## MATA MOSHE

### Virtual Realities Penguin

A philosophical manual of media power for the network age. Evil Media develops a philosophy of media power that extends the concept of media beyond its tried and trusted use in the games of meaning, symbolism, and truth. It addresses the gray zones in which media exist as corporate work systems, algorithms and data structures, twenty-first century self-improvement manuals, and pharmaceutical techniques. Evil Media invites the reader to explore and understand the abstract infrastructure of the present day. From search engines to flirting strategies, from the value of institutional stupidity to the malicious minutiae of databases, this book shows how the devil is in the details. The title takes the imperative "Don't be evil" and asks, what would be done any differently in contemporary computational and networked media were that maxim reversed. Media here are about much more and much less than symbols, stories, information, or communication: media do things. They incite and provoke, twist and bend, leak and manage. In a series of provocative stratagems designed to be used, Evil Media sets its reader an ethical challenge: either remain a transparent intermediary in the networks and chains of communicative power or become oneself an active, transformative medium.

### No Glossing Over It Springer Science & Business Media

MediaSport is a comprehensive introduction to the ways in which sport and the media interact. It is written by leading experts from around the world in the field of sports studies, sports journalism

and leisure studies. Among the subjects covered are: \* sports ethics \* sport and race \* sport and gender \* sport and violence on television \* the globalization of sports \* marketing sports on the Internet.

### 201 Great Ideas for Your Small Business Random House

This is an edited volume based on the 2007 Conference on Metadata and Semantics Research (MTSR), now in its second meeting. Metadata research is a pluri-disciplinary field that encompasses all aspects of the definition, creation, assessment, management and use of metadata. The volume brings together world class leaders to contribute their research and up-to-date information on metadata and semantics applied to library management, e-commerce, e-business, information science and librarianship, to name a few. The book is designed for a professional audience composed of researchers and practitioners in industry.

### Security and Environmental Sustainability of Multimodal Transport Springer

A fresh, bold study of the emerging field of Sound Art, informed by the ideas of Adorno, Merleau-Ponty and others.

### On a European Journey Springer

In this Part 1 we analyse the Distance and Intensity of Running, Physiological Demands of Football and Injuries and Prevention Techniques. We then present Speed & Agility Training Drills, Warm Up Drills & Injury Prevention, Strength and Conditioning Exercises. The 2nd book in this set focuses on Periodization, Seasonal Training & Small Sided Games

### The Ball is Round MIT Press

The main aim of this book is to present an intriguing retrospective of Building Performance Evaluation (BPE) as it evolved from Post-

Occupancy Evaluation (POE) over the past 25 years. On one hand, this is done by updating original authors' chapter content of Building Evaluation, the first edition published in 1989. That, in turn, is augmented by an orientation toward current and future practice on the other, including new authors who are engaged in ongoing, cutting edge projects. Therefore, individual, methodology oriented chapters covering the fundamental principles of POE and BPE go along with major thematic chapters, topics of which like sustainability or integration of new technologies are addressed in a diversity of case studies from around the globe. Research, methodologies, and framework of POEs continue to evolve. POEs are one step, on the larger scale of BPE, in understanding how buildings function after they are occupied. This resource helps architects, building owners, and facility managers understand the implications and reactions to the facilities that they designed, built and/or commissioned. By considering the whole process from conception to future uses of the building, there can be a more holistic approach to the planning, programming, design, construction, occupancy, and future adaptability of the structure. This book is dedicated to first editor Wolfgang F. E. Preiser who passed away during the process of editing and reviewing chapters of this volume.

### Effective IT Service Management John Wiley & Sons

The Whole Building Handbook is a compendium of all the issues and strategies that architects need to understand to design and construct sustainable buildings for a sustainable society. The authors move beyond the current definition of sustainability in architecture, which tends to focus on energy-efficiency, to include guidance for architecture that promotes social cohesion, personal health, renewable energy sources, water and waste recycling

systems, permaculture, energy conservation - and crucially, buildings in relation to their place. The authors offer a holistic approach to sustainable architecture and authoritative technical advice, on: \* How to design and construct healthy buildings, through choosing suitable materials, healthy service systems, and designing a healthy and comfortable indoor climate, including solutions for avoiding problems with moisture, radon and noise as well as how to facilitate cleaning and maintenance. \* How to design and construct buildings that use resources efficiently, where heating and cooling needs and electricity use is minimized and water-saving technologies and garbage recycling technologies are used. \* How to 'close' organic waste, sewage, heat and energy cycles. For example, how to design a sewage system that recycles nutrients. \* Includes a section on adaptation of buildings to local conditions, looking at how a site must be studied with respect to nature, climate and community structure as well as human activities. The result is a comprehensive, thoroughly illustrated and carefully structured textbook and reference.

