On the Interpretation of Treaties Oxford University Press

'State sovereignty' is often referred to as an obstacle to criminal justice for core international crimes by members of the international criminal justice movement. The exercise of State sovereignty is seen as a shield against effective implementation of such crimes. But it is sovereign States that create and become parties to international criminal law treaties and jurisdictions. They are the principal enforcers of criminal responsibility for international crimes, as reaffirmed by the complementarity principle on which the International Criminal Court (ICC) is based. Criminal justice for atrocities depends entirely on the ability of States to act. This volume revisits the relationship between State sovereignty and international criminal law along three main lines of inquiry. First, it considers the immunity of State officials from the exercise of foreign or international criminal jurisdiction. Secondly, with the closing down of the ad hoc international criminal tribunals, attention shifts to the exercise of national jurisdiction over core international crimes, making the scope of universal jurisdiction more relevant to perceptions of State sovereignty. Thirdly, could the amendments to the ICC Statute on the crime of aggression exacerbate tensions between the interests of State sovereignty and accountability? The book contains contributions by prominent international lawyers including Professor Christian Tomuschat, Judge Erkki Kourula, Judge LIU Daqun, Ambassador WANG Houli, Dr. ZHOU Lulu, Professor Claus Kre, Professor MA Chengyuan, Professor JIA Bingbing, Professor ZHU Lijiang and Mr. GUO Yang.

The Shared Responsibility in International Law series examines the underexplored problem of allocation of responsibilities among multiple states and other actors. The International Law Commission, in its work on state responsibility and the responsibility of international organisations, recognised that attribution of acts to one state or organisation does not exclude possible attribution of the same act to another state or organisation, but has provided limited guidance on allocation or reparation. From the new perspective of shared responsibility, this volume reviews the main principles of the law of international responsibility as laid down in the Articles on State Responsibility and the Articles on Responsibility of International Organizations, such as attribution of conduct, breach, circumstances precluding wrongfulness and reparation. It explores the potential and limitations of current international law in dealing with questions of shared responsibility in areas such as military operations and international environmental law.

International Law and Sustainable Development: Past Achievements and Future Challenges is a collection of essays that cover some of the most important contemporary issues in contemporary law relating to sustainable development, the utilization of natural resources, and the protection of the environment. Written by well-known experts on these topics who include judges of the International Court of Justice and the International Tribunal for the Law of the Sea; legal advisers from international organizations such as the World Bank, the International Maritime Organization, and the Food and Agriculture Organization; and practitioners of international law, as well as some of the leading scholars writing on international environmental law and related subjects this book covers many of the major legal developments that have taken place since the United Nations Conference on Environmental Development held in Rio de Janeiro in 1992. The contributors bring new perspectives on sustainable development as a legal principle, the role of the International Law Commission in codifying international environmental law, the protection of the marine environment following the entry into force of the 1982 UN Convention of the Law of the Sea, and the revolution in international fisheries law. The editors have ensured that the book covers a wide range of topics from Antarctica to small whales and the book will be of particular interest to those teaching or practising law of the sea and international environmental law.

Commentary on the Law of the International Criminal Court Oxford University Press, USA

The 1969 Vienna Convention on the Law of Treaties, regulating treaties between States, lies at the heart of international law. This commentary interprets the Convention's 85 articles clearly and precisely. It covers such major topics as reservations to treaties, their interpretation and the grounds for terminating a treaty, for instance breach. Emphasis is placed on the practice of States and tribunals and on academic writings. It contains further sections on customary international law and the Convention's history while providing up-to-date information on ratifications and reservations. This commentary is a must for practitioners and academics wishing to establish the meaning and scope of the provisions of the Vienna Convention on the Law of Treaties.

Never has the World Bank's relief work been more important than in the last nine years, when crises as huge as AIDS and the emergence of terrorist sanctuaries have threatened the prosperity of billions. This journalistic masterpiece by Washington Post columnist Sebastian Mallaby charts those controversial years at the Bank under the leadership of James Wolfensohn—the unstoppable power broker whose daring efforts to enlarge the planet's wealth in an age of globalization and terror were matched only by the force of his polarizing personality. Based on unprecedented access to its subject, this captivating tour through the messy reality of global development is that rare

triumph—an emblematic story through which a gifted author has channeled the spirit of the age.

