Philosophy - Philosophy
of the 17th and 18th
Centuries, grade: 1.8,
language: English,
abstract: This will help
the readers to better
understand John
Locke's philosophy of
knowledge and the
Filipinos' social and

religious dimensions. In the philosophy of knowledge, they will be able to know where knowledge comes from. They will know how it is acquired. Likewise, they will see how it is being formed out of ideas and its formation process. Then they will come to realize its truthfulness and validity. In the social dimension, the readers will be moved by their humility. They will learn how Filipinos relate themselves to each other. They will love the Filipinos more than they do after reading this. On the other hand, the readers will also love their own God more than they do when they discover the Filipinos' fidelity. They will be thinking that these people are holy and so worthy of

respect. Finally the readers will see the connection between Locke's philosophy of knowledge and that of the Filipinos' two dimensions. They will also find out how it is made possible. They will be able to examine themselves the strongest and weakest points of this matter. But their decision will still be to appreciate this kind of work. Then they will acknowledge the researcher for having shared his brilliant knowledge. A Novel About the History of Philosophy
Peter Lang
The author of All I Really Need to Know I Learned in Kindergarten shares the words of writers who have inspired his own work, presenting a thematically organized collection that

encompasses the works of authors ranging from Jerry Garcia to Albert Camus to Beatrix Potter, accompanied by personal commentary on the sources.

The Miseducation of the Filipino CRVP

Not so long ago, it seemed the intellectual positions on

globalization were

clear, with advocates

and opponents making

their respective cases

in decidedly

contrasting terms.

Recently, however, the

fronts have shifted

dramatically. The aim

of this publication is to contribute philosophical depth to the debates on globalization conducted within various academic fields – principally by working out its normative dimensions. The interdisciplinary nature of this book's contributors also serves to scientifically ground the ethical-philosophical discourse on global responsibility. Though by no means exhaustive, the expansive scope of the works herein encompasses such other topics as the altering consciousness of space and time, and the phenomenon of globalization as a discourse, as an ideology and as a symbolic form.

. Renewal of Life by Transmission. The most notable distinction between living and inanimate things is that the former maintain themselves by renewal. A stone when struck resists. If its resistance is greater than the force of the blow struck, it remains outwardly unchanged. Otherwise, it is shattered into smaller bits. Never does the stone attempt to react in such a way that it may maintain itself against the blow, much less so as to render the blow a contributing factor to its own continued action. While the living thing may easily be crushed by superior force, it none the less tries to turn the energies which act upon it into means of

its own further existence. If it cannot do so, it does not just split into smaller pieces (at least in the higher forms of life), but loses its identity as a living thing. As long as it endures, it struggles to use surrounding energies in its own behalf. It uses light, air, moisture, and the material of soil. To say that it uses them is to say that it turns them into means of its own conservation. As long as it is growing, the energy it expends in thus turning the environment to account is more than compensated for by the return it gets: it grows. Understanding the word "control" in this sense, it may be said that a living being is one that subjugates and controls for its own continued activity the

energies that would otherwise use it up. Life is a self-renewing process through action upon the environment. *Saved by Philosophy*
 TEACHER'S DAILY
 Originally published in French as "La Philosophie, une Ecole de la Liberte. Enseignement de la philosophie et apprentissage du philosophe : Etat des lieux et regards pour l'avenir." - This study is dedicated to all those who engaged themselves, with vigour and conviction, in the defence of the teaching of philosophy a fertile guarantor of liberty and autonomy. This publication is also dedicated to the young spirits of today, bound to become the active citizens of tomorrow.

 Axel Honneth's Social Philosophy of Recognition
 Freedom, Normativity, and Identity
 Cambridge Scholars Publishing
Elements of Filipino philosophy
 Harpercollins
 This book presents a reconstruction of the trajectories of freedom in Axel Honneth's recognition theory in the context of the conflict between autonomy and social cohesion. Honneth's re-appropriation of Hegel's notion of

