*Evaluation of the First 18 Months of the Public Employment Program, Prepared for the Subcommittee on Employment, Poverty, and Migratory Labor ...*, May 1973 Peterson's

In the early 1960s, the militant demands of some organizations of state and local government employees to participate in

decisions about compensation and conditions of employment challenged many established concepts of public administration. A series of strikes revealed a lack of public policy and administrative techniques to cope with the problems presented by aggressive and innovative groups of public employees. Although civil servants had been organized in some communities for as long as fifty years, public attitudes about how such organizations should fit into the political and administrative systems were hazy in the 1960s, and official policies were fragmentary or nonexistent. Some states adopted legislation forbidding public employees to join certain types of organizations. Some highly industrial and urban states enacted legislation creating a system of

employer-employee relations based on the theory of collective bargaining developed in industry. California, the most populous state, developed a public policy that differs considerably from the industrial model. In *Organized Civil Servants*, Winston W. Crouch analyzes factors in California's political system that have tended to produce this policy. He also analyzes the efforts made to reconcile collective bargaining in the public service with the established concepts and procedures of the merit system of public employment. The ultimate outcome appears to depend on the scope of agreements negotiated between public employers and employee organizations at the bargaining table. Almost a fifth of all employees work in the public sector. Employees working in

the civil service, NHS, local government, education, the police and fire services also represent a large and growing body of students taking degree courses at universities. Exploring this important and rapidly changing area, this book outlines the main developments in the public sector since 1979, including topical issues such as the rise of new public management, decentralisation and contracting out. Themes which currently affect public sector employees are examined, including: \* decentralization \* contracting out \* fragmentation and the growth of individualism in the employment contract. This stimulating, up-to-date and intellectually rigorous text is thematic, rather than sector specific, and reflects the way this subject is taught in a range of courses. It will

complement alternative texts in this area and will be a valuable resource for students of public policy, public sector management, human resource management, employee and industrial relations.
