The Anglo Zulu War: Isandlwana Berkley
This book brings together the uBuntu jurisprudence of South Africa, as well as the most cutting-edge critical essays about South African jurisprudence on uBuntu. Can indigenous values be rendered compatible with a modern legal system? This book raises some of the most pressing questions in cultural, political, and legal theory.

Creating and Sustaining the Constructivist Classroom University of Natal Press

The use of case studies to build and test theories in political science and the other social sciences has increased in recent

years. Many scholars have argued that the social sciences rely too heavily on quantitative research and formal models and have attempted to develop and refine rigorous methods for using case studies. This text presents a comprehensive analysis of research methods using case studies and examines the place of case studies in social science methodology. It argues that case studies, statistical methods, and formal models are complementary rather than competitive. The book explains how to design case study research that will produce results useful to policymakers and emphasizes the importance of developing policy-relevant theories. It offers three major contributions to case study methodology: an emphasis on the importance of within-

case analysis, a detailed discussion of process tracing, and development of the concept of typological theories. Case Studies and Theory Development in the Social Sciences will be particularly useful to graduate students and scholars in social science methodology and the philosophy of science, as well as to those designing new research projects, and will contribute greatly to the broader debate about scientific methods.

The revised and updated second edition of Introduction to Cities explores why cities are such a vital part of the human experience and how they shape our everyday lives. Written in engaging and accessible terms, Introduction to Cities examines the study of cities through two

central concepts: that cities are places, where people live, form communities, and establish their own identities, and that they are spaces, such as the inner city and the suburb, that offer a way to configure and shape the material world and natural environment. *Introduction to Cities* covers the theory of cities from an historical perspective right through to the most recent theoretical developments. The authors offer a balanced account of life in cities and explore both positive and negative themes. In addition, the text takes a global approach, with examples ranging from Berlin and Chicago to Shanghai and Mumbai. The book is extensively illustrated with updated maps, charts, tables, and photographs. This new edition also includes a new section on urban planning as well as new chapters on cities as contested spaces, exploring power and politics in an urban context. It contains; information on the status of poor and marginalized groups and the impact of neoliberal policies; material on gender and sexuality; and presents a greater range of geographies with more attention to European, Latin American, and African cities. Revised and updated, *Introduction*

to *Cities* provides a complete introduction to the history, evolution, and future of our modern cities.

UBuntu and the Law Corwin Press

A cocky Scot, an innocent pole dancer and a penthouse apartment with a view. What could go wrong? To escape her difficult past Sasha jumps into an opportunity of managing the sale of the stylish, up market apartment. All of this sounds like a dream, but no one has ever mentioned the arrogant, mouthy Scottish god that lives next door. The problem is that Dexter isn't just good looking, he is also a fist-clenching, heart-pounding, fervent hot man, who makes her heart flutter uncontrollably. She hates his cock-sure attitude. With the talent, of melting women's panties off at a glance, he thinks he can have Sasha too. Well, he couldn't be more wrong. Sasha would rather eat dirt than sleep with him. He vows not to fall for her, but their scorching attraction proves impossible to ignore...

In this groundbreaking book, Bénézet Bujo, a leading voice in African Christian theology, offers an informed critique of

Western ethics and lays the theoretical groundwork for a new African ethic. By skillfully drawing on themes from African life such as marriage, therapy, and art, Bujo exposes the shortcomings of the philosophical anthropology implicit in Western ethics, comparing Western theories of natural law, discourse ethics, and communitarianism with the African emphasis on community and remembrance. He then considers whether African ethics can account for central Western values such as autonomy, freedom, and individual identity. Finally, he considers how African ethics both challenges the Church and contributes to its richness, suggesting that an African palaver ethic can integrate the best features of communitarianism and discourse ethics. This timely contribution to African theology will be of special interest to students of religion, comparative and non-Western philosophy, anthropology, and African studies, as well as those intrigued by ongoing debates about universal ethical norms.

"Finnish pupils' success in international student assessment tests and the characteristics of the Finnish educational system are the focus of interest all around in the world. The significance of Finnish educational policy and societal atmosphere are continuously discussed. This book provides explanations, answers and reflections to these questions. Over 30 expert authors have contributed to this book by bringing their own specific research-based points of view. The second edition of the book introduces the new national curriculum for basic education that now provides guidelines for school-based curricula. Students' learning with engagement and schools as learning communities are core visions of the reform. The authors also reflect on the PISA 2012 results. The book gives an example on how to use PISA information for national improvements. In Finland, all evaluations are enhancement-led and this also includes PISA measurements. The book illustrates how teaching and learning

of different subjects is realized in Finnish schools and describes the essential characteristics and methods of teaching, learning materials and research on these issues. The book provides important insight and reflections to international researchers, teachers, students, journalists and policy makers, who are interested in teaching and learning in Finnish schools. It shows the results of the systematic and persistent work that has been done on education and schooling in Finland. The main features of education in Finland are: Strong equity policy. Teachers as autonomous and reflective academic experts. Flexible educational structures and local responsibility for curriculum development. Evaluation for improvements, not for ranking. No national testing, no inspectorate. Research-based teacher education. Teachers' high competence in content knowledge and pedagogy. Trust in education and teachers."

