Annual Report on Exchange Arrangements and Exchange Restrictions 2017 Canadian Scholars
Indonesia's criminal law system faces major challenges. Despite the country's transition to democracy, both the Criminal Code and the Criminal Procedure Code are badly out of date, the former only superficially changed since colonial times and the latter remaining as it was under Soeharto's authoritarian New Order regime. Law enforcement officers and judges are widely seen as corrupt or incompetent, and new laws, including new Islamic laws passed at the regional level, often contradict the Criminal Code and national statutes, including human rights laws. This book, based on extensive original research by leading scholars in the field, provides an overall assessment of the state of criminal law, law enforcement and penal policy in Indonesia, considers in depth a wide range of specific areas of criminal law, and discusses recent efforts at reform and their prospects for success.

The Congressional-Executive Commission on China is tasked with monitoring China's compliance with human rights, particularly those contained in the International Covenant on Civil and Political Rights and in the Universal Declaration of Human Rights, as well as monitoring the development of the rule of law in China. As part of its mandate, the Commission issues an annual report every October, covering the preceding 12-month period and including recommendations for U.S. legislative or executive action. This volume contains the 2016 report.

Financing SMEs and Entrepreneurs 2016 An OECD Scoreboard Pearson UK

Excerpt from Charting a Course: Strategic Choices for a New Administration: The new administration takes office in a time of great complexity. Our new President faces a national security environment shaped by strong currents: globalization; the proliferation of new, poor, and weak states, as well as nonstate actors; an enduring landscape of violent extremist organizations;

slow economic growth; the rise of China and a revanchist Russia; a collapsing Middle East; and a domestic politics wracked by division and mistrust. While in absolute terms the Nation and the world are safer than in the last century, today the United States finds itself almost on a permanent war footing, engaged in military operations around the world. [...] No formal document describes a grand strategy for the United States, and indeed, many academics deny that one exists. Yet a close look at our history as a world power suggests that core interests and how we secure them have remained generally consistent over time. If grand strategy "rises above particular strategies intended to secure particular objectives," many decades of focusing on nuclear deterrence, power projection, alliances and partnerships, and military and economic strength probably constitute the underpinnings of a coherent grand strategy. How we employ and leverage these instruments of national power to protect, defend, and advance the national interest is, after all, the essence of grand strategy. In a dangerous world, these pillars have provided a strong foundation for national security. If our domestic politics can achieve consensus on future threats and solutions, America is well positioned to lead and prosper in a world that will remain both dangerous and uncertain. R.D. Hooker, Jr. Director, Institute for National Strategic Studies National Defense University Washington, D.C. Second International Handbook of Urban Education Stanford University Press

Drawing on a variety of theoretical concepts and methods, this book addresses the interface between language, politics and translation. The contributors analyse the role, practice and impact of journalistic translation in Canada, China, Arab countries, France, Spain, the Ukraine, Finland and Serbia. The introductory chapter surveys the evolution of journalistic translation research during the period 2015-2020. The chapters that follow delve into the role of language and translation in news production with a specific focus on the connections with politics and power. The authors analyse Canadian newspapers in French and English during the subprime crises, the representation of Muslims in three European newspapers in the aftermath of Nice terrorist attacks, the translation of Donald Trumps' tweets in Spain, the role of evaluation in opinion articles in the Ukraine, the use of reported speech in Finnish articles, the translation of Donald Trump's offensive comments into Arabic and so on. In the discussions, the authors draw on functional grammar, critical discourse analysis, Appraisal theory and pragmatics. This volume will appeal to all those interested in the ways translation shapes media constructions of news events and showcases the centrality of journalistic translation research as a dynamic subfield within translation studies. The chapters in this book were originally published as a special issue of the journal *Perspectives: Studies in Translation Theory and Practice*.

