This useful resource, which concludes the illustrious Theological Dictionary of the Old Testament, provides TDOT users with an index to all sixteen previous volumes. The first part of this volume indexes keywords in Hebrew, Aramaic, and English, while the second part indexes all textual references—both biblical and extrabiblical.

1970 Census of Population British Institute at Ankara

This great study is the permanent record and, for much of the material, is now the primary source of the Excavation of Hacilar in south-west Turkey, in the seasons up to 1960, by James Mellaart, then of the British Institute at Ankara. Mellaart's work on the chalolithic, Neolithic, and aceramic levels of the Hacilar mound has added much to our knowledge of early urban settlement in the Near East and of the establishment of agriculture. In the latter work Mellaart was greatly assisted by Hans Helbaek, who contributes a most important section on the paleoethnobotany, and deduces much of the significance about the plant husbandry of the Neolithic Near East. But Hacilar is famous above all for its plentiful and splendid pottery and pottery figurines; and much of this great work is concerned with their documentation, typology and illustration. Volume one contains text, with just enough illustration of the site and the pottery for general guidance.

Reports of Cases at Law and in Chancery Argued and Determined in the Supreme Court of Illinois Wm. B. Eerdmans Publishing

INTRODUCTION TO SOIL MECHANICS Introduction to Soil Mechanics covers the basic principles of soil mechanics, illustrating why the properties of soil are important, the techniques used to understand and characterise soil behaviour and how that knowledge is then applied in construction. The authors have endeavoured to define and discuss the principles and concepts concisely, providing clear, detailed explanations, and a wellillustrated text with diagrams, charts, graphs and tables. With many practical, worked examples and end-of-chapter problems (with fully worked solutions available at www.wiley.com/go/bodo/soilmechanics) and coverage of Eurocode 7, Introduction to Soil Mechanics will be an ideal

starting point for the study of soil mechanics and geotechnical engineering. This book's companion website is at www.wiley.com/go/bodo/soilmechanics and offers invaluable resources for both students and lecturers: Supplementary problems Solutions to supplementary problems *A Treatise on Criminal Procedure* John Wiley & Sons Designed as an introductory level textbook on Artificial Neural Networks at the postgraduate and senior undergraduate levels in any branch of engineering, this self-contained and well-organized book highlights the need for new models of computing based on the fundamental principles of neural networks. Professor Yegnanarayana compresses, into the covers of a single volume, his several years of rich experience, in teaching and research in the areas of speech processing, image processing, artificial intelligence and neural networks. He gives a masterly analysis of such topics as Basics of artificial neural networks, Functional units of artificial neural networks for pattern recognition tasks, Feedforward and Feedback neural networks, and Archi-tectures for complex pattern recognition tasks. Throughout, the emphasis is on the pattern processing feature of the neural networks. Besides, the presentation of real-world applications provides a practical thrust to the discussion.