This edition features a new afterword by the author that analyzes the appointment of Paul Wolfowitz as Wolfensohn's successor at the World Bank

The second, enlarged edition of this established reference integrates many new insights into wastewater hydraulics. This work serves as a reference for researchers but also is a basis for practicing engineers. It can be used as a text book for graduate students, although it has the characteristics of a reference book. It addresses mainly the sewer hydraulician but also general hydraulic engineers who have to tackle many a problem in daily life, and who will not always find an appropriate solution. Each chapter is introduced with a summary to outline the contents. To illustrate application of the theory, examples are presented to explain the computational procedures. Further, to relate present knowledge to the history of hydraulics, some key dates on noteworthy hydraulicians are quoted. A historical note on the development of wastewater hydraulics is also added. References are given at the end of each chapter, and they are often helpful starting points for further reading. Each notation is defined when introduced, and listed alphabetically at the end of each chapter. This new edition includes in particular side-weirs with throttling pipes, drop shafts with an account on the two-phase flow features, as well as conduit choking due to direct or undular hydraulic jumps.

This is the first of a three volume set, the publication of which will mark the fiftieth anniversary of the International Law Commission, the UN body principally responsible for the codification and development of international law. Together, the three volumes will collect the full texts of the Commission's final draft Articles and Commentaries, and other final reports, on all the topics on which it has completed work during its first fifty years, up to and including 1998. They will also contain the texts of all the treaties which have been concluded on the basis of the Commission's draft Articles.

Tallinn Manual 2.0 expands on the highly influential first edition by extending its coverage of the international law governing cyber operations to peacetime legal regimes. The product of a three-year follow-on project by a new group of twenty renowned international law experts, it addresses such topics as sovereignty, state responsibility, human rights, and the law of air, space, and the sea. Tallinn Manual 2.0 identifies 154 'black letter' rules governing cyber operations and provides extensive commentary on each rule. Although Tallinn Manual 2.0 represents the views of the experts in their personal capacity, the project benefitted from the unofficial input of many states and over fifty peer reviewers.

Yearbook of the International Law Commission 2011 Oxford University Press, USA

This is a study of the principal negotiating processes and law-making tools through which contemporary international law is made. It does not seek to give an account of the traditional - and untraditional - sources and theories of international law, but rather to identify the processes, participants and instruments employed in the making of international law. It accordingly examines some of the mechanisms and procedures whereby new rules of law are created or old rules are amended or abrogated. It concentrates on the UN, other international organisations, diplomatic conferences, codification bodies, NGOs, and courts. Every society perceives the need to differentiate between its legal norms and other norms controlling social, economic and political behaviour. But unlike domestic legal systems where this distinction is typically determined by constitutional provisions, the decentralised nature of the international legal system makes this a complex and contested issue. Moreover, contemporary international law is often the product of a subtle and evolving interplay of law-making instruments, both binding and non-binding, and of customary law and general principles. Only in this broader context can the significance of so-called 'soft law' and multilateral treaties be fully appreciated. An important question posed by any examination of international law-making structures is the extent to which we can or should make judgments about their legitimacy and coherence, and if so in what terms. Put simply, a law-making process perceived to be illegitimate or incoherent is more likely to be an ineffective process. From this perspective, the assumption of law-making power by the UN Security Council offers unique advantages of speed and universality, but it also poses a particular challenge to the development of a more open and participatory process observable in other international law-making bodies.

Investment arbitration has become the key forum to settle disputes between investors and the host state. It is not clear from the arbitration agreements which body of law the arbitrators should apply: national or international. This book examines how the legal framework which the arbitral panels operate in influences which body of law they apply.

[Yearbook of the International Law Commission 1999, Vol.II, Part 1](#) Martinus Nijhoff Publishers

This book examines the rapid development of the fundamental concept of a crime in international criminal law from a comparative law perspective. In this context, particular thought has been given to the catalyzing impact of the criminal law theory that has developed in major world legal systems upon the crystallization of the substantive part of international criminal law. This study offers a

critical overview of international and domestic jurisprudence with regard to the construal of the concept of a crime (actus reus, mens rea, defences, modes of liability) and exposes roots of confusion in international criminal law through a comprehensive comparative analysis of substantive criminal laws in selected legal jurisdictions.