Energy Efficiency in Domestic Appliances and Lighting Casemate Publishers

A junior fiction series for boys about a local boys' rugby league team who get special coaching and advice from star NRL player Billy Slater. Liam is the captain of the West Hill Ravens, and the heart and soul of the team. He lives, breathes and sleeps footy. The only problem is that it doesn't leave him much time for anything else. Now his schoolwork is suffering and his parents are on his back. He may even have to quit the team. And without their captain, the Ravens' chances of making the finals look grim. Can Billy convince Liam that working with Ravi, the Ravens' inexperienced reserve player, is the key to saving the team's season?

*Paciolo on Accounting* Edward Elgar Publishing

The articles by well-known international experts intend to facilitate more elaborate expositions of the research presented at the seminar, and to collect and document the results of the various discussions, including ideas and open problems that were identified. Correspondingly the book will consist of two parts. Part I will consist of extended articles describing research presented at the seminar. This will include papers on tracking, motion capture, displays, cloth simulation, and applications. Part II will consist of

articles that capture the results of breakout discussions, describe visions, or advocate particular positions. This will include discussions about system latency, 3D interaction, haptic interfaces, social gaming, perceptual issues, and the fictional "Holodeck".

*Metadata and Semantics* Random House Australia

Completely revised and updated edition of this very popular and successful small business book The first edition of 201 Great Ideas for Your Small Business was hailed by management guru and author Tom Peters as "Brilliantly researched. Brilliantly written. A gem of priceless value on almost every page. Read. Inhale. Absorb. Great Stuff!" In this completely updated third edition of 201 Great Ideas for Your Small Business, renowned small-business expert and consultant Jane Applegate shares new, powerful, creative, simple, and proven approaches for building a better small business. Details how business owners can use online marketing and social networking more effectively Offers timely strategies for thriving in challenging economic times Includes scores of real-life success stories and all-new interviews with small-business owners, experts, and VIP's including Guy Kawasaki, Kay Koplovitz, and Michael Bloomberg It may be small, but your business is a big deal to you, your customers, and employees. 201 Great Ideas provides lively, practical strategies to help you manage, grow, and promote your business.

Software Project Management Kings Road Publishing

This book constitutes the refereed proceedings of the 7th Security Research Conference, Future Security 2012, held in Bonn, Germany, in September 2012. The 78 revised full papers presented were carefully reviewed and selected from 137 submissions. The papers are organized in topical sections on supply chain and critical infrastructure protection; security situational awareness; crisis management; security for critical infrastructure and urban areas; sensor technology; social, psychological and political aspects; cyber defense and information security; maritime and border security; detection of hazardous materials; food chain security; aviation security; ergonomic aspects.

**Advances in Human Factors, Sustainable Urban Planning and Infrastructure** BoD - Books on Demand

A fascinating book that covers in detail all of the most recent advances in Telerobotics. A must-read for scientists, researchers

and students in teleoperation, it describes everything from methods and experimental results to applications and developments. Its three sections cover human system interfaces, control, and applications.

*Bentley's Complete Phrase Code (nearly 1000 Million Combinations)* Springer

Taking you through Ipswich Town FC's exploits in European competition and the fans' journeys to see them play. From Alf Ramsey's Champions playing in the European Cup, through the Bobby Robson era and the UEFA Cup triumph in Amsterdam, to the George Burley Premiership team, and the 'bonus' season in Europe ending under Joe Royle. The inside story of how the trips were organized as planes, boats and a train were chartered, and the memories of traveling fans, club officials and sports commentators. Every European game is summarized, and most are illustrated, while Coach Bobby Ferguson gives his appraisal of Town's tactics and the leading players of the glorious 1980-81 team.

Evil Media "O'Reilly Media, Inc."

Published in 1963, this book about the famous accountant and bookkeeper Luca Paciolo explores his extraordinary contribution to the development of the accounting profession. Paciolo is the first known writer to publish a work describing the double entry process.

Cases in Operations Management Cambridge Scholars Publishing

The British sportswriter goes inside some of Europe's best soccer clubs—from Bilbao to Bavaria and beyond—to reveal their winning secrets. In *The European Game*, Daniel Fieldsend travels across Europe to discover the methods for success used at some of the continent's biggest Football clubs—from Ajax, Juventus and Benfica to Bayern Munich, A.C Milan, Lyon, Athletic Bilbao and many more. At every stop, Fieldsend pulls back the curtain to reveal what makes each club tick, speaking to everyone from scouts and academy coaches to first team managers, analysts and board members. Insightful, ambitious and compelling, *The European Game* is about more than just a game. It's about community, identity and attachment. It explores leadership, tactics, coaching and scouting as well as politics, finance, fandom and culture. Celebrating the uniqueness of football clubs around the continent, it also investigates whether their methods can be replicated in other domestic leagues.

