It is one of the ironies of Soviet tank development that a country opposed to free enterprise and capitalism was largely reliant on influences from Britain and the USA for many of its early designs. However, unhindered by many of the tactical constraints that affected tank development in the West, the Red Army was able to acquire and develop technology that was under-rated in both Britain and the USA. From Britain, the famous manufacturer Vickers produced a Six-Ton light tank; effectively rejected by the War Office, one example was acquired by the Russians and this formed the basis of the Russian T-26 of 1931. Further British designs also influenced the later light tanks, equipment which was pivotal to the Red Army during its campaigns in Manchuria, Finland and against the initial German assault in 1941. In the USA, Walter Christie was also largely ignored as a designer but, as with Vickers, his designs came to be highly important. His influence was seen in the 'BT' - short for 'Bystrochodri' or 'Fast Tank' - series of light-medium tanks that was first introduced in 1932. The BT series saw service in Spain, Manchuria, Finland and in the defense of Russia itself in 1941. The critical aspect of the Christie design was that the vehicles were capable of operating

both with nor without tracks; in the latter case eight road wheels carried the weight of the vehicle, with steering being achieved via a steering wheel acting in conjunction with the clutch/brake system. In the second of the new 'Soviet Tanks' series, Mikhail Baryatinsky provides the reader with a comprehensive account of the development and operational record of Soviet light tanks. Utilizing photographs, line drawings and specially prepared artworks, he provides a detailed portrait of these highly successful tanks. Aimed at the modeler, military historian and war gamer, the new 'Soviet Tanks' series is designed to provide, probably for the first time in the English language, authoritative information on the classic Soviet tank designs of the 20th century. The series will be required reading for all those interested in the development of armored warfare over the past 100 years.

Planning Educational Facilities Haynes Manuals N. America, Incorporated

In 1922 Rolls-Royce introduced their new 20hp model, known as the Twenty, the first in a family of what are now called the "Small Horsepower" cars. The plan was to offer a more manageable, less expensive model than the mighty 7-litre Silver Ghost, one intended for the owner-driver rather than for the chauffeur, yet with all the quality and refinement of the bigger cars. The Twenty and its succeeding models was a success. All these models enjoy a very strong following today. More than 10,000 were made, and many survive today. These cars had an astounding range of coachwork types and styles by practically every coachbuilder in Britain along with many in Europe, the United States and elsewhere, many examples are illustrated in this book. After outlining the development of Rolls-Royce's project for a smaller car, the author provided a detailed technical description of the Twenty,. For owners, present and prospective, there are chapters on using the cars today and on the practicalities of ownership, including advice on parts availability, maintenance and preservation.. It is illustrated with some 70 color and 150 black-and-white photographs.

Ransom Eli Olds was best known as the inventor of the Oldsmobile. In 1904 Olds was unsatisfied and left the company, which left time to help create the new company bearing his initials, the REO Motor Car Company, in Lansing, Michigan. In 1910, the REO Motor Truck Company began the production of

trucks. REO's legendary Speed Wagon led the way with shaft-drive, pneumatic tires, electric starters, and electric lights; features found on all competitive makes. By July 1925, REO Speed Wagon sales, since its introduction, exceeded 125,000. REO sought to create a work environment that stressed "family". A Welfare department existed and a variety of activities were available to employees and their families, including indoor baseball and basketball teams and a REO Rifle Club. The patriotic REO company produced nearly 29,000 military vehicles from 1940 through 1945. This book covers the story of REO Trucks through archival photographs to the time when the White Motor Company purchased REO in 1957.
