National Bestseller A supernatural force—set in motion a century ago—threatens to devastate New York City in this "terrific horror/suspense/disaster novel" that "grips from the first page" (Stephen King, #1 New York Times bestselling author). Far upstate, in New York's ancient forests, a drowned village lays beneath the dark, still waters of the Chleauwaukee reservoir. Early in the 20th century, the town was destroyed for the greater good: bringing water to the millions living downstate. Or at least that's what the politicians from Manhattan

insisted at the time. The local families, settled there since America's founding, were forced from their land, but some didn't leave... Now, a century later, the repercussions of human arrogance are finally making themselves known. An inspector assigned to oversee the dam, dangerously neglected for decades, witnesses something inexplicable. It turns out that more than the village was left behind in the waters of the Chill when it was abandoned. A dark prophecy remained, too, and the time has come for it to be fulfilled—for sacrifices must be made. And as the dark waters begin to inexorably rise, the demand for a fresh sacrifice emerges from the deep... "A must read for fans of eerie, gripping storytelling" (Dean Koontz, #1 New York Times bestselling author), *The Chill* is "a creepy tale of supernatural terror" (Publishers Weekly, starred review).

From world-renowned author Erich Segal comes a powerful and moving saga of five extraordinary members of the Harvard class of 1958 and the women with whom their lives are intertwined. Five lives, five love stories: Danny Rossi, the musical prodigy, risks it all for Harvard, even a break with his domineering father. Yet his real problems are too much fame too soon—and too many women. Ted Lambros spends his four years as a commuter, an outsider. He is obsessed by his desire to climb to the top of the Harvard academic ladder, heedless of what it will cost him in personal terms. Jason Gilbert, the Golden Boy—handsome, charismatic, a brilliant athlete—learns at Harvard that he cannot ignore his Jewish background. Only in tragedy will he find his true identity. George Keller, a refugee from Communist Hungary, comes to Harvard with the barest knowledge of English. But with ruthless determination, he masters not only the language but the power structure of his new country. Andrew Eliot is haunted by three centuries of Harvard ancestors who cast giant shadows on his confidence. It is not until the sad and startling events of the reunion that he learns his value as a man. Their explosive story begins in a time of innocence and spans a turbulent quarter century, culminating in their dramatic twenty-five year reunion at which they confront their classmates—and the balance sheet of their own lives. Always at the center; amid the passion, laughter, and glory, stands Harvard—the symbol of who they are and who they will be. They were a generation who made the rules—then broke them—whose glittering successes, heartfelt tragedies, and unbridled ambitions would stun the world. Thought necessarily reflects the times. Following the tragedy of the Holocaust, this fact became ever more clear. And it may be the reason postwar philosophical texts are so difficult to understand, since they confront incomprehensibly traumatic experiences. In this first English-language translation of any of his books, Miroslav Petříček — one of the most influential and erudite Czech philosophers, and a student of Jan Patočka — argues that to exist in the second half of the twentieth century and beyond, Western philosophy has had to rewrite its tradition and its discourse, radically transforming itself. Should philosophy be capable of bearing witness to the time, Petříček contends, this metamorphosis in philosophy is necessary. Offering an original Central European perspective on postwar philosophical discourse that reflects upon the historical underpinnings of pop culture phenomena and complex philosophical schools — including Adorno, Agamben, Benjamin, Derrida, Husserl, Kracauer, and many others — *Philosophy en noir* is a record of this transformation

Eighteen-year-old Bria wants to be a Global Vagabond. In a quest for independence, her neglected art, and no-strings-attached hookups, she signs up for a tour of Central America—the wrong one. Middle-aged tourists are hardly the key to self-rediscovery. So when Bria meets Rowan, devoted backpacker and dive instructor, and his outspoken sister, Starling, she seizes the chance to ditch her group and join them off the beaten path. Bria's a good girl trying to go bad. Rowan's a bad boy trying to stay good. As they travel through Mayan villages and remote Belizean islands, they discover they're both seeking to leave behind the old versions of themselves. The secret to escaping the past, Rowan's found, is to keep moving forward. But Bria realizes she can't run forever. At some point, you have to look back.

