Archaeological Theory An
Introduction
2nd Archaeology or
archeology is the study of
human activity through
the recovery and analysis
of material
culture. Archaeology is

often considered a branch
of socio-cultural
anthropology, but
archaeologists also draw
from biological,
geological, and
environmental systems
through their study of the
past. Archaeology -
Wikipedia An artifact, or
artefact (see American
and British English
spelling differences), is a
general term for an item
made or given shape by
humans, such as a tool or
a work of art, especially
an object of

archaeological interest. In
archaeology, the word has
become a term of
particular nuance and is
defined as an object
recovered by
archaeological endeavor,
which may be a cultural
artifact having ... Artifact
(archaeology) -
Wikipedia The scientific
method is an empirical
method of acquiring
knowledge that has
characterized the
development of science
since at least the 17th
century. It involves careful

observation, applying rigorous skepticism about what is observed, given that cognitive assumptions can distort how one interprets the observation. It involves formulating hypotheses, via induction, based on such observations ...Scientific method - Wikipedia Furthermore, the introduction of European literary styles to Japan sparked a boom in new works of prose fiction. Characteristic authors of the period included Futabatei Shimei and Mori Ōgai , [179]

although the most famous of the Meiji era writers was Natsume Sōseki , [180] who wrote satirical, autobiographical, and psychological novels [181 ...History of Japan - Wikipedia Ecological anthropology focuses upon the complex relations between people and their environment. Human populations have ongoing contact with and impact upon the land, climate, plant, and animal species in their vicinities, and these elements of their environment have reciprocal impacts on

humans (Salzman and Attwood 1996:169). Ecological anthropology investigates the ways that a population ...Ecological Anthropology - Anthropology Evolutionary Psychology. In its broad sense, the term “evolutionary psychology” stands for any attempt to adopt an evolutionary perspective on human behavior by supplementing psychology with the central tenets of evolutionary biology. The underlying idea is that since our mind is the way
