Oh, the Things You Can Think! Longman

The old saying goes, "To the man with a hammer, everything looks like a nail." But anyone who has done any kind of project knows a hammer often isn't enough. The more tools you have at your disposal, the more likely you'll use the right tool for the job - and get it done right. The same is true when it comes to your thinking. The quality of your outcomes depends on the mental models in your head. And most people are going through life with little more than a hammer. Until now. The Great Mental Models: General Thinking Concepts is the first book in The Great Mental Models series designed to upgrade your thinking with the best, most useful and powerful tools so you always have the right one on hand. This volume details nine of the most versatile, all-purpose mental models you can use right away to improve your decision making, productivity, and how clearly you see the world. You will discover what forces govern the universe and how to focus your efforts so you can harness them to your advantage, rather than fight with them or worse yet- ignore them. Upgrade your mental toolbox and get the first volume today. AUTHOR BIOGRAPHY Farnam Street (FS) is one of the world's fastest growing websites, dedicated to helping our readers master the best of what other people have already figured out. Read & Think Skill Sheets W. W. Norton & Company

#1 New York Times Bestseller "THIS. This is the right book for right now. Yes, learning requires focus. But, unlearning and relearning requires much more—it requires choosing courage over comfort. In Think Again, Adam Grant weaves together research and storytelling to help us build the intellectual and emotional muscle we need to stay curious enough about the world to actually change it. I've never felt so hopeful about what I don't know." —Brené Brown, Ph.D., #1 New York Times bestselling author of Dare to Lead The bestselling author of Give and Take and Originals examines the critical art of rethinking: learning to question your opinions and open other people's minds, which can position you for excellence at work and wisdom in life Intelligence is usually seen as the ability to think and learn, but in a rapidly changing world, there's another set of cognitive skills that might matter more: the ability to rethink and unlearn. In our daily lives, too many of us favor the comfort of conviction over the discomfort of doubt. We listen to opinions that make us feel good, instead of ideas that make us think hard. We see disagreement as a threat to our egos, rather than an opportunity to learn. We surround ourselves with people who agree with our conclusions, when we should be gravitating toward those who challenge our thought process. The result is that our beliefs get brittle long before our bones. We think too much like preachers defending our sacred beliefs, prosecutors proving the other side wrong, and politicians campaigning for approval--and too little like scientists searching for truth. Intelligence is no cure, and it can even be a curse: being good at thinking can make us worse at rethinking. The brighter we are, the blinder to our own limitations we can become. Organizational psychologist Adam Grant is an expert on opening other people's minds--and our own. As Wharton's top-rated professor and the bestselling author of Originals and Give and Take, he makes it one of his guiding principles to argue like he's right but listen like he's wrong. With bold ideas and rigorous evidence, he investigates how we can embrace the joy of being wrong, bring nuance to charged conversations, and build schools, workplaces, and communities of lifelong learners. You'll learn how an international debate champion wins arguments, a Black musician persuades white supremacists to abandon hate, a vaccine whisperer convinces concerned parents to immunize their children, and Adam has coaxed Yankees fans to root for the Red Sox. Think Again reveals that we don't have to believe everything we think or internalize everything we feel. It's an invitation to let go of views that are no longer serving us well and prize mental flexibility over foolish consistency. If knowledge is power, knowing what we don't know is wisdom.

Have you ever wanted to know what a person really thinks of you? Do you want to learn how to deal with different personality types? Are you tired of being made fun of by the first person who passes by because you are unable to read their intentions? This manual provides a cutting-edge distillation of the techniques developed over the centuries by politicians, advertisers, criminals and other masters of their own universe. When applied, they can help you analyse anyone. This will allow you to connect with any personality type you want, forging friendships and social bonds that will last a lifetime! The non-verbal component constitutes over 65% of overall communication. It is an indispensable skill in any situation or social class. You will learn how to: ♦ Interpret the emotional states of the people around us. ♦ Express your feelings and ideas more effectively. ♦ Understanding the clues offered by choice of words. ♦ Avoid misunderstandings. ♦ Find out if a person is lying to you. ♦ Seduce a person (male and female body language in courtship have unique codes). ♦ Demonstrate greater assertiveness when interacting with others. ♦ Substantially improve interpersonal relationships ♦ Understand the subtle signals you are sending out and increase your emotional intelligence. You will find shortcuts to connect quickly and deeply with strangers. As you have probably already experienced in life the risk of misinterpreting the body language of others, or of sending incorrect and incongruent messages, is very high and can cause a lot of misunderstanding. Unlike other books, this manual offers a practical and profound knowledge of non-verbal communication with a modern approach, free from the mania of wanting to 'scam' others and interpret everything simplistically. Hiring the best employee, choosing a business partner or simply choosing a partner for life will be far easier after reading this manual. Reading people quickly, deciphering body language, detecting lies and understanding human nature is the best gift you can give yourself in order to improve any area of your life. A Guide to Critical Thinking Reading and Writing John Catt Educational

Learning to Read and Think provides students with the in-depth lessons and reinforcement activities they need to become critical readers and thinkers. Eight major higher-level reading and thinking skills are introduced at the appropriate levels and reinforced and developed at subsequent levels. The skills taught in Learning to Read and Think are those most frequently identified in literature and basal programs, and in statewide assessment and achievement tests. Each major skills unit is followed by a Unit Review, which provides students with a means of self-evaluation and teachers with an ongoing assessment of the student's level of mastery. A separate Teacher's Guide for each level provides background information, discussion starters, and extension activities, plus answers for all the exercises.
