*The Albany Congress of 1754* World Health Organization

A concise history of Panama, spanning the period of its colonization by the Spanish to the present day.

*Antietam* Columbia University Press  
On the seventy-fifth anniversary of the United Nations, the world has faced its biggest shared test since the Second World War in the coronavirus disease (COVID-19) pandemic. Yet while our welfare, and indeed the permanence of human life, depend on us working together, international cooperation has never been harder to achieve. This report answers a call from UN Member States to provide recommendations to advance our common agenda and to respond to current and future challenges. Its proposals are grounded in a renewal of the social contract, adapted to the challenges of this century, taking into account younger and future generations, complemented by a new global deal to better protect the

global commons and deliver global public goods. Through a deepening of solidarity—at the national level, between generations, and in the multilateral system—Our Common Agenda provides a path forward to a greener, safer and better future.

### Democracy and the Modern World

University of Pennsylvania Press  
On the eve of the Seven Years' War in North America, the British crown convened the Albany Congress, an Anglo-Iroquois treaty conference, in response to a crisis that threatened imperial expansion. British authorities hoped to address the impending collapse of Indian trade and diplomacy in the northern colonies, a problem exacerbated by uncooperative, resistant colonial governments. In the first book on the subject in more than forty-five years, Timothy J. Shannon definitively rewrites the historical record on the Albany Congress. Challenging the received wisdom that has equated the Congress and the plan of colonial union it produced with the origins of American independence, Shannon demonstrates conclusively the Congress's importance in the wider context of Britain's eighteenth-century Atlantic empire. In the process, the author poses a formidable challenge to the Iroquois Influence Thesis. The Six Nations, he writes, had nothing to do with the drafting of the Albany Plan, which borrowed its model of constitutional union not from the Iroquois but from the colonial delegates' British cousins. Far from serving as a dress rehearsal for the Constitutional Convention, the Albany Congress marked, for colonists and Iroquois alike, a passage from an independent, commercial pattern of intercultural relations to a hierarchical, bureaucratic imperialism wielded by a distant authority.

In *Empire's Crossroads*, Carrie Gibson offers readers a vivid, authoritative and action-packed history of the Caribbean. For Gibson, everything was created in the West Indies: the Europe of today, its financial foundations built with sugar

money: the factories and mills built as a result of the work of slaves thousands of miles away; the idea of true equality as espoused in Saint Domingue in the 1790s; the slow progress to independence; and even globalization and migration, with the ships passing to and fro taking people and goods in all possible directions, hundreds of years before the term 'globalization' was coined. From Cuba to Haiti, from Dominica to Martinique, from Jamaica to Trinidad, the story of the Caribbean is not simply the story of slaves and masters - but of fortune-seekers and pirates, scientists and servants, travellers and tourists. It is not only a story of imperial expansion - European and American - but of global connections, and also of life as it is lived in the islands, both in the past and today.

The volume describes the worldwide state of the HIV/AIDS epidemic and possible ways forward. Marking the 30 years of AIDS, the report takes stock of the changes occurred in the AIDS epidemic and responses since the condition was first diagnosed in 1981. It also features commentaries from 15 leaders in the global AIDS response, including South Africa's President Jacob Zuma, former United States President Bill Clinton, former President of Brazil Luiz Inácio Lula da Silva, singer Angelique Kidjo and former UN Secretary-General Kofi Annan. It covers a wide range of areas, including the results achieved by HIV prevention efforts, the record number of people starting lifesaving treatment and the decline in resources for HIV. It also draws attention to the significant challenges remaining such as the gender inequalities and the increasing HIV prevalence among key populations at higher risk of infection.

The U.S.-Mexico borderlands have long supported a web of relationships that transcend the U.S. and Mexican nations. While national histories have tended to overlook these complex connections, *Continental Crossroads* rewrites borderlands history by focusing on them.

The contributors to this collection chronicle the transnational processes that bound Mexico and the United States together during the borderlands' formative era—from the early nineteenth century into the 1940s. Book jacket.

The objective of this Symposium is to identify pathways to strengthen the science and policy interplay in fisheries production, management and trade, based on solid sustainability principles for improved global outcomes on the ground. Ultimately, the debates and conclusions of the symposium will prepare the way for the development of a new vision for the way we perceive and use capture fisheries, outlining how the sector can respond to the complex and rapidly changing challenges facing society, and support the planning process of the UN Decade of Ocean Science for Sustainable Development (2021-2030).

Its opponents call it part of "the lunatic fringe," a justification for "black separatism," "the most embarrassing trend in American publishing." "It" is Critical Race Theory. But what is Critical Race Theory? How did it develop? Where does it stand now? Where should it go in the future? In this volume, thirty-one CRT scholars present their views on the ideas and methods of CRT, its role in academia and in the culture at large, and its past, present, and future. Critical race theorists assert that both the procedures and the substance of American law are structured to maintain white privilege. The neutrality and objectivity of the law are not just unattainable ideals; they are harmful actions that obscure the law's role in protecting white supremacy. This notion—so obvious to some, so

unthinkable to others—has stimulated and divided legal thinking in this country and, increasingly, abroad. The essays in *Crossroads*, *Directions*, and *A New Critical Race Theory*—all original—address this notion in a variety of helpful and exciting ways. They use analysis, personal experience, historical narrative, and many other techniques to explain the importance of looking critically at how race permeates our national consciousness.