*Football Brands* Springer

This book contains peer-reviewed papers presented at the 10th International Conference on Energy Efficiency in Domestic Appliances and Lighting (EEDAL'19), held in Jinan, China from 6-8 November 2019. Energy efficiency helps to mitigate CO2 emissions and at the same time increases the security of energy supply. Energy efficiency is recognized as the cleanest, quickest and cheapest energy source. Not only this, but energy efficiency brings several additional benefits for society and end-users, such as lower energy costs, reduced local pollution, better outdoor and indoor air quality, etc. However, in some sectors, such as the residential sector, barriers to investments in energy efficiency remain. Legislation adopted in several jurisdictions (EU, Japan, USA, China, India, Australia, Brazil, etc.) helps in removing barriers and fosters investments in energy efficiency. These initiatives complement innovative financing schemes for energy efficiency, the provision of energy services by energy service companies and different types of information programs. At the same time, progress in appliance technologies and in solid state lighting offer high levels of efficiency. LED lighting is an example. As with previous conferences in this series, EEDAL'19 provided a unique forum to discuss and debate the latest developments in energy and environmental impact of households, including appliances, lighting, heating and cooling equipment, electronics, smart meters, consumer behavior, and policies and programs. EEDAL addressed non-technical issues such as consumer behavior, energy access in developing countries, and demand response.

**Future Security** Springer

The third edition of this clearly structured case book has been expanded and updated, and includes an introduction to the analysis of operations management cases. Key areas of operations management are dealt with, including new areas such as operations strategy, performance measurement and TPM.

*Applied Cyberpsychology* Springer

Not until the recent attacks on transport systems has transport security become a focus of public concern and academic research. Various aspects of transport security have already been analysed under different agendas. Some research was focused on the potential risk to the environment resulting from transport, in particular from the transport of hazardous or dangerous goods, while other research considered critical elements of transport networks or supply chains as vital lifelines in the case of natural disasters. Recently, new threats stimulated interest in transport security as a stand-alone issue, placing it at the forefront of political and academic agendas. A NATO Advanced Research Workshop held at Imperial College London in January 2009 brought together those with expertise in the above-mentioned fields in order to verify the current state of knowledge in the field and identify promising areas for future work. The workshop concentrated on maritime and intermodal transport, risk management and long-term strategic planning, rather than on the details of monitoring or detection techniques. This collection of papers emanates largely from that workshop. While transport systems are widely recognized as terrorist targets, complete protection of these systems is economically and practically infeasible. The workshop looked at analytical methods to identify critical points in the transport infrastructure and the prioritization of defensive and mitigating measures given the limited resources available. Deficiencies in methods for conducting such an assessment were identified and the need for cost-effective mitigation measures was emphasized.

**Architecture in London ...** Springer

This book provides readers with a timely snapshot of ergonomics research and methods applied to the design, development and prototyping—as well as the evaluation, training and manufacturing—of products, systems and services. Combining theoretical contributions, case studies and reports on technical

interventions, it covers a wide range of topics in ergonomic design including ecological design; cultural and ethical aspects in design; interface design, user involvement and human-computer interaction in design; as well as design for accessibility and many others. The book particularly focuses on new technologies such as virtual reality, state-of-the-art methodologies in information design, and human-computer interfaces. Based on the AHFE 2020 Virtual Conference on Ergonomics in Design, held on July 10–16, 2020, the book offers a timely guide for both researchers and design practitioners, including industrial designers, human-computer interaction and user experience researchers, production engineers and applied psychologists.

*Open Sources 2.0* Springer

Well written and thoughtful. Takes us on a tour of some of Europe's most innovative football thinkers - Financial Times The future of football is now. Football's data revolution has only just begun. The arrival of advanced metrics and detailed analysis is already reshaping the modern game. We can now fully assess player performance, analyse the role of luck and measure what really leads to victory. There is no turning back. Now the race is on between football's wealthiest clubs and a group of outsiders, nerds and rule-breakers, who are turning the game on its head with their staggering innovations. Winning is no longer just about what happens out on the pitch, it's now a battle taking place in boardrooms and on screens across international borders with the world's brightest minds driving for an edge over their fiercest rivals. Christoph Biermann has moved in the midst of these disruptive upheavals, talking to scientists, coaches, managers, scouts and psychologists in the world's major clubs, traveling across Europe and the US and revealing the hidden - and often jaw-dropping - truths behind the beautiful game. 'A book full of exciting ideas and inside views on modern football. The most exciting book in an exciting time for football.' Thomas Hitzlsperger
