When the Iron Bird Flies Open Road Media

An untold story that reshapes our understanding of Chinese and Tibetan history From 1956 to 1962, devastating military conflicts took place in China's southwestern and northwestern regions. Official record at the time scarcely made mention of the campaign, and in the years since only lukewarm acknowledgment of the violence has surfaced. When the Iron Bird Flies, by Jianglin Li, breaks this decades long silence to reveal for the first time a comprehensive and explosive picture of the six years that would prove definitive in modern Tibetan and Chinese history. The CCP referred to the campaign as "suppressing the Tibetan rebellion." It would lead to the 14th Dalai Lama's exile in India, as well as the Tibetan diaspora in 1959, though the battles lasted three additional years after these events. Featuring key figures in modern Chinese history, the battles waged in this period covered a vast geographical region. This book offers a portrait of chaos, deception, heroism, and massive loss. Beyond the significant death toll across the Tibetan regions, the war also destroyed most Tibetan monasteries in a concerted effort to eradicate local religion and scholarship. Despite being considered a military success, to this day, the operations in the agricultural regions remain unknown. As large numbers of Tibetans have self-immolated in recent years to protest Chinese occupation, Li shows that the largest number of cases occurred in the sites most heavily affected by this hidden war. She argues persuasively that the events described in this book will shed more light on our current moment, and will help us understand the unrelenting struggle of the Tibetan people for their freedom.

Dating the Old Testament addresses the subject of when the books of the Bible were written. It explains why the books of Genesis through Deuteronomy are a literary unity, and how the Egyptian background for these books support a date of writing during the exodus generation. It provides a detailed critique of the Documentary Hypothesis, the theory that Genesis through Joshua were created from four different sources usually labelled J, E, D, and P. It provides extensive evidence that all of Isaiah was written by Isaiah himself, and shows why Isaiah may have had a role in the collection and publication of other Old Testament books. It describes why the book of Daniel should be considered a product of the early Persian era and not the much later Maccabean period. The book contains a discussion of how the Hebrew language changed during the Old Testament era, and how this can be used to help date the books of the Old Testament.

This remarkable expression of radical republican thought has never before been published. Algernon Sidney was among the most unrelenting partisans of the parliamentary party during the Commonwealth, and died on the scaffold in 1683 for his opposition to Charles II. Sidney's voluminous Discourses Concerning Government was published after his death, but the earlier and more vivid Court Maxims was only recently rediscovered in a manuscript in Warwick Castle. Written during Sidney's continental exile, Court Maxims is of the greatest importance for the study of the international ramifications of seventeenth-century republican thought. Its dialogue structure presents a lively discussion about the principles of government and the practice of politics, articulating a vital tradition of republicanism in an age of absolutism. These characteristics make Court Maxims a unique text, essential reading for anyone interested in republicanism or early modern political thought.

The suicidal proclivity of our time, writes the acclaimed philosopher J. Budziszewski, is to deny the obvious. Our hearts are riddled with desires that oppose their deepest longings, because we demand to have happiness on terms that make happiness impossible. Why? And what can we do about it? Budziszewski addresses these vital questions in his brilliantly persuasive new book, The Line Through the Heart. The answers can be discovered in an exploration of natural law—a venture that, with Budziszewski as our expert guide, takes us through politics, religion, ethics, law, philosophy, and more. Natural law, the author states plainly but provocatively, is a fact about human beings; as surely as we have hands and feet, we have the foundational principles of good and evil woven into the fabric of our minds. From this elemental fact emerges a natural law theory that unfolds as part of a careful study of the human person. Thus, Budziszewski shows, natural law forms a common ground for humanity. But this common ground is slippery. While natural law is truly an observable part of human nature, human beings are hell-bent—quite literally—on ignoring it. The mere mention of the obligations imposed on man by his nature will send him into a rage. In this sense, The Line Through the Heart explores natural law as not

simply a fact and a theory but also a sign of contradiction. While investigating the natural law and its implications, Budziszewski boldly confronts—and offers a newly integrated view of—a wide range of contemporary issues, including abortion, evolution, euthanasia, capital punishment, the courts, and the ersatz state religion being built in the name of religious toleration. Written in Budziszewski's usual crystalline style, The Line Through the Heart makes clear that natural law is a matter of concern not merely to scholars; it touches how each of us lives, and how all of us live together. His profoundly important examination of this subject helps us make sense of why habits that run against our nature have become second nature, and why our world seems to be going mad.