In order for the United States to maintain the global leadership and competitiveness in science and technology that are critical to achieving national goals, we must invest in research, encourage innovation, and grow a strong and talented science and technology workforce. Expanding Underrepresented Minority Participation explores the role of diversity in the science, technology, engineering and mathematics (STEM) workforce and its value in keeping America innovative and competitive. According to the book, the U.S. labor market is projected to grow faster in science and engineering than in any other sector in the coming years, making minority participation in STEM education at all levels a national priority. Expanding Underrepresented Minority Participation analyzes the rate of change and the challenges the nation currently faces in developing a strong and diverse workforce. Although minorities are the fastest growing segment of the population, they are underrepresented in the fields of science and engineering. Historically, there has been a strong connection between increasing educational attainment in the United States and the growth in and global leadership of the economy. Expanding Underrepresented Minority Participation suggests that the federal government, industry, and post-secondary institutions work collaboratively with K-12 schools and school systems to increase minority access to and demand for post-secondary STEM education and technical training. The book also identifies best practices and offers a comprehensive road map for increasing involvement of underrepresented minorities and improving the quality of their education. It offers recommendations that focus on academic and social support, institutional roles, teacher preparation, affordability and program development.

*Crossroads, Directions and A New Critical Race Theory* Oxford University Press  
In the darkening years of the 1930s, beautiful Madame Lambert meets

American diplomat Dexter Jones at the Quai d'Orsay. She works on the staff of French Premier Pierre Laval. Dedicated to her work, the austere widow resists romance while becoming increasingly intrigued with the charming diplomat as he escorts her to political and literary salons across the vibrant Left Bank cultural scene. Romance ripens into enduring commitment against a backdrop of momentous historical events as the French government attempts to contain the Ethiopian crisis at the League of Nations while countering the rising Nazi threat to remilitarize the German Rhineland. Madame Lambert witnesses first-hand the British-French diplomatic meetings between Premier Laval and British foreign secretary Sir Samuel Hoare that collapse in controversy over ending the Italo-Ethiopian war. Shortly afterwards, she is in the room when the French government bogs down with indecision over responding to Hitler's march into the Rhineland, the key to preserving France's alliances with its East European allies. Cameo appearances by Colonel Charles DeGaulle, Andr Malraux, Sylvia Beach, Adrienne Monnier, Andr Chamson, and journalists Genevieve Tabouis and Pertinax. An endearing romance set amidst the tumultuous political and diplomatic events of Europe caught in the throes of the gathering storm of World War II.

[A Meeting of Nations : Global Transformations : what Brought Change in Europe and North America?](#) BRILL

In the late nineteenth century the borderlands between the United States, the British Empire in Canada, and the Asia-Pacific Rim emerged as a crossroads of the Pacific world. In *Pacific Connections*, Kornel Chang tells the dramatic stories of the laborers, merchants, smugglers, and activists who crossed these borders into the twentieth century, and the American and British empire-builders who countered them by hardening racial and national lines. But even as settler societies attempted to control the processes of imperial integration, their project fractured under its contradictions. Migrant workers and radical activists pursued a transnational politics through the very networks that made empire possible. Charting the U.S.-Canadian borderlands from above and below, Chang reveals the messiness of imperial formation and the struggles it spawned from multiple locations and through different actors across the Pacific world. *Pacific Connections* is the winner of the Outstanding Book in History award from the Association for Asian American Studies

and is a finalist for the John Hope Franklin Book Prize from the American Studies Association.

Against the backdrop of China's mounting influence and North Korea's growing nuclear capability and expanding missile arsenal, South Korea faces a set of strategic choices that will shape its economic prospects and national security. In *South Korea at the Crossroads*, Scott A. Snyder examines the trajectory of fifty years of South Korean foreign policy and offers predictions—and a prescription—for the future. Pairing a historical perspective with a shrewd understanding of today's political landscape, Snyder contends that South Korea's best strategy remains investing in a robust alliance with the United States. Snyder begins with South Korea's effort in the 1960s to offset the risk of abandonment by the United States during the Vietnam War and the subsequent crisis in the alliance during the 1970s. A series of shifts in South Korean foreign relations followed: the "Nordpolitik" engagement with the Soviet Union and China at the end of the Cold War; Kim Dae Jung's "Sunshine Policy," designed to bring North Korea into the international community; "trustpolitik," which sought to foster diplomacy with North Korea and Japan; and changes in

South Korea's relationship with the United States. Despite its rise as a leader in international financial, development, and climate-change forums, South Korea will likely still require the commitment of the United States to guarantee its security.

Although China is a tempting option, Snyder argues that only the United States is both credible and capable in this role. South Korea remains vulnerable relative to other regional powers in northeast Asia despite its rising profile as a middle power, and it must balance the contradiction of desirable autonomy and necessary alliance.

"In addition to assessing existing conditions and knowledge, the IAASTD uses a simple set of model projections to look at the future, based on knowledge from past events and existing trends such as population growth, rural/urban food and poverty dynamics, loss of agricultural land, water availability, and climate change effects. This set of volumes comprises the findings of the IAASTD. It consists of a Global Report, a brief Synthesis Report, and 5 subglobal reports. Taken as a whole,

the IAASTD reports are an indispensable reference for anyone working in the field of agriculture and rural development, whether at the level of basic research, policy, or practice."--BOOK JACKET. *At a Crossroads* Pan Macmillan

In *Building Community Food Webs*, Ken Meter shows how grassroots leaders across the U.S. are constructing civic networks to create healthier and more equitable food systems. Overturning extractive economic structures, these inspired food leaders are engaging low-income residents, farmers, and local organizations in their quest to build stronger communities. Network-building takes a variety of forms and arises out of multiple activities. Farmers and researchers may convene to improve farming practices collaboratively. Food banks engage their clients to challenge the root causes of poverty. Municipalities invest large sums to protect farmland from development. *Building Community Food Webs* captures the essence of these efforts, and offers pragmatic insights for community food leaders anywhere.
