Governments fail to provide the public goods needed for development when its leaders knowingly and deliberately ignore sound technical advice or are unable to follow it, despite the best of intentions, because of political constraints. This report focuses on two forces—citizen engagement and transparency—that hold the key to solving government failures by shaping how political markets function. Citizens are not only queuing at voting booths, but are also taking to the streets and using diverse media to pressure, sanction and select the leaders who wield power within government, including by entering as contenders for leadership. This political engagement can function in highly nuanced ways within the same formal institutional context and across the political spectrum, from autocracies to democracies. Unhealthy political engagement, when leaders are selected and sanctioned on the basis of their provision of private benefits rather than public goods, gives rise to government failures. The solutions to these failures lie in fostering healthy political engagement within any institutional context, and not in circumventing or suppressing it. Transparency, which is citizen access to publicly available information about the actions of those in government, and the consequences of these actions, can play a crucial role by nourishing political engagement.

The change management profession is no longer in its infancy. Readily identifiable in organizations and in business literature it is no longer reliant on parent disciplines such as organizational development or

project management. Change management is itself in a state of change and growth - the number of jobs is increasing and organizations are actively seeking to build their change management capability. The Effective Change Manager's Handbook, the official guide to the CMI Body of Knowledge, is explicitly designed to help practitioners, employers and academics define and practice change management successfully and to develop change management maturity within their organization. A single-volume learning resource covering the range of underpinning knowledge required, it includes chapters from esteemed and established thought leaders on topics ranging from benefits management, stakeholder strategy, facilitation, change readiness, project management and education and learning support. Covering the whole process from planning to implementation, it offers practical tools, techniques and models to effectively support any change initiative.

Harnessing Transparency and Citizen Engagement Microsoft Press
Combining rigour and flexibility, MSP helps all organisations - public sector and private, large and small - achieve successful outcomes from their programme management time and time again. With change a pressing reality for all organisations, successful programme

management has never been more vital to success. Organisations must respond as new processes or services are introduced, supplier relationships alter and structures adapt to market forces or legislation. At the same time, all organisations strive to achieve excellence by improving practices, offering better services, preparing more effectively for the future and encouraging innovation. But change always creates new challenges and risks. Inevitably there will be interdependencies to manage and conflicting priorities to resolve as the organisation adapts not just to a new situation internally but to the constantly shifting world outside. To enable organisations to manage their programmes successfully, they need a structured framework that does two things. It must acknowledge that every programme exists in its own context and demands unique interpretation. At the same time it must be universally applicable. MSP has been developed with these two priorities in mind. Its framework allows users to consistently manage a huge variety of programmes so that they deliver quality outcomes and lasting benefits. Fusing leadership with management best practice, MSP enables organisations to coordinate their key functions, develop a clear sense of unity and purpose and achieve the strategic cohesion necessary to drive through effective change
