PETERSEN CHACE

The Popes Mazda Pub

It was a simple incident in the life of James Clavell—a talk with his young daughter just home from school—that inspired this chilling tale of what could happen in twenty-five quietly devastating minutes. He writes, "The Children's Story came into being that day. It was then that I really realized how vulnerable my child's mind was —any mind, for that matter—under controlled circumstances. Normally I write and rewrite and re-rewrite, but this story came quickly—almost by itself. Barely three words were changed. It pleases me greatly because I kept asking the questions... Questions like, What's the use of 'I pledge allegiance' without understanding? Like Why is it so easy to divert thoughts? Like What is freedom? and Why is so hard to explain? The Children's Story keeps asking me all sorts of questions I cannot answer. Perhaps you can—then your child will...."

The Children's Story Simon and Schuster

A new edition, packed with even more clever tricks and methods that make everyday life easier Lifehackers redefine personal productivity with creative and clever methods for making life easier and more enjoyable. This new edition of a perennial bestseller boasts new and exciting tips, tricks, and methods that strike a perfect balance between current technology and common sense solutions for getting things done. Exploring the many ways technology has changed since the previous edition, this new edition has been updated to reflect the latest and greatest in technological and personal productivity. The new "hacks" run the gamut of working with the latest Windows and Mac operating systems for both Windows and Apple, getting more done with smartphones and their operating systems, and dealing with the evolution of the web. Even the most tried-and-true hacks have been updated to reflect the contemporary tech world and the tools it provides us. Technology is supposed to make our lives easier by helping us work more efficiently. Lifehacker: The Guide to Working Smarter, Faster, and Better, Third Edition is your guide to making that happen!

A Novel W. W. Norton & Company

A fascinating tour of the urban landscape and interiors of Tokyo, Japan, captures in hundreds of full-color photographs the tiny crowded apartments of one of the world's most densely populated metropolises. Original.

What is Time? Feldheim Publishers

Focuses on the key chemical concepts which students of the biosciences need to understand, making the scope of the book directly relevant to the target audience.

De Pluimveehouderij Meyer & Meyer Verlag

Levensgenieter Tess heeft het helemaal voor elkaar: geld genoeg om mooie designkleding te kopen, een prachtig huis, een leuke baan en een superman die haar op handen draagt. Dat liefdesgeluk gunt ze haar vriendinnen natuurlijk ook en ze gaat enthousiast aan de slag om Madelon en Kirsten aan de man te

helpen. Maar ja... Of die daar nou zo blij mee zijn? Een vrolijke liefdesroman van bestseller auteur Anita Verkerk!

Maandblad voor bedrijfsadministratie en-organisatie

he Scarlet Pimpernel is the first novel in a series of historical fiction by Baroness Orczy, published in 1905. It was written after her stage play of the same title enjoyed a long run in London, having opened in Nottingham in 1903. The novel is set during the Reign of Terror following the start of the French Revolution. The title is the nom de guerre of its hero and protagonist, a chivalrous Englishman who rescues aristocrats before they are sent to the guillotine. Sir Percy Blakeney leads a double life: apparently nothing more than a wealthy fop, but in reality a formidable swordsman and a quick-thinking escape artist. The band of gentlemen who assist him are the only ones who know of his secret identity. He is known by his symbol, a simple flower, the scarlet pimpernel (*Anagallis arvensis*). Marguerite Blakeney, his French wife, does not share his secret. She is approached by the new French envoy to England, Chauvelin, with a threat to her brother's life if she does not aid in the search for the Pimpernel. She aids him, and then discovers that the Pimpernel is also very dear to her. She sails to France to stop the envoy.

Steering Automated, Shared, and Electric Vehicles to a Better Future Pushkin Press

WINNER OF THE 2020 INTERNATIONAL BOOKER PRIZE A stark and gripping tale of childhood grief from one of the most exciting new voices in Dutch literature Ten-year-old Jas lives with her strictly religious parents and her siblings on a dairy farm where waste and frivolity are akin to sin. Despite the dreary routine of their days, Jas has a unique way of experiencing her world: her face soft like cheese under her mother's hands; the texture of green warts, like capers, on migrating toads in the village; the sound of "blush words" that aren't in the Bible. One icy morning, the disciplined rhythm of her family's life is ruptured by a tragic accident, and Jas is convinced she is to blame. As her parents' suffering makes them increasingly distant, Jas and her siblings develop a curiosity about death that leads them into disturbing rituals and fantasies. Cocooned in her red winter coat, Jas dreams of "the other side" and of salvation, not knowing where this dreaming will finally lead her. A bestseller in the Netherlands, Marieke Lucas Rijneveld's radical debut novel *The Discomfort of Evening* offers readers a rare vision of rural and religious life in the Netherlands. In it, they ask: In the absence of comfort and care, what can the mind of a child invent to protect itself? And what happens when that is not enough? With stunning psychological acuity and images of haunting, violent beauty, Rijneveld has created a captivating world of language unlike any other.