Road Safety Annual Report 2015 International Monetary Fund

The spate of mis-selling episodes that have plagued the financial services industries in recent years has caused widespread detriment to investors. Notwithstanding numerous regulatory interventions, curtailing the incidence of poor investment advice remains a challenge for regulators, particularly because these measures are taken in a 'fire-fighting' fashion without adequate consideration being given to the root causes of mis-selling. Against this backdrop, this book focuses on the sale of complex investment products to corporate retail investors by drawing upon the widespread mis-selling of interest rate hedging products (IRHP) in the UK and beyond. It brings to the fore the relatively understudied field concerning the different degrees of investor protection mechanisms applicable to individual retail investors – as opposed to corporate retail investors – by taking stock of past regulatory reforms and forthcoming regulatory initiatives as well

as, more importantly, the conclusions reached by the judiciary in IRHP mis-selling claims. The conclusions are particularly interesting: corporate retail investors are in a vulnerable position when compared to individual retail investors. The former are exposed to a heightened risk of mis-selling, meaning that regulatory intervention should be targeted accordingly. The recommendations made as a result of these findings are further supported by insights emerging from behavioural law and economic theories. This book is aimed at researchers, lawyers and students with an interest in the financial regulation field who are keen to explore potential regulatory reforms to the investment services regime that address the root causes of mis-selling, and restore a level playing field amongst all retail investors.

Exclusive access to videos from real test takers and GMAC staff who share insight and tips on GMAT® preparation.

Portals of Globalization Oxford University Press

This book combines multi-disciplinary ethnographic and theoretical approaches to examine piracy in Southeast Asia and the regional and international responses to this threat. During the piracy boom of the early to mid-2000s, the issue of piracy in Southeast Asia received substantial academic attention. Recent scholarship, however, has shifted the focus to Somali piracy and the resurgence of piracy in Southeast Asia has largely been neglected in the academic community. This volume seeks to remedy this gap in the current literature. The primary aim is to examine how piracy has evolved in Southeast Asia over the past ten years, to address why piracy has re-emerged as a security threat, to evaluate efforts at maintaining security in regional waters, and to offer an analysis of what might be expected in the next decade. The contributions are drawn from academics, policy makers, and military officers, covering a range of disciplines including international relations, socio-cultural anthropology, security studies, history, law, and Asian studies. Taken together, the contributions in this volume provide a better understanding of contemporary piracy in Southeast Asia and suggest avenues to successfully combat piracy in this region. This book will be of much interest to students of maritime security, Asian politics, security studies, and international relations in general.

Israel's Technology Economy Oxford University Press

Japan's post-war armed forces are a paradox, both embarrassing remnants of the past and valuable repositories of experience. This book charts the development of the Japan Self-Defense Forces (JSDF) from 1954 as both unorthodox military institutions and servants of a civil society that decries militarism. Investigating JSDF contributions to Japanese and global security, the evolution of such contributions during and after the Cold War, and their possible reconfiguration for Japan's security needs ahead, Garren Mulloy offers insight into the Forces' past, present and future. He explores the characteristics and contradictions of Japanese policy, including novel approaches in response to an increasingly assertive China, the latent threat of North Korea and contributory pressure from the US. Though the American alliance remains the core of Japanese security, new partnerships and international overtures will also shape the Forces' place in Prime Minister Abe's new vision of 'proactive contributions to peace'. Defenders of Japan deconstructs how the JSDF have adapted and will continue to adapt within domestic norms, caught between unresolved legacies of Japan's imperial past and a dynamically shifting balance of future global power.

Towards responsible and inclusive financing of the palm oil sector Oxford University Press

UK GAAP 2019 provides a comprehensive guide to interpreting and implementing UK accounting standards, particularly: FRS 100: Application of Financial Reporting Requirements FRS 101: Reduced Disclosure Framework Disclosure exemptions from EU-adopted IFRS for qualifying entities FRS 102: The Financial Reporting Standard applicable in the UK and Republic of Ireland FRS 103: Insurance Contracts FRS 104: Interim Financial Reporting This book is an essential tool for anyone applying, auditing, interpreting, regulating, studying or teaching those accounting standards. Written by the financial reporting professionals from the Financial Reporting Group of EY, this book provides a clear explanation of the UK GAAP accounting requirements which apply in 2019 and will prove invaluable in implementing these requirements. It also addresses the requirements of the UK Companies Act and relevant statutory instruments, as well as practical worked examples. Also available is International GAAP® 2019 a three volume comprehensive guide to interpreting International Financial Reporting Standards (IFRS), setting IFRS in a relevant business context and providing insight into how complex practical issues should be resolved in the real world of global financial reporting.

