 Very nice Boat interior, wood
 work Fiberglass boat construction is when
 the major components of the boat—the
 hull, deck, liner, and large parts like
 consoles—are molded from fiberglass.
 The mold is first sprayed with gelcoat,
 then fiberglass cloth is applied, and then
 resin is used to saturate or “wet out” the
 fiberglass. When the resin cures, you
 have a hull. Resin and cores make up a
 large part of the construction. There are
 three types of resins: polyester,

vinylester and epoxy. Boat Building: Basic Construction of Resin, Fiberglass ... We offer full service restoration options, both interior and exterior, to help you clean up your boat.
