The dynamic, collaborative management model that saved a U.S. manufacturing city When car-making giant General Motors decided to close its plant in Lansing, Michigan, in 1996, one person—the city's newly elected mayor—stood up and said “no.” Initially, it was the cry of a man in the wilderness. Not once in its century-long history had GM reversed a decision to close a plant. But Mayor David Hollister quietly went to work building the Lansing Works! Keep GM! movement and succeeded in defying all the odds. Lansing remains GM's Oldsmobile headquarters. Hollister's collaborative problem-solving approach—the Second Shift model—succeeded in bringing together state and regional politicians, economic developers, private sector firms, labor unions, educators, and residents of the region. Powerful, persuasive, and well-organized, this coalition implemented a strategic, six-dimensional framework to achieve the seemingly impossible: • Identifying: Name the challenge and its impact • Partnering: Develop meaningful relationships • Building: Construct your strategy as you go • Solving: Engage in constant problem solving • Celebrating: Mark successful milestones • Persevering: Adapt and endure The Lansing Works! Keep GM! movement was a victory of people over bureaucracy, of a can-do attitude over cynicism—a story rarely told in today's complex, technological, and often dehumanizing world of large business and out-of-control government. And the best part was that, in the end, both sides came away winners. It's proof positive that when the public and private sectors work together as equal partners, amazing things can happen. One of the great business sagas of modern times, Second Shift provides a proven, practical design for problem solving that anyone can apply in any business, large or small.

A New Research Agenda McGraw-Hill/Irwin

"This book addresses a new philosophy or a major strategy that is emerging today in international business: simultaneous competition and cooperation between multinational enterprises (MNEs) and their global rivals, foreign governments, alliance partners, and corporate members. ... Coopetition goes beyond conventional rules of competition and cooperation to combine the advantages of both. Coopetition involves cooperating to create a bigger business pie, while competing to divide it up. Cooperation reflects the elements of mutual accommodation and collaboration, seeking

joint payoffs and goal accomplishment from the interdependent activities or resources. Competition reflect the elements of bargaining or control and related conflicts, seeking private gains for the[ir] own party."--Page 9 (Preface).

Traditionally, international business (IB) texts survey the field from a USA perspective, going on to compare the USA to the rest of the business world. This text addresses IB from a purely multinational perspective. International Business is examined from the USA angle, going on to address IB issues from other countries' perspectives, what we call the "Reverse Perspective." The authors interview business executives and politicians from a number of countries including the USA, Canada, Mexico, Brazil, Colombia, Argentina, India, Hong Kong, Taiwan, China, Japan, South Korea, Germany, Italy, and Russia. These interviews are incorporated at appropriate points in the text providing first-hand information and practical insight. Cases include: Air Arabia, Gap, Diebold Inc, Matsushita, AMSUPP, NIKE, China Eastern Airlines, Luton & Dunstable Hospital, Harley Davidson, Cassis de Dijon, Green investments in Belize, Chicago Food and Beverage Company, Advanced Software Analytics [Selected Chapters from International Business](#) South-Western Pub

This is an interesting book on an important topic. . . Mikael Linden, Scandinavian Economic History Review This book is indispensable reading for all researchers and practitioners in the international business field as well as economists and academics alike. Giustificativo Pubblicato sul Bollettino del CIRT Economics of International Business sets out a new agenda for international business research. Mark Casson asserts that it is time to move the subject on from sterile debates about transaction cost economies and resource-based theories of the firm. Instead of focusing on the individual firm, the new agenda focuses on the global systems view of international business. A static view of the firm's environment is replaced by a dynamic view which highlights the volatility of the international business environment. Coping with volatility requires entrepreneurial skills, flexibility and the need to synthesize information on a global basis. To co-ordinate the global system properly, entrepreneurs must co-operate through social networks of trust, as well as competing. Constructing a network of joint ventures, it is argued, is simply not enough. Building on his previous book, The Organization of International Business, Mark Casson shows that with suitable modifications, the methods of economics can be used to analyse all of these issues in a rigorous way. The tools of business strategy are too clumsy to address the more subtle issues, whilst descriptive approaches fail to bring key issues into sharp relief. This book is indispensable reading for all researchers and practitioners in the international business field as well as economists and academics alike.
