A gripping historical crime debut from an exciting new voice.'It's strange, the way fortune deals her hand.' The year is 1759 and London is shrouded in a cloak of fear. With the constables at the mercy of highwaymen, it's a perilous time to work the already dangerous streets of Soho. Lizzie Hardwicke makes her living as a prostitute, somewhat protected from the fray as one of Mrs Farley's girls. But then one of her wealthy customers is found brutally murdered... and Lizzie was the last person to see him alive. Constable William Davenport has no hard evidence against Lizzie but his presence and

questions make life increasingly difficult. Desperate to be rid of him and prove her innocence Lizzie turns amateur detective, determined to find the true killer, whatever the cost. Yet as the body count rises Lizzie realises that, just like her, everyone has a secret they will do almost anything to keep buried... Praise for Death and the Harlot 'The hungers, musk, lust, and gorgeous depravity of 1759 London spiral to life in Death and the Harlot, Georgina Clarke's utterly seductive sleight of hand... An achingly alive historical mystery' Reader review 'Fast paced page turner! Lizzie is the type of unique heroine

that you can't help fall in love with. Her wit combined with a touch of sass has you rooting for her with each chapter' 5* Reader review 'Excellent book. I stayed up till 3:30 in the morning to finish this. I could not put it down. Lizzie Hardwicke is a prostitute who's last client ends up dead. She's smart, observant and sassy. I adored her...I wholeheartedly recommend this book' 5* Reader review 'Georgina Clarke has a hit on her hands' 5* Reader review 'I absolutely loved this book! Lizzie is not your usual heroine but she's smart, quick and I thought she was fabulous' 5* Reader review 'A gripping page-turner with a sassy and fabulously original heroine in the form of Lizzie Hardwicke - I loved it!' Annie Lyons 'From sumptuous depravity to brutal murder, *Death and the Harlot* is a wild ride through the seedy side of 1750s London, while its heroine, Lizzie Hardwicke, is razor sharp and brilliantly original. I couldn't put it down' Joe Heap 'Atmospheric and full of authentic details about (the oft-neglected but wonderfully complex) eighteenth-century London, Clarke's debut is told from the perspective of a young woman who looks unflinchingly at her world - with all its depravity and

discord - in order to carve out a situation that allows her to retain her humanity, her humour, and her own particular brand of honour. Brava to this new, engaging voice and her strong woman protagonist!' Karen Odden, author of *A Lady in the Smoke* PHI Learning Pvt. Ltd.

 Trends such as shifting dietary patterns and an increasingly sedentary lifestyle combined with smoking and alcohol consumption are major risk factors for noncommunicable chronic diseases such as obesity, diabetes, cardiovascular diseases such as hypertension and stroke,

cancer dental diseases and osteoporosis. This report reviews the scientific evidence on the effects of diet, nutrition and physical activity on chronic diseases and makes recommendations for public health policies and programmes. Issues considered include the macro-economic implications of public health on agriculture and the global supply and demand for fresh and processed foods.

 The first epic poem written in Italian is the *Teseida delle nozze di Emilia* (Theseid of the Nuptials of Emilia) by Giovanni Boccaccio, the well-known author of the *Decameron*. Conceived and composed during the Florentine author's stay in Naples, it combines masterfully both epic and lyric themes in a genre that may be defined as an epic of love. Besides its intrinsic literary value, the poem reflects the author's youthful emotions and nostalgia for the happiest times of his life.

 Introduction to Solid State Physics, in its Second Edition, provides a comprehensive introduction to the physical properties of crystalline solids. It explains the structure

of crystals, theory of crystal diffraction and the reciprocal lattice. As the book advances, it describes different kinds of imperfections in crystals, bonding in solids, and vibration in one-dimensional monoatomic and diatomic linear lattice. Different theories of specific heat, thermal conductivity of solids and lattice thermal conductivity are thoroughly dealt with. Coverage also includes the free electron theory, band theory of solids and semiconductors. In addition, the book also describes in detail the magnetic properties of solids and superconductivity. Finally, the book includes discussions on lasers, nanotechnology and the basic principles of fibre optics and holography. Some new topics like cellular method, quantum Hall effect, de Haas van Alphen effect, Pauli paramagnetism and semiconductor laser have been added in the present edition of the book to make it more useful for the students. The book is designed to meet the requirements of undergraduate and postgraduate students of physics for their courses in solid state physics, condensed matter physics and material science. **KEY FEATURES** • Puts a conceptual emphasis on the subject. • Includes numerous

diagrams and figures to clarify the concepts. • Gives step-by-step explanations of theories. • Provides chapter-end exercises to test the knowledge acquired.

Biochar is the carbon-rich product when biomass (such as wood, manure or crop residues) is heated in a closed container with little or no available air. It can be used to improve agriculture and the environment in several ways, and its stability in soil and superior nutrient-retention properties make it an ideal soil amendment to increase crop yields. In addition to this, biochar sequestration, in combination with sustainable biomass production, can be carbon-negative and therefore used to actively remove carbon dioxide from the atmosphere, with major implications for mitigation of climate change. Biochar production can also be combined with bioenergy production through the use of the gases that are given off in the pyrolysis process. This

book is the first to synthesize the expanding research literature on this topic. The book's interdisciplinary approach, which covers engineering, environmental sciences, agricultural sciences, economics and policy, is a vital tool at this stage of biochar technology development. This comprehensive overview of current knowledge will be of interest to advanced students, researchers and professionals in a wide range of disciplines.

Introduction to Modern Economic Growth is a groundbreaking text from one of today's leading economists. Daron Acemoglu gives graduate students not only the tools to analyze growth and related macroeconomic problems, but also the broad perspective needed to apply those tools to the big-picture questions of

growth and divergence. And he introduces the economic and mathematical foundations of modern growth theory and macroeconomics in a rigorous but easy to follow manner. After covering the necessary background on dynamic general equilibrium and dynamic optimization, the book presents the basic workhorse models of growth and takes students to the frontier areas of growth theory, including models of human capital, endogenous technological change, technology transfer, international trade, economic development, and political economy. The book integrates these theories with data and shows how theoretical approaches can lead to better perspectives on the fundamental causes of economic growth and the wealth of nations. Innovative and authoritative, this book is likely to shape how economic growth is taught and learned for years to come. Introduces all the foundations for understanding economic growth and dynamic macroeconomic analysis Focuses on the big-picture questions of economic growth Provides mathematical foundations Presents dynamic general equilibrium Covers models such as basic Solow,

neoclassical growth, and overlapping generations, as well as models of endogenous technology and international linkages Addresses frontier research areas such as international linkages, international trade, political economy, and economic development and structural change An accompanying Student Solutions Manual containing the answers to selected exercises is available (978-0-691-14163-3/\$24.95). It was the easiest £3,000 Nelson Ryan had ever made - but suddenly he realised he was being played for a sucker. A telephone call, seemingly innocent enough, led him to the murder of a Chinese call-girl who talked too much. It also pitched him straight into the teeming, sordid night life of colourful Hong Kong. From now on, Ryan would stick at nothing to get the killer who'd crossed him up.
