Alan's true story picks up after his parole from Trenton State Prison where he served 27 months of a 3 to 5 year sentence for possession and sale of drugs. He thought he had his drug addiction problems beaten. He felt that alcohol without drugs would provide him the relief that he needed from his anxiety and depression. He started becoming more and more reliant on alcohol as the days passed. His social anxiety was so great that he could not participate in conversations in a group context. His alcoholic life was a whirlwind of brief sexual encounters and

drinking at **BLANCHARD** Greenwich Village. His sexual identity was non-existent. He had no sexual preference of a female over a male or vice-versa. Alan was just getting started on his academic career as a free man. He had taken his first 4 college courses in prison and was determined to earn at least a bachelor's degree. In no time at all he was consuming alcohol before every social gathering whether it was at home, at work or on the university campus. Alan appeared aloof to many acquaintances, but his quiet nature was due to his intense anxiety levels and sporadic depression. The years advance and Alan chronicles the huge impact alcoholism has on his life and his

urgent attempts to work towards solutions to his inner turmoil. As his alcoholism progresses, he gets closer and closer to losing everything he's worked and strived for. His personal relationships are falling apart. His work on the job is suffering and his relationships with co-workers are becoming stressed. He needs a solution and he needs it now.

Achievement tests play an important role in modern societies. They are used to evaluate schools, to assign students to tracks within schools, and to identify weaknesses in student knowledge. The GED is an achievement test used

to grant the status of high school graduate to anyone who passes it. GED recipients currently account for 12 percent of all high school credentials issued each year in the United States. But do achievement tests predict success in life? *The Myth of Achievement Tests* shows that achievement tests like the GED fail to measure important life skills. James J. Heckman, John Eric Humphries, Tim Kautz, and a group of scholars offer an in-depth exploration of how the GED came to be used throughout the United States and why our reliance on it is dangerous. Drawing on decades of research, the authors show that, while GED recipients score as well on

achievement tests as high school graduates who do not enroll in college, high school graduates vastly outperform GED recipients in terms of their earnings, employment opportunities, educational attainment, and health. The authors show that the differences in success between GED recipients and high school graduates are driven by character skills. Achievement tests like the GED do not adequately capture character skills like conscientiousness, perseverance, sociability, and curiosity. These skills are important in predicting a variety of life outcomes. They can be measured, and they can be taught. Using the GED as a

case study, the authors explore what achievement tests miss and show the dangers of an educational system based on them. They call for a return to an emphasis on character in our schools, our systems of accountability, and our national dialogue. The publication of the James Herriot books led to an upsurge in interest in the veterinary profession among the public and inspired many to study veterinary medicine. However, the veterinary profession has changed markedly since those Herriot days, with many more opportunities for people entering the veterinary field, including such as job prospects in bioscience research, government work, specialization in exotic animal

medicine, animal welfare advisory work, international development work, and a whole host of other career options. The landscape of the veterinary curriculum has also broadened considerably, with topics like animal behavior, ethics, business management, client communication, veterinary public health, and clinical skills, alongside clinical veterinary medicine. Authored by a Royal Veterinary College instructor with extensive experience within the veterinary profession and with teaching new students, this book provides a thorough explanation of what prospective students can expect to study at veterinary school, and it discusses career options

available to new graduates. Additionally, the book offers a useful overview of current issues in the wider veterinary profession, as well as an honest and thought-provoking discussion of what veterinary life is actually like. It will also be of benefit to qualified vets and agricultural students. [Subject: Veterinary Science, Medicine, Agriculture]

Understanding Occupational and Organizational Psychology is an invaluable resource for students doing a course in occupational and organizational psychology, either at third year undergraduate or Masters level. The text provides comprehensive coverage of the British Psychological Society's training requirements for becoming a chartered occupational psychologist, yet it is also compliant with European training guidelines for industrial, work and organizational psychology too. This book will prompt and

inspire further reading and research as well as ideas for dissertations, problem formulation and the creative application of knowledge to various situations. Ideal if you want to get ahead with your undergraduate study or get your foot on the ladder to becoming a fully-fledged scientist-practitioner.

2015 marks the beginning of the UN Decade of Sustainable Development.

Sustainable development involves the incorporation of ecological principles in technology development and dissemination. It is in this context that the present book by Ms Megha Aggarwal is a timely contribution.

The book covers a wide range of information dealing with agriculture, energy, engineering, medicine, architecture, finance, and environmental management. It should help the young students to become the architects of a sustainable future for our country. I hope the book will be read and used widely. □ MS

SWAMINATHAN Father of the Indian Green Revolution As India gradually moves towards a □green□ economy, new avenues of employment are opening up for today□s youth. SAGE

**** Produced in collaboration with the American Council on Education. Previous editions are cited in BCL3 and Guide to Reference Books. Arranged by state, some 1,900 institutions are covered, including 58 for the first time. Material comes directly from the institutions

themselves in response to a questionnaire.

Entries provide both the essential statistical data (tuition, room, board, admissions requirements, financial aid, enrollments) and other information important to decision making (e.g. student life, library holdings, physical plant, study abroad programs).

Enhancing the institution profiles are sections on foreign students at US institutions, professional education, and the history of higher education in the US, among other topics. Annotation copyrighted by Book News, Inc., Portland, OR

Chances are you will go to a college near

where you live or go to one online. Many people now do parts of their degrees online then attend the college physically for awhile. In-state is always cheaper than going to a college out of state because your local government subsidizes residents at the local public universities, not the private ones. Private universities charge whatever they want to everybody. Publicly-funded ones are much cheaper. The real issue is what do you study. Do you listen to what everybody else says including the world system or yourself? That's the eternal question. Will I be the hero of my own life or will I be a clone, following everybody else? College is not necessarily the answer

to life. You are. Whatever lives inside of you is strong, unique and vital. College can help you find it but by itself college is a fantasy land for young people.