Chemistry for the Biosciences Harvard University Press

Voordat je een huis bouwt, heb je plannen nodig. Je hebt een BLAUWDRUK nodig. Blauwdruk voor Thuisonderwijs is voor ouders die thuisonderwijs geven, van alle filosofieën en stijlen, die op zoek zijn naar een betere manier om hun tijd, energie en geestelijke gezondheid in de loop van het schooljaar te

behouden. Breng jij je schooldagen door met het zoeken naar ontbrekende ingrediënten voor wetenschappelijke experimenten? Heb je het gevoel dat je constant achterloopt, of dat je niet genoeg doet, vergeleken met andere mensen die je kent? Het hoeft niet zo te zijn. Blauwdruk voor Thuisonderwijs is een vriendelijke, humoristische gids voor het plannen van je schooljaar. Nog voordat je zelfs maar een blik werpt op een kalender zul je ontdekken waarom je thuisonderwijs geeft, enkele van de beschikbare onderwijsfilosofieën en lesmethoden verkennen, en doelen stellen die rekening houden met de realiteit van jouw leven. Tegen de tijd dat je klaar bent, zul je alle hulpmiddelen en materialen hebben, die je nodig hebt voor een heel jaar thuisonderwijs, afgestemd op de echte wereld waar jij in leeft. Blauwdruk voor Thuisonderwijs heeft voor zowel beginners als ervaren thuisonderwijsveteranen iets te bieden, en zit boordevol praktische adviezen en verhalen van mensen in de loopgraven van het thuisonderwijs.

Is time, even locally, like the real line? Multiple structures of time, implicit in physics, create a consistency problem. A tilt in the arrow of time is suggested as the most conservative hypothesis which provides approximate consistency within physics and with topology of mundane time. Mathematically, the assumed constancy of the velocity of light (needed to measure time) implies functional differential equations of motion, that have both retarded and advanced deviating arguments with the hypothesis of a tilt. The novel features of such equations lead to a nontrivial structure of time and quantum-mechanical behaviour. The entire argument is embedded in a pedagogical exposition which amplifies, corrects, and questions the conventionally accepted approach. The exposition includes historical details and explains, for instance, why the entropy law is inadequate for time asymmetry, and why notions such as time asymmetry (hence causality) may be conceptually inadequate. The first three parts of the book are especially suited as supplementary reading material for undergraduate and graduate students and teachers of physics. The new ideas are addressed to researchers in physics and philosophy of science concerned with relativity and the interpretation of quantum mechanics.

High Days and Holidays in Iceland Graywolf Press

"These albums use texts and photos to give a detailed account of various Chinese folk crafts and the implied meanings they contain, being of the value of reading and appreciation, are helpful for foreigners to get a better understanding about Chinese culture and can be used as reference books for professional art designers."--Publisher's description

"One of the most acute and thoughtful achievements of French fiction at mid-century." -- New York Times

Electrical equipment of machines. General requirements
Uitgeverij Cupido

Why technology is not an end in itself, and how cities can be "smart enough," using technology to promote democracy and equity. Smart cities, where technology is used to solve every problem, are hailed as futuristic urban utopias. We are promised that apps, algorithms, and artificial intelligence will relieve congestion, restore democracy, prevent crime, and improve public services. In *The Smart Enough City*, Ben Green warns against seeing the city only through the lens of technology; taking an exclusively technical view of urban life will lead to cities that appear smart but under the surface are rife with injustice

and inequality. He proposes instead that cities strive to be "smart enough": to embrace technology as a powerful tool when used in conjunction with other forms of social change—but not to value technology as an end in itself. In a technology-centric smart city, self-driving cars have the run of downtown and force out pedestrians, civic engagement is limited to requesting services through an app, police use algorithms to justify and perpetuate racist practices, and governments and private companies surveil public space to control behavior. Green describes smart city efforts gone wrong but also smart enough alternatives, attainable with the help of technology but not reducible to technology: a livable city, a democratic city, a just city, a responsible city, and an innovative city. By recognizing the complexity of urban life rather than merely seeing the city as something to optimize, these *Smart Enough Cities* successfully incorporate technology into a holistic vision of justice and equity.

Leve de liefde! Oxford University Press on Demand

Pluck has a little red tow truck. He drives it all over town looking for a place to live. Then Dolly the pigeon tells him that the tower of the Pill Building is empty. In the Pill Building, Pluck meets Mr. Penn and Zaza the cockroach. Pluck makes lots more friends and solves all kinds of problems. But the biggest problem is Dove Grove. It used to be a garden with tall trees, but it has been neglected and gone wild. Grown-ups never go there, but the kids from the Pill Building love playing there. But now the Park Superintendent has decided to chop down the trees to make a paved square. Pluck and his friends try to save Dove Grove. But first he has to rescue Longmount from the canal.

