**Chapter 3 (States of Matter) Flashcards | Quizlet** Chapter 3 States Of MatterThe three states of matter are the three distinct physical forms that matter can take in most environments: solid, liquid, and gas. In extreme environments, other states may be present, such as plasma, Bose-Einstein condensates, and neutron stars. Further states, such as quark-gluon plasmas, are also believed to be possible.Three States of Matter | Introduction to ChemistrySolid, liquid, and gas are three states of matter.
