DOMINIK EATON

The Fairmont Press, Inc. This fully revised and updated edition of this classic best selling reference provides all the information you will need to evaluate and balance the air and water sides of any HVAC system. The third edition adds new chapters on testing and balancing clean rooms and HVAC system

commissioning. Every aspect of testing, adjusting and balancing is addressed, including all types of instruments required, and specific methods to adjust constant volume, single zone, dual duct, induction, and variable air volume systems. Complete details are provided for the full scope of system components, including fans, pumps, motors, drives, and

electricity, as well as for balancing devices and instrument usage. All needed equations and a variety of useful conversion tables are included. [Testing and Commissioning Procedure No. 3 for Fire Service Installation in Government Buildings](#) Butterworth-Heinemann The Chemical and Process Plant Commissioning Handbook, winner of the 2012 Basil Brennan Medal from

the Institution of Chemical Engineers, is a guide to converting a newly constructed plant or equipment into a fully integrated and operational process unit. Good commissioning is based on a disciplined, systematic and proven methodology and approach that achieve results in the safest, most efficient, cost effective and timely manner. The book is supported by detailed, proven and

effective commissioning templates, plus extensive commissioning scenarios that enable the reader to learn the context of good commissioning practice from an experienced commissioning manager. It focuses on the critical safety assessment and inspection regimes necessary to ensure that new plants are compliant with OSHA and environmental requirements. Martin Killcross has brought

together the theory of textbooks and technical information obtained from sales literature, in order to provide engineers with what they need to know before initiating talks with vendors regarding equipment selection. Unique information from a respected, global commissioning manager: delivers the know-how to succeed for anyone commissioning new plant or

equipment