This novel set in apartheid-era rural South Africa follows an urban swindler as he attempts to take advantage of well-meaning but naive villagers, claiming to be on a mission of salvation-but in truth looking for instant riches. Both hilarious and tender, it explores the fateful confrontation between pastoral benevolence and urban slyness in a peasant countryside that is being destroyed by the rapid loss of land and liberties.

An expert guide to how conversation works, from how we know when to speak to why huh is a universal word We all had teachers who scolded us over the use of um, uh-huh, oh, like, and mm-hmm. But as linguist N. J. Enfield reveals in *How We Talk*, these "bad words" are fundamental to language. Whether we are speaking with

the clerk at the store, our boss, or our spouse, language is dependent on things as commonplace as a rising tone of voice, an apparently meaningless word, or a glance -- signals so small that we hardly pay them any conscious attention. Nevertheless, they are the essence of how we speak. From the traffic signals of speech to the importance of um, *How We Talk* revolutionizes our understanding of conversation. In the process, Enfield reveals what makes language universally - and uniquely -- human.

The texts comprise the original isiZulu

hymns as well as English translations, and are brought to life with an accompanying compact disc of song, story and interview excerpts. These include detail about the seminal moment of change and controversy in the 1990s, when the organ was introduced by church member and ethnomusicologist, Bongani Mthethwa, to accompany the Shembe hymnal repertory. The initiative gave birth to dozens of youth choirs who sang the hymns in a new style, and began to compose their own repertory about Shembe in a more `gospel-inflected' musical version of their faith. --

As a teenager in today's crazy online world, you may think you've got it all sussed out. But even you don't know about all the legal pitfalls, hidden dangers and future implications of what you do, see and post online. *Selfies, Sexts and Smartphones* is the book every teenager (and their parents) should read. It covers all of the major issues teenagers face in the digital age, including cyberbullying, sexting, addiction, internet safety, porn, anxiety, depression, privacy and reputation, and does so within a South African context. Accessible, informative

and even fun, this book will help guide you to a happy, rewarding and, most importantly, safe online life. Upon reading *Selfies, Sexts and Smartphones*, one 17-year-old remarked: 'I feel I need to say thank you for this. It talks about the stuff I deal with every single day.'

Handbook of the Sociology of Education in the 21st Century The Crossroad Publishing Co.

This book will help stakeholders in higher education appreciate service-learning as an innovative and active approach with the potential to enrich students' learning experiences, while adding value to the service mission of higher education. The approach not only links academic learning to everyday life, but also exposes students to a variety of opportunities for the development of life and career skills. The book will serve to bring university teaching out of the clouds and restore in students' minds the connection between what they are learning and the people their education is meant to help. The approach advocated here will serve to have a long-term and salutary effect on the whole nature of university learning. When students are given the opportunity to

participate actively in the learning process, which includes civic engagement, they will be able to learn not only theoretically, but also experientially through practice, as experience is generally one of the best ways to learn. Cultural Universals and Particulars University of Kwazulu Natal Press

In this haunting tale of love and learning, the existential chaos of a life ravaged by circumstance takes on a rhythm of its own, one bound by loss and loneliness, but also an intelligent awareness of self. Sometimes melancholy, sometimes brutal, occasionally funny and infuriating, a journalist-comrade-lover caught up in the shade and shadow of politics and social injustice faces treachery and betrayal on every level. Set against the backdrop of a cityscape that taunts and tantalises, this is where love fails and passion wanes, “where suffering has no meaning”, where an individual escapes death only to find himself confronted with choices wrought by remorse and retribution, by conscience and character. And yet, with all trauma, there is a distinct musicality to the lyrical unpacking that follows a string of small things ...

In this book Yusef Waghid considers an African philosophy of education guided by communitarian, reasonable and culture dependent action in order to bridge the conceptual and practical divide between African ethnophilosophy and ‘scientific African philosophy. Unlike those who argue that African philosophy of education cannot exist because it does not invoke reason, or that reasoned African philosophy of education is just not possible, Waghid suggests an African philosophy of education constituted by reasoned, culture-dependent action.