Over one hundred and fifty years ago, on 1st August 1871, the Colony of New South Wales raised its first permanent Battery, known as the New South Wales Artillery. This battery complemented existing colonial volunteer batteries. The previous year, the last British forces had departed for England, leaving the young, dynamic colonies across Australia to uphold their own defences. This occasion marked the origins of the substantive, permanent presence of professional Australian artillery soldiers – a presence that endures to this day as the Royal Regiment of Australian Artillery. In the years that have followed, Australian Gunners have served their country in war and in peace; abroad, and in the defence of their homeland, with honour and dedication, and will continue to do so into the future. 1st August 2021 marked a century and a half of unbroken dedication in the service of our community and the Nation by Australia's Gunners – Volunteer, Militia, Reserve, Permanent and Regular; at home, and in far-off lands; defending assaults from the sea, in the sky, and on land; and advising, defending and supporting our comrades-in-arms through summoning and orchestrating devastating fires and effects that are accurate, responsive, dependable & joint. These are, and will remain, the tenets of the Royal Regiment of Australian Artillery in all its forms. This is the story of Australia's Gunners – so far.

Real World Application of the Judeo-Christian faith for the Military, Intelligence, and Law Enforcement communities. Principles and guidelines for those serving in all nations and cultures. The Lord God says "Thou shalt not kill", yet kill we do. Cain killed Abel. Criminals steal, destroy, and kill. Soldiers kill the enemy. The enemy kills us. Then comes the day you pull the trigger and send someone into eternity. You did what must be done. Some say it had to be done, but you still sinned. Others say it's all a sin and should not be done it all. But, where does that leave you? This book has the answers.

Is "Thou shalt not kill" really that cut and dry? Are there Biblical precedents or provisions for Christians to do what is necessary in the line of duty without sinning? Is doing your duty, to God and Country, the dirty work, really a sin? No, it's just the opposite. What God authorizes and the support He provides will surprise, encourage, and empower you. *Minsters of Vengeance* Gives Biblical guidance during undercover ops: for lying, stealing, sabotage, and more. Looks at subjects like lethal force authority, and different religious views of warfare. Draws a blueprint for prayer and a covenant mindset toward the enemy and for yourself. Discusses PTSD; concepts of mental, emotional and physical healing, help, and prevention. Examines spiritual gifts and help from the Holy Spirit and angels for the dirty work. Tackles the Problem of Evil and presents a Biblical Just War Theory or Doctrine of Violence. *Pro Deo Et Patria (For God and Country)*

This fully updated and comprehensive 3rd edition of *The Law of Ship Mortgages* provides readers with a practical, commercially based and definitive guide to the English law of ship mortgages. The authors, being seasoned practitioners, bring their extensive experience to bear on a number of difficult and developing areas of the law, such as: mortgagees' duties, liability to charterers, the conflict of laws, work-outs, restructurings and cross-border insolvency. The 3rd edition includes new chapters on pre-delivery security, security over shares and on the increasingly important topic of ship leasing as a method of finance. It is written against the background of, and has regard to, ever-increasing sanctions affecting shipping and ship finance as well as the continued regulatory and industry-driven push towards reduction of emissions (IMO 2020 and IMO 2050). Written primarily with practitioners in mind, *The Law of Ship Mortgages* will continue to be extremely useful to legal professionals, especially in common law jurisdictions, involved in international ship finance or ship mortgage enforcement. It will also be a valuable resource for postgraduate students and academics, especially those with an interest in shipping law or the law of personal property more generally.

Most people strongly condemn terrorism; yet they often fail to say how terrorist acts differ from other acts of violence such as the killing of civilians in war. Stephen Nathanson argues that we cannot have morally credible views about terrorism if we focus on terrorism alone and neglect broader issues about the ethics of war. His book challenges influential views on the ethics of war, including the realist view that morality does not apply to war, and Michael Walzer's defence of attacks on civilians in 'supreme emergency' circumstances. It provides a clear definition of terrorism, an analysis of what

makes terrorism morally wrong, and a rule-utilitarian defence of noncombatant immunity, as well as discussions of the Allied bombings of cities in World War II, collateral damage, and the clash between rights theories and utilitarianism. It will interest a wide range of readers in philosophy, political theory, international relations and law.

The author seeks to clarify early Quaker views and explain how Friends came to differ so significantly in their beliefs from other English Protestants. By examining the Baptist-Quaker relationship in particular, he is able both to identify a primary link between the two and, at the same time, discover explanations for some of their dramatic differences. He draws on scores of previously unused tracts and manuscripts produced by the Baptist-Quaker disputes - materials which, in setting forth accusations, clarifications, and rebuttals, shed new light on the beliefs of the antagonists.