A most untraditional love story, this is the celebrated tale of Henry DeTamble, a dashing, adventuresome librarian who inadvertently travels through time, and Clare Abshire, an artist whose life takes a natural sequential course. Henry and Clare's passionate affair endures across a sea of time and captures them in an impossibly romantic trap that tests the strength of fate and basks in the bonds of love. “Niffenegger's inventive and poignant writing is well worth a trip” (Entertainment Weekly).

Few of us have been spared the agonies of intimate relationships. They come in many shapes: loving a man or a woman who will not commit to us, being heartbroken when we're abandoned by a lover, engaging in Sisyphean internet searches, coming back lonely from bars, parties, or blind dates, feeling bored in a relationship that is so much less than we had envisaged - these are only some of the ways in which the search for love is a difficult and often painful experience. Despite the widespread and almost collective character of these experiences, our culture insists they are the result of faulty or insufficiently mature psyches. For many, the Freudian idea that the family designs the pattern of an individual's erotic career has been the main explanation for why and how we fail to find or sustain love. Psychoanalysis and popular psychology have succeeded spectacularly in convincing us that individuals bear responsibility for the misery of their romantic and erotic lives. The purpose of this book is to change our way of thinking about what is wrong in modern relationships. The problem is not dysfunctional childhoods or insufficiently self-aware psyches, but rather the institutional forces shaping how we love. The argument of this book is that the modern romantic experience is shaped by a fundamental transformation in the

ecology and architecture of romantic choice. The samples from which men and women choose a partner, the modes of evaluating prospective partners, the very importance of choice and autonomy and what people imagine to be the spectrum of their choices: all these aspects of choice have transformed the very core of the will, how we want a partner, the sense of worth bestowed by relationships, and the organization of desire. This book does to love what Marx did to commodities: it shows that it is shaped by social relations and institutions and that it circulates in a marketplace of unequal actors.

Adding some 20 percent to the original content, this is a completely updated edition of Steven Weisenburger's

indispensable guide to Thomas Pynchon's *Gravity's Rainbow*. Weisenburger takes the reader page by page, often line by line, through the welter of historical references, scientific data, cultural fragments, anthropological research, jokes, and puns around which Pynchon wove his story. Weisenburger fully annotates Pynchon's use of languages ranging from Russian and Hebrew to such subdialects of English as 1940s street talk, drug lingo, and military slang as well as the more obscure terminology of black magic, Rosicrucianism, and Pavlovian psychology. The Companion also reveals the underlying organization of *Gravity's Rainbow*--how the book's myriad references form patterns of meaning and structure that have eluded both admirers and critics of the novel. The Companion is keyed to the pages of the principal

American editions of *Gravity's Rainbow*: Viking/Penguin (1973), Bantam (1974), and the special, repaginated Penguin paperback (2000) honoring the novel as one of twenty "Great Books of the Twentieth Century."

No one can understand the complete tragedy of the American experience in Vietnam without reading this book. Nothing so underscores the ambivalence and confusion of the American commitment as does the composition of our fighting forces. The rich and the powerful may have supported the war initially, but they contributed little of themselves. That responsibility fell to the poor and the working class of America.-- Senator George McGovern "Reminds us of the disturbing truth that some 80 percent

of the 2.5 million enlisted men who served in Vietnam--out of 27 million men who reached draft age during the war--came from working-class and impoverished backgrounds. . . . Deals especially well with the apparent paradox that the working-class soldiers' families back home mainly opposed the antiwar movement, and for that matter so with few exceptions did the soldiers themselves.--New York Times Book Review "[Appy's] treatment of the subject makes it clear to his readers--almost as clear as it became for the soldiers in Vietnam--that class remains the tragic dividing wall between Americans.-- Boston Globe