11th International Conference on Cyber Warfare and Security Springer

This book documents how Israel emerged as one of the world's leading centers of high technology over the last three decades and the impact that it has had, or failed to have, on the wider economy and politics. Based on the study of start-up companies, the project attributes the rise of Israel's tech economy to its unique history, political system, and culture, and shows how those same factors have failed it in the quest to diversify its economy to make it more inclusive and equitable. This work will interest economists, political scientists, Israeli studies academics, investors, policy makers, journalists, and business readers.

Charting a Course: Strategic Choices for a New Administration OECD Publishing

While ports are traditionally considered national infrastructure sites that connect states to global markets, special economic zones and past free ports are portrayed as threats to national sovereignty. This book calls these narratives into question as it explores the history of planning Mumbai's ports and free zones during periods of global and regional transition from the British Raj,

to national independence, to economic liberalization. The book opens with a study of an unsuccessful plan hatched by merchants in 1833 to make Bombay a free port to deal with an emerging British India and the advent of free trade. The book ends with how India's current special economic zones and emphasis on port expansion are part of broader goals to reposition India in transregional Asian trade, to connect Mumbai with northern India, and to enact local plans for a global city that threaten the very port that first connected Mumbai to the world. To understand the functionality of these port and zone projects beyond typical policy prescriptions, this book proposes portals of globalization as a spatial format that fosters processes of reterritorialization. *Decentralization and Constitutionalism in Africa* OECD Publishing
The Initial Assessment of this Multi-Dimensional Review endeavors to identify the challenges and key constraints that must be overcome for Thailand to succeed.

IEO Annual Report 2015 African Books Collective

"A primal account of an unstified world." —Bill McKibben "A dazzling command of science and relentless faith . . ." —Naomi Klein A wide-ranging collection of essays from leading environmental commentator on how politics and big business threaten our daily lives, our society, and the planet Without countervailing voices, naming and challenging power, political freedom withers and dies. Without countervailing voices, a better world can never materialise. Without countervailing voices, wells will still be dug and bridges will still be built, but only for the few. Food will still be grown, but it will not reach the mouths of the poor. New medicines will be developed, but they will be inaccessible to many of those in need. George Monbiot is one of the most vocal, and eloquent, critics of the current consensus. How Did We Get into this Mess?, based on his powerful journalism, assesses the state we are now in: the devastation of the natural world, the crisis of inequality, the corporate takeover of nature, our obsessions with growth and profit and the decline of the political debate over what to do. While his diagnosis of the problems in front of us is clear-sighted and reasonable, he also develops solutions to challenge the politics of fear. How do we stand up to the powerful when they seem to have all the weapons? What can we do to prepare our children for an uncertain future? Controversial, clear but always rigorously argued, How Did We Get into this Mess? makes a persuasive case for change in our everyday lives, our politics and economics, the

ways we treat each other and the natural world.

HCI in Business, Government and Organizations John Wiley & Sons

This book analyzes the current economic situations in African countries at the local, regional, and national level. It examines the growing interest from developed and developing countries to invest in Africa and their different reasons for doing so, which aren't always aligned with the interests of African countries. Growth in African GDP has benefitted mainly multinational corporations while the rest of the population remains at the subsistence level, creating a smaller middle class and less opportunity for local businesses to flourish. This book offers potential models of cooperation which could create added value for both African countries and the MNCs investing in them.

Intelligent Assistive Technologies for Dementia Government Printing Office

Indonesia has made impressive progress in reducing income inequality and improving living standards since the Asian Financial Crisis but the decline in poverty has slowed in recent years while inequality has risen and a large part of the population remains vulnerable.

Financial Accounting, Reporting, and Analysis Becker Professional Education Ltd

This second handbook offers all new content in which readers will find a thoughtful and measured interrogation of significant contemporary thinking and practice in urban education. Each chapter reflects contemporary cutting-edge issues in urban education as defined by their local context. One important theme that runs throughout this handbook is how urban is defined, and under what conditions the marginalized are served by the schools they attend. Schooling continues to hold a special place both as a means to achieve social mobility and as a mechanism for supporting the economy of nations. This second handbook focuses on factors such as social stratification, segmentation, segregation, racialization, urbanization, class formation and maintenance, and patriarchy. The central concern is to explore how equity plays out for those traditionally marginalized in urban schools in different locations around the globe. Researchers will find an analysis framework that will make the current practice and outcomes of urban education, and their alternatives, more transparent, and in turn this will lead to solutions that can help improve the life-options for students historically underserved by urban schools.
