily gathering reinforcements, they confront the harbinger of the end times before it can strike. When the dust settles, Sam finds herself in a desolate alien wasteland, her dragon friend mortally wounded beside her and no obvious way back to her world. Her body can withstand the upper-dimensional energies for only a few hours. She needs to find a way home as well as figure out how to stop Talos from dying. She doesn't have time to do both. She might not be able to do either.

**Lost Moon** Teacher Created Materials  
A legendary vampire known as the Blood

Countess journeys from her castle in the Carpathian Mountains to the glitter of the modern-day world of rock music, in search of a beautiful young woman named Chloe who is destined to become her faithful servant, but Chloe is determined to stop the depraved huntress's evil, regardless of the personal cost. Original.

**The Night The Moon Went Missing** Pinnacle Books  
Cat-eared chimeras, hunky detectives, cagey zealots and a slave-trading space station. Many people dream of an off-world life, but for Nikta Kozan the wilds of Renga are more than enough. She has plenty to do, delivering mail in a lawless frontier, reporting back to her magic-wielding cousins at the shadowy Enso, and trying to mend relations with her brother at the Chalinex City Police Department. When one of her favorite customers complains about a missing grandson, can she hand over the case to the cops or will this feisty ket have to handle things on her own? Find out in this thrilling, action-packed sequel to Post Magic. If you liked Firefly, Dark Angel, Lost Girl, Dark Matter or the

Dresden Files, you'll love Post Magic, a wild paranormal space fantasy with steampunk elements. **Killers of the Flower Moon** Sleeping Bear Press  
Lost Moon  
The Perilous Voyage of Apollo 13  
**Apollo 13** Earth Lodge  
An up-to-date, clear and interesting introduction to our magnificent moon from the the award-winning author of science books for children. Shining light on all kinds of fascinating facts about our moon, this simple, introductory book includes information on how the moon affects the oceans' tides, why the same side of the moon always faces earth, why we have eclipses, and more. This newly revised edition, available in time for the 50th anniversary of the moon landing, incorporates new, up-to-date information based on recent discoveries, and includes an updated map of the moon's surface. Thoroughly vetted by an astrophysics expert, **The Moon Book** is a perfect introduction lunar phases, orbit, the history of space exploration, and more. Using her signature combination of colorful, clear illustrations and accessible text, Gail Gibbons reinforces important vocabulary with

simple explanations, perfect for budding astronomers. Legends about the moon, trivia, and facts about the moon landing are also included.

### **Keeping the Moon**

Anchor

Meet Moon and a little girl, Lucy, in this illustrated storybook that teaches young children about the importance of the Moon and how valuable each of us really is. Space can be lonely, so Moon likes to watch people down on Earth. There's just one problem: when Sun is out, everybody on Earth is happy to see him, but when Moon is out, everyone goes to sleep. This makes Moon upset. What Moon doesn't know is that little Lucy loves to look up at Moon, and one clear night she sees that Moon has disappeared. Can Lucy find Moon and will Moon learn just how much everybody actually loves her? With colourful illustrations and an engaging storyline, this ebook will inspire and captivate young readers with its timely and ultimately uplifting message about how valuable everyone is and how much we mean to the people around us. It also teaches children about why the Moon is so

important to our lives. A perfect bedtime story and addition to every child's bookshelf.

### The Moon's Lost Light

Houghton Mifflin Harcourt

In April 1970, during the glory days of the Apollo space program, NASA sent Navy Captain Jim Lovell and two other astronauts on America's fifth mission to the moon. Only fifty-five hours into the flight of Apollo 13, disaster struck: a mysterious explosion rocked the ship, and soon its oxygen and power began draining away. Written with all the color and drama of the best fiction, APOLLO 13 (previously published as Lost Moon) tells the full story of the moon shot that almost ended in catastrophe. Minutes after the explosion, the three astronauts are forced to abandon the main ship for the lunar module, a tiny craft designed to keep two men alive for just two days. As the hours tick away, the narrative shifts from the crippled spacecraft to Mission Control, from engineers searching desperately for a way to fix the ship to Lovell's wife and children praying for his safe return. The entire nation watches as one crisis after another is met and

overcome. By the time the ship splashes down in the Pacific, we understand why the heroic effort to rescue Lovell and his crew is considered by many to be NASA's finest hour.

Now, thirty years after the launch of the mission, Jim Lovell and coauthor Jeffrey Kluger add a new preface and never-before-seen photographs to Apollo 13. In their preface, they offer an incisive look at America's waxing and waning love affair with space exploration during the past three decades, culminating only recently when the Apollo 13 spacecraft itself, long consigned to an aviation museum outside Paris, was at last returned to its rightful home in the United States. As inspiring today as it was thirty years ago, the story of Apollo 13 is a timeless tribute to the enduring American spirit and sparkling individual heroism.

