Successfully Launching New Ventures

This book focuses on the steps a new business owner must take in the first 100 days of starting a business to establish a lasting and successful enterprise. If you're thinking of opening up your own business, you'll need this book. This is a hands-on book that focuses on the tasks that you or any new business owner must complete in the first 100 days of launching a business. Think of it this way: Imagine you've conceived a business idea, written a business plan, raised seed capital, and are set to launch your business on October 1. Now, what would you actually do on October 1, October 2, October 3, and so forth? How would you set your priorities? How would you know which tasks are the most urgent? Although the answers to these questions vary depending on the business, there are a set of key activities that all businesses must accomplish to get their businesses off to a good (and legally proper) start. This book provides examples that include securing proper business licenses and permits; setting up a bookkeeping system; negotiating a lease; buying insurance; entering into contracts with vendors; recruiting and hiring employees; and making the first sale. Broader issues such as developing a business model and building a brand will also be touched upon, but the primary focus of this book is getting you focused on the practical issues that you'll need, as a new business owner, to accomplish, and accomplish correctly, and to get your business off to a good start. To help you prioritize and track the activities that must be completed at the onset of a business, this book will teach you how to set up a "First 100 Days Plan," with the template (titled First 100 Days Plan) included in this book.

New Venture Creation Pearson Higher Ed

This open access book focuses on explaining differences amongst organizations regarding various attributes, forms, and outcomes. By focusing on the "how" of new venture creation and management to produce well-established organizations, the authors aim to increase our understanding of the antecedents of most management research assumptions. New ventures are the source of most newly created jobs generated in an economy, new industries and markets, innovative products and services, and new solutions to economic, social, and environmental problems. However, most management research assumes a well-established organization as the starting point of their theorizing. Building on the notion of guided attention, it details how entrepreneurs can allocate their transient attention to identify potential opportunities from environmental change and how entrepreneurs allocate their sustained attention to form beliefs about radical and incremental opportunities requiring entrepreneurial action. The authors explain how entrepreneurs build such communities and engage community members over time to co-construct potential opportunities for new venture progress. Using the lean startup framework, they connect the dots between the theorizing on identifying and co-constructing potential opportunities and the startup of new ventures. This leads to a new overarching framework based on are (1) co-creating a startup, (2) organizing a startup, and (3) performing a startup to bring together the many disparate threads of research on new ventures. The authors then theorize on the

importance of knowledge in organizational scaling. Based on cutting-edge research from the leading entrepreneurship journals, this book expands knowledge on the cognitive aspect of the new venture creation process.
