[The Interpersonal Communication Book](#) Addison Wesley Longman

'The publication of Martin Buber's I and Thou was a great event in the religious life of the West.' Reinhold Niebuhr Martin Buber (1897-19) was a prolific and influential teacher and writer, who taught philosophy at the Hebrew University in Jerusalem from 1939 to 1951. Having studied philosophy and art at the universities of Vienna, Zurich and Berlin, he became an active Zionist and was closely involved in the revival of Hasidism. Recognised as a landmark of twentieth century intellectual history, I and Thou is Buber's masterpiece. In this book, his enormous learning and wisdom are distilled into a simple, but compelling vision. It proposes nothing less than a new form of the Deity for today, a new form of human being and of a good life. In so doing, it addresses all religious and social dimensions of the human personality. Although sexuality is an integral part of close romantic relationships, research linking these two constructs has been less systematic than other areas pertaining to close relationships. To date, researchers in communication, sociology, family studies, psychology, and psychiatry, have made significant advances in both of these fields. The editors' goal is to integrate this research into one volume. They bring together major scholars from the diversity of fields working on close relationship topics to examine past contributions and new directions in sexuality. The emphasis is on theoretical integration and stimulation, methodological rigor, and critical analysis. This volume explores: *early sexual experiences and their impact on late life sexuality; *how life's stresses impact sexuality and satisfaction with closeness; *the affect of postpartum depression on sexuality; and *the relationship between control, power, anger, as well as revenge and sexual processes in couples. *The Handbook of Sexuality in Close Relationships* is intended for students and researchers in the disciplines of social, clinical, developmental, and health psychology; family studies; counseling; and interpersonal, family, and health communication. An excellent reference in advanced courses in close relationships taught in psychology, communications, sociology, anthropology, and family studies, the material in Part V will also appeal to clinical psychologists, health professionals, and policymakers.

Equivocation, non-straightforward communication which includes messages that are ambiguous, indirect, contradictory or evasive, is highlighted as an important phenomenon in this volume. The authors show how equivocation can be measured with a scaling method that offers an objective assessment of the amount and kind of equivocation that exist in a message and which can be used in a variety of research programmes. Several hundred experiments, with a wide range of subjects - from children to politicians - support the theory that equivocations occur only in situations where all direct messages would lead to negative consequences, and that communication is dependent more on situations than on individuals.