### **In which Time is Lost and Then Found Again**

Underwood Books

An eye-opening exploration of the intriguing and often counter-intuitive science of human navigation and experience of place. In the age of GPS and iPhones, human beings it would seem have

mastered the art of direction, but does the need for these devices signal something else—that as a species we are actually hopelessly lost. In fact we've filled our world with signs and arrows. We still get lost in the mall, or a maze of cubicles. What does this say about us? Drawing on his exhaustive research, Professor Collin Ellard illuminates how humans are disconnected from our world and what this means, not just for how we get from A to B, but also for how we construct our cities, our workplaces, our homes, and even our lives.

*Lost Moon* Vintage

In this Level 2 reader based on Transformers: Dark of The Moon, the Autobots discover a lost friend in an unlikely place. Can they bring him back to life in time to fight the evil Decepticons?

### **The Light Side of the Moon**

Little, Brown  
This is what the boy is told: - He woke up on planet Trucon, inside of a fence line he shouldn't have been able to cross. - He has an annirad blaster wound to the back of his head. - He has no memory. - He is now under the protection of a mysterious benefactor. - His name is Chase Garrety. This is what Chase Garrety knows: - He has a message: "Guide the star." - Time is running out.

The Perilous Voyage of Apollo 13 Lindhardt og Ringhof

In this action-packed thriller, Miami just got a lot more dangerous—especially for

one innocent young woman running for her life. The city of Miami is Detective Tom Moon's back yard. He's always kept it local, attending University of Miami on a football scholarship, and, as a Miami PD officer, protecting the city's most vulnerable. Now, as the new leader of an FBI task force called "Operation Guardian," it's his mission to combat international crime. Moon's investigative team discovers that the opportunistic "Blood Brothers"—Russian nationals Roman and Emile Rostoff—have evaded authorities while building a vast, powerful, and deadly crime syndicate throughout Europe and metropolitan Miami. Moon played offense for U of M, but he's on the other side of the field this time. And as the Rostoffs zero in on a target dear to Tom, they're not playing by anyone's rules.

Daughters of the Moon Anchor

Book Excerpt: ssor, and Andy Sudds went off on occasional hunting trips. But the spirit of adventure was still strong in the hearts of the boys and the professor. One day, in the midst of some risky experiments at

college, Jack and Mark, as related in "Through Space to Mars," received a telegram from Professor Henderson, calling them home. There they found their friend entertaining as a guest Professor Santell Roumann, who was almost as celebrated as was Mr. Henderson, in the matter of inventions. Professor Roumann made a strange proposition. He said if the old scientist and his young friends would build the proper kind of a projectile, they could make a trip to the planet Mars, by means of a wonderful motor, operated by a power called Etherium, of which Mr. Roumann held the secret. After some discussion, the projectile, called the Annihilator, from the fact that it annihilated space, was begun. It was two hundred feet long, ten feet in diameter in the middle, and shaped like a cigar. I Read More *Lost Moon* LB Kids

Never underestimate the power of friendship. When Colie goes to spend the summer at the beach, she doesn't expect much. But Colie didn't count on meeting Morgan and Isabel. Through them, she learns what true friendship is all about, and

finally starts to realize her potential. And that just might open the door to her first chance at love. . . . "A down-to-earth Cinderella story. . . captures that special feeling." —The New York Post Also by Sarah Dessen: *Along for the Ride* *Dreamland* *Just Listen* *Lock and Key* *The Moon and More* *Someone Like You* *That Summer* *This Lullaby* *The Truth About Forever* *What Happened to Goodbye* *Seven Paws Press Inc*

Dr. Nicholas Foster, a once promising linguist, has now been relegated to a teaching position, due to an unfortunate incident in his past. He is approached by a covert group within NASA for work of "national importance". They interest him in some artifacts and snippets of text that haven't been seen for thousands of years. What's even more intriguing is that these were not terrestrial in origin, but were found around a structure on the moon! The shadow group led by Dwight tells him of a structure unlike any they had seen previously was found during the last Apollo mission. The structure was "activated" by actions unknown, and it began transmitting

symbols directly into anyone who ventured close to it. The group had spent enormously to construct a base around the structure; to study it, find its purpose and exploit it. But Operations are being threatened because these transmissions are affecting personnel and Foster is asked to help out. Foster is initially skeptical, but reluctantly agrees to help them out to break out of the monotony of his own existence. From there on, his life takes on an unexpected turn, meeting with the beautiful Commander of the mission, falling in love with her, and journeying with an assortment of people, to the harsh vastness of space, and onto a secret base on the moon. Meanwhile the group's covert interests that extend overseas into China, find out about a secret mission that will land Chinese astronauts close to their own base. They will do anything to protect the base, and the secret that the group has been holding for the last twenty years, before the other side can get to it. They are willing to risk everything to find out. The two groups collide on the moon with disastrous

consequences. Foster eventually manages to enter the structure, only

to realize that it had been a warning, something they had ignored and it

changes everything. Some doors weren't meant to be opened....