Sittlichkeit, or “ethical life,” provides a potent descriptive theoretical perspective of social conflicts and an articulated praxis of Hegel’s social theory. Amidst the current critical literature posed against the normative aspect of Honneth’s critical theory, there is an already implicit solution to the problem of normativity and reification. By articulating the conflict between freedom and normativity as both a pathological problem and a progressive movement in critical theory, the theme of solidarity is further reinforced in the development of Honneth’s social philosophy. Through the consolidation of the process of recognition, and the spheres of social interaction

where individuals develop, reinforce, and build their identities, it is possible to develop a reverse analysis of a complementary system of social interactions between personal relations, market economy, and democratic spheres to identify deficiencies in societal needs. The book proposes the Reconstructive Normative Simulation (RNS) to consolidate Honneth’s social philosophy. Through RNS, it is possible to examine social pathologies by locating deficiencies in normative resources in the three social spheres. By articulating these deficiencies, the possibility of adjusting societal norms becomes historically bound to existing

norms, while at the same time receptive to forthcoming identities. *An Introduction to the Philosophy of Education* Rex Bookstore, Inc. Hypatia Washington is 22 years old; an unemployed widow, living on welfare, and estranged from her four-year old daughter, she is profoundly alienated from life-when she enrolls in a community college course in Philosophy thus beginning a profound journey of the mind and heart. She debates skeptics as well as Christian apologists about Evolution, Islam, Womanism, and God, while lecturing about ethics, science, consciousness, and the meaning of human history. She analyzes not only philosophers

such as Russell, Rawls, Wittgenstein, and Sartre, but wrestles with such questions as: Which famous philosophers were racists? Was Heidegger a Nazi? Was Wittgenstein homosexual? Did Foucault know he had AIDS? Were any important philosophers women? Or black? Professor Washington is no "ivory tower" philosopher: she agonizes over the Rodney King trial and its aftermath; The O.J. Simpson verdict; the death of Tupac Shakur; the "Black Athena" controversy, and the publication of The Bell Curve-as well as the horrors of September 11, 2001, and its consequences. Join Hypatia, in her pursuit of the Amor Dei Intellectualis

("intellectual love of God").

Democracy and Education Cambridge Scholars Publishing Philosophizing for, with, and by children in a community of inquiry has proven to be an internationally successful learning strategy that enhances both the cognitive and emotional growth of children. Pioneering democratic programs for philosophizing with children now exist throughout the world. The work described in this book represents the latest research on theoretical concepts and applied projects within this field and brings together contributions from twenty-nine countries, representing all continents. The authors address questions on the

theoretical foundation of Philosophy for Children, the application of philosophical methods, the community of inquiry, international and national didactical concepts as well as the evaluation of those concepts. A primary goal of this book is to enhance intercultural academic exchange and to encourage further research and practical work in this field.

Lectures on Comparative Philosophy

Cambridge Scholars Publishing PEAC noted that the purpose of Philosophy of the Human person in the Senior High school is to make it as prerequisite to the course Ethics in Tertiary Education therefore, its prime

duty is to mold students to become better persons in their own preference, that this preference be their guide in achieving a well-rounded character and positive personality in the future.

This study models a way of engaging the current debates between de-constructive cultural criticism and the project of indiginization as these are played out in the struggles of Filipino and Filipino American academics. Children Philosophize Worldwide UNESCO
With all the messages that come our way through social media and in sophisticated gadgets, does the Christian message of love, hope and redemption still have

an importance and relevance? What does it have to offer to enable us to meet the various challenges which beset present-day living? Today there is an even greater and more urgent need to focus on it. After all, the Christian message is not merely information because it is also about a way of life. Neither is it simply an exhortation since it also presents a definite goal. This book provides some philosophical considerations which underpin its central teaching. While aware of its richness and complexity, the essays concentrate on the Christian message insofar as it provides a vision for humanity and articulates a mission to implement it. The book serves to establish

points of encounter, rather than points of departure, in order to contribute to the ongoing reflection by those who believe in that message, as well as to the debates with those who oppose it.

Rightness as

Fairness Council for Research in Values & Rightness as Fairness provides a uniquely fruitful method of 'principled fair negotiation' for resolving applied moral and political issues that requires merging principled debate with real-world negotiation.

Filipino Philosophy

Psychology Press

One day Sophie comes home from school to find two questions in her mail: "Who are

you?" and "Where does the world come from?"

Before she knows it she is enrolled in a correspondence course with a mysterious philosopher. Thus begins Jostein Gaarder's unique novel, which is not only a mystery, but also a complete and entertaining history of philosophy.