`Magnificent, a true magnum opus....A tremendously important piece of work.... A truly revolutionary book (not merely an excellent book)' - Arun Ghosh Time is a mystery that has perplexed humankind since time immemorial. Resolving this mystery is of significance not only to philosophers and physicists but is also a very practical concern. Our perception of time shapes our values and way of life; it also mediates the interaction between science and religion both of which rest fundamentally on assumptions about the nature of time. C K Raju begins with a critical exposition of various time-beliefs, ranging from the earliest times through Augustine, Newton and Einstein to Stephen Hawking and current notions of chaos and time travel. He traces the role of organised religion in subverting time beliefs for its political ends. The book points out how this resulted in a facile dichotomy between 'linear' and 'cyclic' time, thereby inaugurating a confusion which, according to the author, has handicapped Western thought ever since, eventually influencing the content of science itself. Thus, this book daringly asserts that physical theory, traditionally regarded as amoral and objective, has depended on cultural beliefs about time. The author points out that time beliefs are again being manipulated today as the credibility of science is being exploited to promote a picture of time and, hence, a pattern of human behaviour which is convenient to the agenda of globalisation of culture. The linkages between modern theology and this 'brave new physics' are traced against the wider context of the so-called 'clash of civilisations', and the attempts to remake the world order. The conclusions

point to the need to de-theologise time. The author challenges Einstein's understanding of relativity theory and suggests that a 'tilt in the arrow of time', or a small tendency towards cyclicity, will help repair the prevalent confusion about time. A 'tilt' also enables a physics that permits both memory and creativity, so that purpose and spontaneous growth of order are returned to human life. The book ends with a vision of Man as Creator, surprising God. Extensive research in physics, the history of science, comparative religions, and sociology lend weight to the important and challenging conclusions reached by the author. Written as a rejoinder to Stephen Hawking's *A Brief History of Time*, this book goes much further and, unlike any previous book, it gives a critical exposition of various world religions-Buddhism, Christianity, Hinduism, Islam, and Jainism-while exploring their intricate links, through time beliefs, to current physics on the one hand, and to global political and economic trends, on the other. This book will appeal to scholars and laypersons equally. It will fascinate anyone who reads it and will teach its readers to question the unquestionable.

Master Your Future Ballantine Books

Prim and proper art gallery coordinator Elle Walser is no good at seducing men. Heck, she's been throwing hints at her boss for months, but he's completely clueless. Desperate to escape her mother's matchmaking efforts, she comes up with a plan—buy some lingerie and climb into her boss's bed. The plan goes brilliantly...until she accidentally seduces a sexy stranger instead. Bad boy nightclub mogul Gabe Schultz just had the best almost-sex of his life. Too bad the smoking hot blonde thought he was his brother and bolted before he could finish what they started. Though her holier-than-thou attitude puts a serious damper on his mood, Gabe's never been one to give up on something he wants. And he wants Elle. Now he just needs her to convince her

to give him a chance... Each book in the *Come Undone* series is STANDALONE: * *Wrong Bed, Right Guy* * *Chasing Mrs. Right* * *Two Wrongs, One Right* * *Seducing Mr. Right*

The Run Walk Run® Method John Wiley & Sons

An Amazon Charts and #1 Wall Street Journal bestselling series. They're hunting a killer so silent, so invisible, that his unspeakable crimes are the only proof he exists. A car submerged in a remote pond. The bodies of two girls strapped into their seats. The mystery of their mother, vanished without a trace, leads Gwen Proctor and Kezia Claremont into dangerous territory. On the surface, Gwen's life is good--two children approaching adulthood, a committed partner, and a harrowing past dead and gone. But that past is attracting the attention of someone invisible...and unstoppable. Trouble's just beginning. So is the body count in this backwoods Tennessee town. As threats mount and Gwen's hunted by an enemy who pulls all the strings, Kezia has her back. But working to solve these vicious and unreasonable crimes will expose them both to a killer they can't for the life of them see coming.

Sharing Cities Oxford University Press

In *Three Revolutions*, transportation expert Dan Sperling and his collaborators share research-based insights on potential public benefits and impacts of the three transportation revolutions of vehicle automation, shared mobility, and vehicle electrification. They describe innovative ideas and partnerships, and explore the role government policy can play in steering the new transportation paradigm toward the public interest--toward our dream scenario of social equity, environmental sustainability, and urban livability. *Three Revolutions* offers policy recommendations and provides insight and knowledge that could lead to wiser choices by all. With this book, Sperling and his collaborators hope to steer these revolutions toward the public interest and a better quality of life for everyone.
